

The Makefast Louvred roof system features rotating and retracting blades which allows the user a choice of shade and ventilation styles.

Ideally suited for larger Flybridge openings.

Louvred panels link together to create a watertight seal when the roof is closed.

Louvered panels can be supplied in anodized aluminum construction or sleek carbon fiber to suit the boat aesthetics.

Systems use stainless-steel cable drives with sheaves manufactured from Silicon impregnated Nylon to ensure friction free operation.

The louvred panels are raised using marine-grade hydraulic actuators.

LOUVRE SUNROOF SYSTEM

T E C H S P E C S

+ High quality marine grade 316 stainless steel tracks designed to accommodate variations in boat build and movement in the boat structure.

+ Ideally suited for larger Flybridge openings.

+ All systems utilize stainless-steel cable drives with sheaves manufactured from Silicon impregnated Nylon to ensure friction free operation. The louvred panels are raised using marine-grade hydraulic actuators.

+ Low maintenance self-lubricating cars ensure smooth friction free operation.

+ Louvred panels link together to create a seal when the roof is closed.

+ Louvered panels can be supplied in aluminum construction or sleek carbon fiber to suit the boat aesthetics.

+ Supplied as a 12- or 24-volt system with soft start and stop operation.

+ IP65 rated control box complete with electrical overload safety trip, Deutsch connector plug & play connections supplied as standard.

+ All systems are supplied fully built and cycle tested prior to dispatch.

+ 2-year warranty period from date of dispatch (full details available on request).

+ Optional 3-year extended warranty available.

L O U V R E S U N R O O F

The high quality Makefast USA Louvre Sunroof system features rotating and retracting louvres in a single roof, which allows a choice of shade and ventilation styles.

Once rotated to the venting position, the louvres can be fully retracted to give an open area. Alternatively, leaving the louvres vented allows a free-flow breeze and dappled shade.

This latest addition to the range is a high quality option for any boat as it incorporates industry-leading technology in a marine environment.

SLEEK AND MODERN ROOF DESIGN CREATED FOR THE YACHTING WORLD
