# TECH SPECS

- + High quality marine-grade 316 stainless steel tracks, designed to accommodate variations in boat build, and movement in the boat structure.
- + Suitable for glass, GRP/FRP, and carbon fiber panels (supplied by the boatbuilder).
- + Maximum panel thickness is 20mm (3/4").
- + Suitable for opening sizes up to 3 meters wide by 2.5 meters in length.
- + Opening speed of 5 meters per minute, with a maximum system pulling weight of 60Kg.
- + Running cars are manufactured to ensure a friction-free, low maintenance system.
- + Both systems utilize stainless steel cable drives, with sheaves manufactured from silicon-impregnated nylon to ensure friction-free operation.
- + Supplied as 12- or 24-volt system with soft start and stop operation.
- + IP65 rated control box complete with electrical overload safety trip. Deutsch connectors plug and play connections supplied as standard.
- + All systems are supplied fully built and cycle-tested prior to dispatch.
- + 2-year warranty period from date of dispatch (full details available on request).
- + Optional 3-year extended warranty available.

## PANEL SUNROOF

The lift and slide roof are an innovative and elegant design that provides an extensive opening of the cabin space to the sea air.

The system incorporates a controlled locking and sealing system which aids climate control, ensuring a perfect temperature is maintained in the living space.

With the addition of the sliding panel system, the Makefast USA panel roof range provides the perfect solution for boat builders and designers looking to incorporate a sunroof into any style of boat, even with compound curves and modern sleek designs.
