ROLLER BLINDS

ROLLER BLINDS

- + Manual system has integrated spring-tensioning and is available in self-locking or auto retracting configurations.
- + Self-locking system will stop the blind in 50mm (2") increments.
- + Electric system uses a 12v IP44 rated motor, mounted inside the canvas roller.
- + Integrated sensors for the stop start positions are easily set once the blind is mounted.
- + Operated by a two-way rocker switch (boat builder supplied) or optional remote control.
- + Separate control box not required.
- + High quality marine-grade 316 Stainless Steel tracks used throughout.
- + Standard unit width ranges from 1 meter to 5 meters with maximum 3-meter drop. Bespoke sizes are available on request.
- + High quality marine-grade fabric options in a choice of colors.
- + 2-year warranty period from date of dispatch (full details available on request).
- + Optional 3-year extended warranty available

MAKEFAST USA

The Makefast USA roller blind enables a vertically retractable shading option as well as the ability to define a space.

This versatile design is available in manual or powered variations to suit every possible application. The powered system allows the user the flexibility of stopping the blind anywhere along its drop. The manual system features spring tensioning to either auto-retract from fully extended or allows it to stop at set positions with the self-locking system.
