

How To Use Perfume Rollerballs

Twist off the cap to expose the rollerball.
Roll the roller-ball onto your skin to dispense the oil.

Apply to the inside of your wrists, neck, behind your ears and collarbone.
All scents are skin-safe, so feel free to apply them anywhere you'd like!

We suggest rolling your scents onto each spot back and forth, twice.
This may vary depending on the strength/intensity of the scent you choose.

***We do not suggest applying scents directly on your clothing.
Since it is 100% oil, it is likely to leave oil stains on clothing.***

Twist the cap back on to the bottle to preserve the scent for your next application & avoid leaks during travel.
