NOTES: THE BELOW PROCEDURES MUST BE ADHERED TO IN ORDER TO HAVE BOTH SETS OF TREES EXPOSED TO THE SAME VARIABLES AND THUS HAVE COMPARABLE RESULTS.

1. ORANGE COLORED CELLS ARE CALCULATED VALUES.....
- (Lbs/Tree/Month) = (Lbs/Tree/Day) x (30 Days/Month)
2. THE EXACT NUMBER OF TREES MUST BE TAPPED FOR BOTH SETS OF TREES WITH AND WITHOUT DYNAMIC TAPPING SHIELDS (DTS).
3. BOTH SET OF TREES MUST HAVE TAPPING DAYS THAT START AND END ON THE SAME DAYS.
4. YOUR ESTABLISHED FARM SYSTEM OF ALTERNATE TAPPING DAYS MUST BE APPLIED INDEPENDENTLY TO BOTH SETS OF TREES.
5. RECOMMENDED ALTERNATE TAPPING DAYS ARE; MON,WED,FRI. OR, TUE,THUR,SAT.
6. INDEPENDENT WEIGHING MUST BE DONE FOR EACH SET OF "CUP LUMP" ON THE SAME DAY USING THE SAME SCALE.
7. WEIGHINGS MUST BE WITNESSED BY A FARM REPRESENTATIVE AND A DYNAMIC TAPPING SHIELD LLC REPRESENTATIVE.
8. WEIGHING ON DIFFERENT DAYS CAUSE ERRORS BECAUSE WATER CONTINUE TO DRAIN EFFECTING THE "CUP LUMP" WEIGHT.
