NOTES: THE BELOW PROCEEDURES MUST BE ADHERED TO IN ODER TO HAVE BOTH SETS OF TREES EXPOSED TO THE SAME VARIABLES AND THUS HAVE COMPARABLE RESULTS.

- ORANGE COLORED CELLS ARE CALCULATED VALUES..... (Lbs/Tree/Month) = (Lbs/Tree/Day) x (30 Days/Month)
- THE EXACT NUMBER OF TREES MUST BE TAPPED FOR BOTH SETS OF TREES WITH AND WITHOUT DYNAMIC TAPPING SHIELDS (DTS).
- BOTH SET OF TREES MUST HAVE TAPPING DAYS THAT START AND END ON THE SAME DAYS.
- YOUR ESTABLISHED FARM SYSTEM OF ALTERNATE TAPPING DAYS MUST BE APPLIED INDEPENDENTLY TO BOTH SETS OF TREES.
- RECOMMENDED ALTERNATE TAPPING DAYS ARE; MON,WED,FRI. OR, TUE,THUR,SAT.
- INDEPENDENT WEIGHING MUST BE DONE FOR EACH SET OF "CUP LUMP" ON THE SAME DAY USING THE SAME SCALE.
- WEIGHINGS MUST BE WITNESSED BY A FARM REPRESENTATIVE AND A DYNAMIC TAPPING SHIELD LLC REPRESENTATIVE.
- WEIGHING ON DIFFERENT DAYS CAUSE ERRORS BECAUSE WATER CONTINUE TO DRAIN EFFECTING THE "CUP LUMP" WEIGHT.
