

HUNTER'S POINT PAINT COLOR LIST

This list of colors is based on the color fan from Sherwin-Williams. It is intended to give homeowners an idea of colors. Earth and muted tones are the generally accepted standard. The following chip colors are typically acceptable, but ACC approval depends not only on chosen colors but also where colors are intended to be used (main color, accents, etc.) and how they are used together. This is not an exhaustive list but is also not to be assumed to lead to an automatic approval.
