

IT Update

Todd Armstrong, IT Director

Elaine De la Paz, IT Assistant

January 27, 2022

Webb CISD Family,

Some noteworthy IT updates...

1. Next month, two replacement fiber optic cables will be pulled, to restore high-speed Internet access for both the auditorium and CATE classroom areas. This will allow us to deactivate many cellular WiFi hotspot devices.
2. We continue to implement underutilized technology, to meet new staffing and student needs, but future purchases will be made soon.
3. Behind-the-scenes prep work has begun on our new Gabbart CMS website. We will soon have a staff photo directory and teacher content pages, etc.
4. Esser grant purchases -and- Google G-Suite/Classroom tools are on their way.
5. Web traffic for www.webbcisd.org is increasing, mainly due to updated content.
