Drafting a Provisional Application

Sue A. Purvis

April 12, 2018 *(with updated fees)*

9/7/2021

UNITED STATES
PATENT AND TRADEMARK OFFICE

2

Objectives

- What is a Provisional Patent Application?
- Why file a Provisional Patent Application?
- What the Legal Requirements?
- Drafting Ideas / Tips
- How do you File a Provisional Application with the USPTO?

Types of Patent Applications

- **Design Patent** – a new original, and ornamental design for an article of manufacture
- **Plant Patent** – any distinct and new variety of plant that is invented or discovered and asexually produced
- **Utility Patent** – any new and useful process, article of manufacture, machine, or composition, or improvement thereof
- **Provisional Application for a Patent** – **a low-cost first patent filing**

Types of Patent Applications

Provisional:

- 12 month pendency period (cannot be extended)
- Filed for **filing date priority** for later-filed non-provisional
- Not examined, so no patent
- Typically used for Utility or Plant Patent Applications, not permitted for Design Patent Applications

Non-Provisional:

- In general, 20-year patent protection from filing date
- Examined for patentability
- Claims required

What is a Provisional Application? (MPEP 201.04)

- **Low cost submission to establish a filing date**
 - \$150 – small entity
 - \$75 – micro entity
- **Micro entity certifies that he/she:**
 - Qualifies as a small entity (less than 500 employees);
 - Has not been named as an inventor on more than 4 previously filed patent applications;
 - Did not, in calendar year preceding the calendar year in which the applicable fee is paid, have a gross income exceeding 3 times median household income; and
 - Has not assigned, granted, or conveyed (and is not under obligation to do so) a license or other ownership interest in the application concerned to an entity that, in calendar year preceding the calendar year in which applicable fee is paid, had a gross income exceeding 3 times the median household income.
- **Certification of Micro Entity Status –**
<http://www.uspto.gov/sites/default/files/forms/sb0015a.pdf>

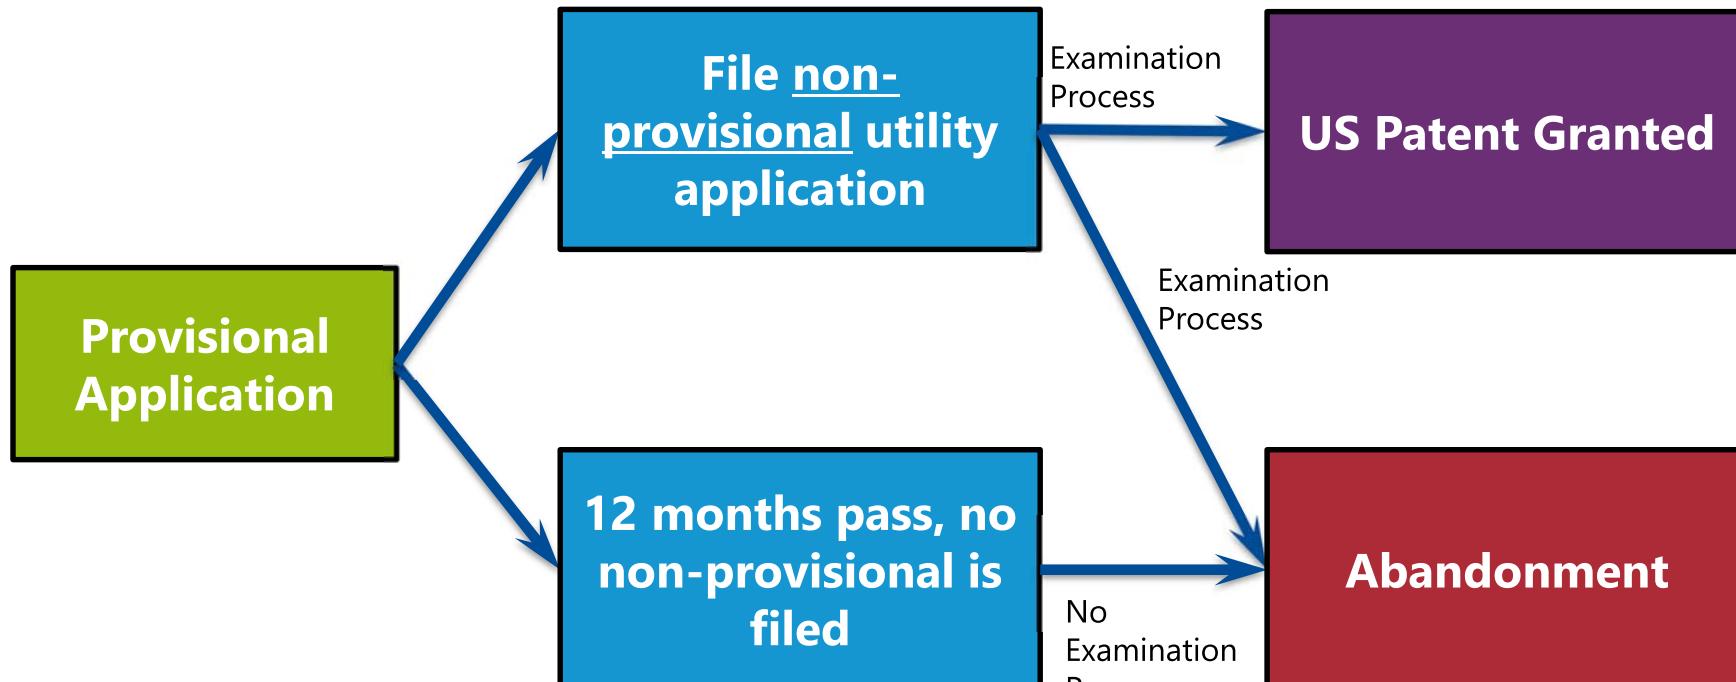

Current USPTO Fee Schedule

Patent application filing fees					
Fee code	37 CFR §	Description	Fee	Small entity fee	Micro entity fee
1011/2011/3011	1.16(a)	Basic filing fee - Utility (paper filing also requires non-electronic filing fee under 1.16(t))	320.00	160.00	80.00
<u>4011†</u>	1.16(a)	Basic filing fee - Utility (electronic filing for small entities)	n/a	80.00	n/a
1111/2111/3111	1.16(k)	Utility search fee	700.00	350.00	175.00
1311/2311/3311	1.16(o)	Utility examination fee	800.00	400.00	200.00
<u>1005/2005/3005</u>	1.16(d)	Provisional application filing fee	300.00	150.00	75.00

<http://www.uspto.gov/learning-and-resources/fees-and-payment/uspto-fee-schedule>

Provisional Utility Applications

uspto

Why file a Provisional Application?

- A low-cost way **to establish an early effective filing date** (priority date) with fewer formalities
- A provisional application **DOES NOT** issue as a patent, but a later-filed regular utility application may issue as a patent and benefit from the provisional application filing date
- **12 month window** to file corresponding **utility patent application** in order to benefit from the priority date of the provisional application
- Provisional application is **abandoned automatically** at 12 months and is **not examined**

Why file a Provisional Application?

Additional benefits of Provisional Applications:

- Patent term measured from filing date of subsequent non-provisional application
 - Patent term is currently 20 years from the date of filing
 - Provides up to an additional 12 months of protection on your invention based on filing of the non-provisional.
- Term patent pending allowed to be applied
 - Inventors may use term during time period after patent application (Provisional, Non-Provisional, Design, or Plant) has been filed, but before patent has issued

Why file a Provisional Application?

- **Keeping in mind Automatic abandonment after one year – it gives:**
 - Inventor given time to investigate market potential / make improvements
 - Be careful – too much change could result in loss of provisional filing date
 - Many inventors file multiple provisional applications during the 1-year pendency of the first filed provisional to include improvements
 - Provides time to obtain counsel if desired
- **No patent issues**—not examined

uspto

What are the Legal Requirements?

In Order to Obtain a Filing Date

- Simplified filing requirements
- Items required:
 - Specification in compliance with 35 USC 112, paragraph (a)
(enabled, written description, best mode)
 - Drawings (needed in almost all cases)
 - Filing fees
 - Cover Sheet identifying Provisional Application Details
(SB/16)
 - Claims and Oath/Declaration are **not required**

Provisional Application Cover Sheet

- **Details**
 - Inventor Name(s) and Residence(s)
 - Title of the Invention
 - Attorney information (if applicable)
 - Correspondence Address
 - Any US Government agency that has a property interest in the application
- PTO/SB/16 -
<http://www.uspto.gov/sites/default/files/forms/sb0016.pdf>

Benefit of Provisional Filing Date

- Non-Provisional Utility and Plant Applications can claim the benefit of Provisional Application filing date if Non-Provisional Application was filed within 12 months of the Provisional Application filing date
- No Provisional Design Applications
- A non-provisional application (regular) claiming the benefit of the provisional application must be adequately supported by the disclosure filed in the provisional application

Note: A Non-Provisional Application can be filed without filing a Provisional Application

Drafting a Patent Application

- What attributes should a “well-written” patent application have?
 - Describe invention so one of ordinary skill can understand (make and use)
 - Disclose the best mode
 - Provide support for claims of unknown scope
 - Claims narrow enough to avoid prior art
 - Claims broad enough to hamper design around

What is a Claim?

- The claim or claims must particularly point out and distinctly claim the subject matter that the inventor or inventors regard as the invention. The claims define the scope of the protection of the patent. Whether a patent will be granted is determined, in large measure, by the scope of the claims.
- Parts of a claim –
 - Preamble
 - Transitional (Linking) Phrase
 - Body
- Order of claims - least restrictive claim should be presented as claim no. 1, and all dependent claims should be grouped together with claim or claims to which they refer to the extent practicable.

Why Draft Claims if Not Required?

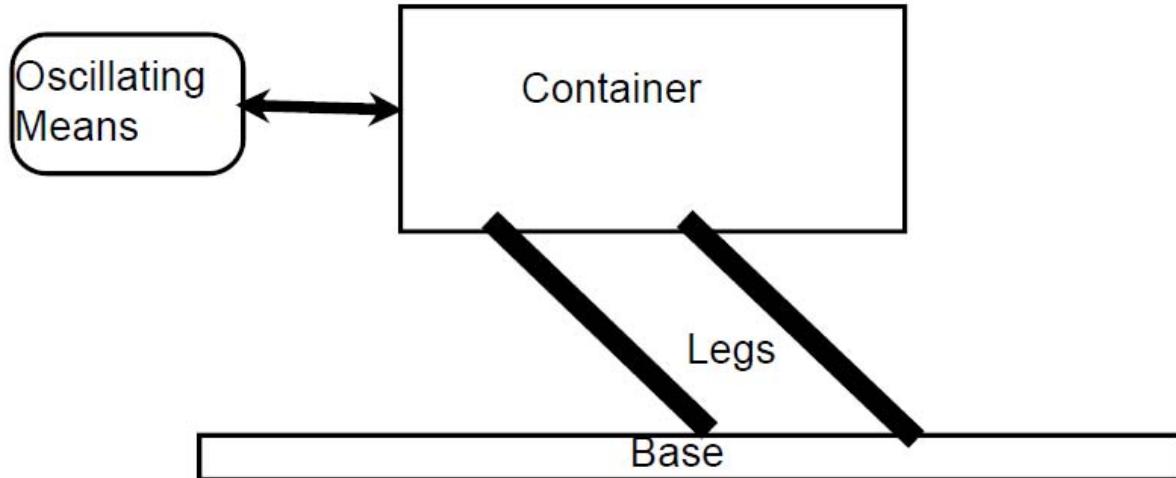

Claim – Defines the Property Right

Example –

1. Apparatus for shaking articles, the apparatus comprising:
 - a. a container for the articles;
 - b. a base;
 - c. a plurality of parallel legs, each leg being connected at one end to the container and at the other end to the base to support the container for oscillating movement with respect to the base; and
 - d. means for oscillating the container on the legs to shake the articles.

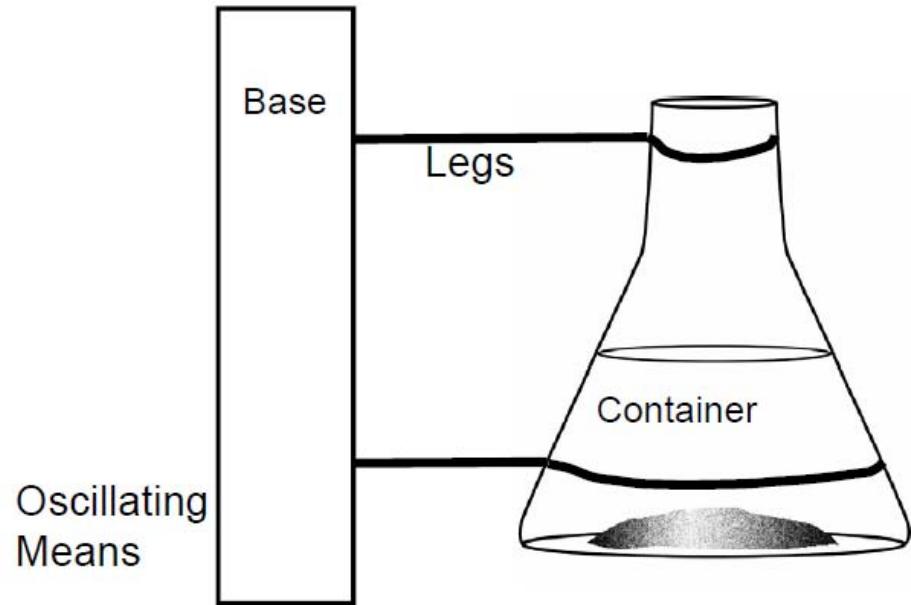

Diagram of the Claim

1. Apparatus for shaking articles, the apparatus comprising:
 - a. a container for the articles;
 - b. a base;
 - c. a plurality of parallel legs, each leg being connected at one end to the container and at the other end to the base to support the container for oscillating movement with respect to the base; and
 - d. means for oscillating the container on the legs to shake the articles.

uspto

Another Diagram of the Claim

1. Apparatus for shaking articles, the apparatus comprising:
 - a. a container for the articles;
 - b. a base;
 - c. a plurality of parallel legs, each leg being connected at one end to the container and at the other end to the base to support the container for oscillating movement with respect to the base; and
 - d. means for oscillating the container on the legs to shake the articles.

uspto

Legal Requirements for the Application

35 USC §101 – Utility, Statutory Subject Matter

**35 USC §112 (a) – Enablement, Written Description,
and Best Mode**

35 USC §112 (b) – Definiteness

Legal Requirements for a Patent

- **35 U.S.C. §112 (b)**
 - “Definiteness” requirement
 - Claims evaluated in light of
 - Content of the application
 - Prior art
 - Interpretation given by those of ordinary skill
- **“Special” terms**
 - Define in the specification / be your own lexicographer
- **35 U.S.C. §102**
 - Novel
- **35 U.S.C. §103**
 - Nonobvious

Parts of a Patent Application

- Title
- Abstract
- Drawings
- Background of the Invention
- Summary of the Disclosure
- Brief Description of the Drawings
- Detailed Description of the Invention
- Claims

Drafting Ideas – Tell the Story of the Invention

- Patent application is a means to communicate and persuade
- The Cast of Characters
 - The Prior Art
 - Likely Users of the Technology
 - The Inventor(s)

The Story of the Invention

- Set the Stage
 - **Background of the invention**
 - What has been done before...
 - Unfulfilled need
 - Failures of others
 - Detail closest prior art you know of and the problems with that prior art
 - Explain the serious nature of problem
 - But ... “what you say may be used against you”
 - This is prior art and can be used as such by the examiner during prosecution

The Story of the Invention

- The Inventor (hero) Saves the Day
- Summary of the Invention
 - Tie to Background (problem/solution)
 - Broad characterization of benefits (e.g., functional)
 - Recast independent claims – Support for claimed invention
- Detailed description
 - Refer to advantages of the described features

Application Drafting – Define “Special” Claim Terms

- Avoid 35 USC §112(b) issues
 - claims must set forth the subject matter that applicants regard as their invention; and
 - claims must particularly point out and distinctly define the metes and bounds of the subject matter that will be protected by the patent grant.
 - **Why is this important even in a Provisional?**
- Be explicit (“As used herein, term X means Y”)
- Claim interpretation
 - Applicant’s definition controls
 - **Choose your words wisely**

Application Drafting – Avoid narrow characterizations

- Overly narrow characterizations of what constitutes the invention can be used to limit the scope of patented claims:
 - “this invention relates to ...”, “a ... made pursuant to the teachings of the present invention”
 - coupled with a lack of description of alternative embodiments
- Solutions –
 - Use alternative language such as: “certain embodiments of the present invention include, but are not limited to . . .”
 - Describe as many alternative features and embodiments as possible

Application Drafting – Avoid Dedication to the Public

- Problem – Disclosed but unclaimed subject matter is “dedicated to the public”
- Solution – Draft a comprehensive set of claims (**only needed for non-provisional application**)

Application Drafting – Duty to Disclose

- 37 C.F.R. §1.56 -Duty of candor and good faith
- Misrepresentations, misleading statements, and omissions violate this duty.
- Disclose relevant prior art

Provisional Applications – Reminder

- 35 U.S.C. §111(b)
 - Act as a “placeholder”
 - Never substantively examined
 - Automatically lapse one year from the filing date
 - Must file a non-provisional within the year to get priority date
- Once filed, applicants can use “patent pending”
- Can not claim priority from another application
- Patent term measured from filing date of subsequent non-provisional application

Provisional Applications

Filing Date Requirements

Required	Not Required
<ul style="list-style-type: none">• A Specification• A Drawing (if required to understand the invention)• A Cover Sheet• Fee	<ul style="list-style-type: none">• A Claim• An Oath or Declaration (37 C.F.R. 1.63)• An IDS

The provisional application must be made in the name(s) of all of the inventor(s). It can be filed up to one year following the date of first sale, offer for sale, public use, or publication of the invention. (These pre-filing disclosures, although protected in the United States, may preclude patenting in foreign countries.)

Provisional Applications – As Basis for Priority (Filing Date)

- **Domestic Priority**
 - For non-provisional applications
- **Foreign Priority**
 - Foreign Applications can claim benefit of Provisional Application filing date if filed within 12 months of the Provisional filing date under Paris Convention Article 4
- **Patent Cooperation Treaty (PCT) can claim priority to US Provisional Application**

Provisional Applications – Domestic Priority

- Requirements
 - Non-provisional application (35 U.S.C. §111(a))
 - Within 12 months of the filing date of the provisional
 - At least one common inventor
 - Reference to the provisional application must be made in non-provisional (at beginning of specification and on ADS)
 - Provisional application must satisfy §112(a) for the invention claimed in the subsequent non-provisional application

Provisional Applications

Advantages & Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none">• Simple and inexpensive to file• No declaration, claims or an IDS need• Specification not examined, and can be informal (PowerPoint presentations, manuals, lab notebook entries, etc.)	<ul style="list-style-type: none">• Must satisfy requirements of 35 U.S.C. §112(a) with respect to a later-claimed invention in order to provide any benefit of Priority

Provisional Applications

Advantages & Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none">Utility application can claim priority to multiple provisional applicationsMultiple provisional applications can be filed in one-year time period measured from earliest filed provisional application in order to capture changes in rapidly evolving technologies	<ul style="list-style-type: none">The various claims of later filed utility application may have different priority dates based on multiple provisional application filing dates, which must be evaluated and considered

Provisional Applications

Advantages & Disadvantages

Advantages	Disadvantages
<ul style="list-style-type: none">• Patent term of a regular utility patent that claims priority to a provisional application relies on the non-provisional filing date• Do not have to be in English. Thus, copies of foreign priority documents may be filed as provisional U.S. Applications	<ul style="list-style-type: none">• Examination is delayed up to one year• Content must be evaluated for adequacy of disclosure to support the claim for Priority

How do you File an Application?

- Who should file?
 - Inventor (Pro Se)
 - Registered Attorney or Agent
- Filing Method
 - Via EFS web
 - By Mail
 - Walk-up window at the USPTO

Filing via EFS Web

- USPTO's Web-based electronic filing system for patent application submissions
- Available anytime, anywhere with minimal software requirements (e.g., standard Web browser, Internet connection)
- Immediately routes documents to USPTO internal systems and provides instant electronic Acknowledgement Receipt to user

About EFS-Web

EFS-Web is the United States Patent and Trademark Office's (USPTO's) Web-based patent application and document submission solution. Using EFS-Web, anyone with a Web-enabled computer can file patent applications and documents without downloading special software or changing document preparation tools and processes.

EFS-Web utilizes standard Web-based screens and prompts to enable you to submit patent application documents in PDF format directly to the USPTO within minutes. When creating your PDF documents, you choose the tool, process and workflow with which you author your documents, convert them to standard PDF files and then submit them to USPTO's secure servers. Additionally, EFS-Web allows submission of PCT-EASY .ZIP compressed files to submit International PCT applications and ASCII text files (.TXT) to submit your bio-sequence listings, computer program listings, mega tables, etc. EFS-Web is safe, simple and secure and gives you all of the same benefits as paper filings, including an electronic receipt that acknowledges your submission date.

- [**Launch EFS-Web Registered eFiler**](#) - for enhanced filing, follow-on processing, saved submissions and more
- [**Launch EFS-Web Unregistered eFiler**](#) - for basic initial filing of new patent applications **Note: Unregistered eFilers are not permitted to file follow-on submissions/fees in EFS-Web. eFilers are advised to pay fees online as part of the initial application submission or use an [alternative filing method](#) to pay fees on the same day to avoid a late surcharge.

<http://www.uspto.gov/patents-application-process/file-online>

Welcome to Electronic Patent Filing for UNREGISTERED eFILERS

A submission has not been filed officially at the USPTO until the e-filer executes the Submit function and the documents are received at the USPTO Eastern All items denoted by * are required.

Now Available: Customers can pay fees from EFS-Web using a stored payment method through USPTO's [Financial Manager](#). The existing EFS-Web payment process will eventually be phased out. For more information, please see [EFS-Web Announcements](#).

IMPORTANT: Please read the [Legal Framework for using EFS-Web](#). For information on the Paperwork Reduction Act as it pertains to: ePetitions, third party submissions under 37 CFR 1.501, please see the [OMB Clearance and PRA Burden Statement page](#).

Application Data

A submission has not been filed officially at the USPTO until the e-filer executes the Submit function and the documents are received at the USPTO Easter
All items denoted by * are required.

Application Data - An ADS may be attached as a PDF

Web-based ADS -  An ADS form is auto-generated based on data entered on a web screen. A Web-based ADS can only be submitted with the filing of a new application on or after September 16, 2012, or with a U.S. national stage entry under 35 USC 371 where the Patent Cooperation Treat (PCT) filing date (international filing date) is on or after September 16, 2012. Do not attach an ADS as a PDF if submitting a Web-based ADS.

Based on the above selection of the radio button, the data will be selected from either the Application Data fields or Web-Based ADS fields after the continue button is clicked. Any data entered in the non-selected form would not be retained.

Please Upload & Validate before Review

Patent Electronic Business Center (EBC)

Monday – Friday

6am – Midnight, Eastern Time

Phone: 1-866-217-9197

Email: EBC@uspto.gov

Filing via mailing to the Office

- Express mail through the US Postal Service allows you to obtain the “date in” on the express mail label as your filing date
- Snail Mail – the date the Office receives your application becomes your filing date

Postcard Receipt

Self-addressed stamped postcard not required but can serve as proof of receipt

- Example: If applicant was filing 15 pages of specification, six (6) sheets of drawings, a provisional application cover sheet and a \$65 check for small entity

A properly itemized postcard would recite:

15 pages of specification,
6 sheets of drawings
provisional application cover sheet
\$65.00 check
