ENGIE's mission

is to lead the
zero-carbon
transition
'as a service'

ENGIE's ambition is to lead the zero-carbon transition 'as a service' through creating partnerships and solutions that go beyond energy.

Using globally leading technologies, we create innovative energy and smart solutions that enhance the performance of homes, businesses and communities to make the world a better place. We act throughout the value chain: strategy, design, engineering, energy-efficient asset construction, digital platforms, operations management, financing syndication and outcome assurance.

At ENGIE, we have been driving innovation for more than 180 years. Today, we are changing the face of energy and services in Australia & New Zealand by creating and developing a diverse range of energy and multi-technical services solutions, backed by global expertise and locally focused customer service.

In Australia, ENGIE has 1,200MW of low-carbon generation capacity and more than 800MW of renewable and low-carbon energy under development. Our retail business, Simply Energy, serves markets in Victoria, South Australia, Western Australia, New South Wales, the Australian Capital Territory and Queensland.

We're committed to safeguarding the welfare of the environment. In Australia and the Asia Pacific region, we've closed or divested all emission-intensive power generation facilities. Decarbonisation of our generation infrastructure is a major goal for ENGIE around the world.

We're proud to be setting the standard in Australia & New Zealand in lower carbon energy generation, renewables, energy efficiency and technology-based solutions. And we're not done yet – watch this space to see how we continue to lead the energy revolution.

An aerial photograph of a residential area. In the foreground, a large roof is covered with rows of solar panels. Two workers in orange safety vests and white hard hats are visible on the roof, working on the panels. In the background, there are several houses with white roofs, and further back, a city skyline with tall buildings is visible under a clear blue sky.

About us

Using globally leading technologies, ENGIE creates tailor-made solutions that enhance the performance of homes, businesses and communities to make the world a better place

We are leading the transition to a zero-carbon economy.

We provide integrated solutions across energy supply, digital services and energy efficiency. We reduce energy costs enabling our customers to achieve a measurable environmental benefit.

Our activities:

- **Energy Management**

Operation & development of low-carbon energy assets and delivering tailor-made energy solutions to a broad range of business customers

- **Services**

Development of energy infrastructure and delivery of innovative digital solutions for precincts and buildings for a zero carbon future

- **Retail**

Over 700,000 Australian customer accounts through Simply Energy

ENGIE is present in 30+ locations across Australia & New Zealand

• 5 low-carbon energy generation facilities in South Australia and Western Australia

• 3 large solar farms under development in Queensland and New South Wales

• Our retail business, Simply Energy, serves markets in Victoria, South Australia, Western Australia, New South Wales and Queensland

ENGIE Cities & Precincts

BETTER Cities
TODAY

ENGIE Australia & New Zealand

ENGIE is your partner for Better Cities and Smart Area Development

ENGIE is helping transform local areas – education campuses, industrial and retail precincts and other local areas – by applying cleaner, smarter, more efficient solutions to reduce costs and energy consumption while enhancing their environmental credentials. We are uniquely positioned to build tailored strategies that optimise and operationalise the value of your assets and bring you the best in financing options, engineering expertise and operational excellence.

A Model for Sustainability Success: Greater Springfield, QLD

In partnership with Springfield City Group, ENGIE is investing in a revolutionary plan that will make Springfield, located in Southeast Queensland, a zero net energy city by 2038.

ENGIE is helping Springfield achieve their vision, which includes:

- Be energy secure
- Be powered by green energy
- Embrace hydrogen as part of its energy solution
- Be a leader in Better Cities solutions

The 50-year partnership includes investments that harness ENGIE's expertise in:

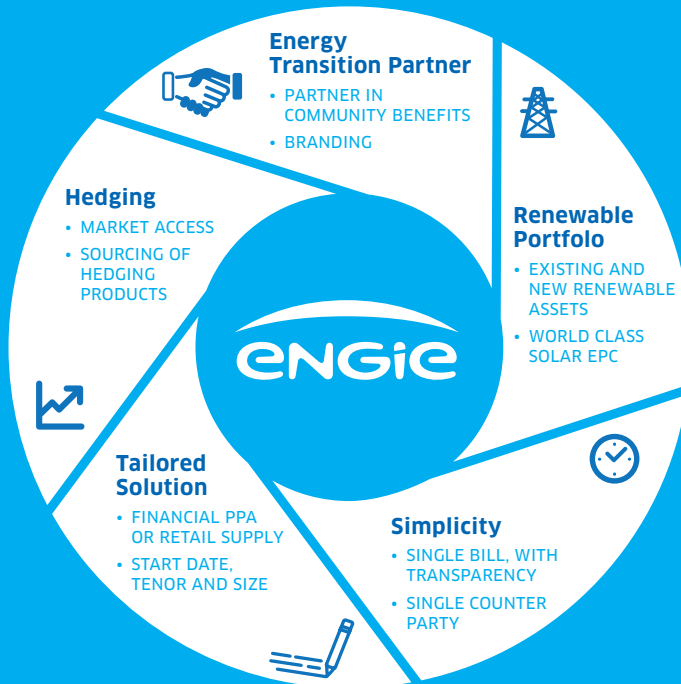

- **BETTER Places:** ENGIE will be involved in Springfield's urban planning, developing public lighting, Internet of Things (IoT), and digital city solutions.
- **BETTER Mobility:** ENGIE will develop electric, hydrogen, and autonomous vehicle solutions, fully utilising the potential of green mobility.
- **BETTER Efficiency:** All Springfield-owned buildings—residential, commercial, and industrial— will be developed in a digitally advanced way to guarantee optimal efficiency.
- **BETTER Energy:** ENGIE will be responsible for the design, implementation, and operation of all energy infrastructure and solutions.

Energy Management

delivering tailor-made energy solutions to a broad range of business customers

Our unique value proposition

In Australia, ENGIE is pioneering the introduction of renewable Power Purchase Agreements (PPAs). These long-term energy supply arrangements provide customers with access to renewable energy sources, improved price visibility, expense certainty and cost savings.

We provide energy cost and risk management services, such as balancing and firming, to manage the intermittency of renewable production with our customers' consumption profile.
