

# BUSINESS VALUATION

A business valuation, also known as a company valuation, is the process of determining the economic value of a business. During the valuation process, all areas of a business are analyzed to determine its worth and the worth of its departments or units. We help determine the best value of your business.

## **Methods of Valuation**

### **Asset Valuation**

Asset valuation is the process of determining the fair market value of an asset. Asset valuation often consists of both subjective and objective measurements. Net asset value is the book value of tangible assets, less intangible assets and liabilities.

### **Income Valuation**

A general way of determining a value indication of a business, business ownership interest, security or intangible asset using one or more methods that convert anticipated economic benefits into a present single amount

### **Market Valuation**

A general way of determining a value indication of a business, business ownership interest, security or intangible asset by using one or more methods that compare the subject to similar businesses, business ownership interests, securities or intangible assets that have been sold.
