MONKOL LEK, PHD GRASP LGMD MEMBER

Dr. Lek is Assistant Professor at Yale University. Monkol has a strong passion for rare muscle disease research as a patient with Limb Girdle Muscular dystrophy (LGMD2G). During his time in the Broad Institute, he led the exome/genome analysis of MYOSEQ (European cohort of >1000 LGMD patients) and SeqNMD (an international consortium of undiagnosed rare muscle diseases) which has resulted in novel disease gene discovery.
