MH COUPLING

MH coupling consists of two flanges and flexible ring able to compensate all types of shaft misalignments. The flexible rings are made of synthetic rubber with steel cores reinforced for improve reliability and maximum operating speed of the coupling. The damping charecteristic of the rubber anable to absorb and dampen torsional vibrations. operate effectively in temperature range of -40 to +100 °C. The rubber also resist to oil, dirt, grease, moisture, ozone and many chemical solvents.
