Health And Online Wellness

1428 W. Hebron Parkway • Suite100 • Carrollton, Texas 75010 • 972.939.4555 • 972.939.7020

The Healow app is intended to improve patient engagement by enhancing communications between patients and their health provider, along with streamlining access to medical records.

Healow will directly connect patients to all their own and their family’s EHRs, enabling immediate access to personal medical records, and facilitating two-way communications between providers and patients.

Why should I use the Healow app?

The Healow app provides a secure means to manage your health and wellness. The Healow app simplifies your life by enabling you to:

- Access multiple Patient Portal accounts from a single location
- Personalize and manage your medications
- Obtain lab results
- Access your Personal Health Record
- Control and view your past or upcoming appointments as well as the summaries of your past visits
- Receive interactive health alerts and messages from your doctor

In addition to connecting patients directly to their electronic health records, Healow enables patients to manage their medical records/summary and those of family members, send messages to their provider, manage medications, and view lab results.
