

NATURAL ENERGY – SUSTAINABLE ENERGY (HYDROGEN)

	Customer	Confidential
	Facility	Power and Hydrogen Production With Refuelling Station
	Location	Undisclosed - Various
	Project	PtP & PtM Project
	Services	Concept Study
	Value	Confidential
	Period	2020 - Ongoing

Project Description:

Long Energy and Resources has been engaged by the customer to complete a concept development study and estimate investigating potential options of proven power generation technology combinations to produce sufficient Hydrogen for a number of end user applications.

The study works include technology evaluations, compliance requirements, sustainable delivery strategy development and economic modelling for both Power to Power (PtP) and Power to Mobility (PtM) solutions that will meet proposed offtake demands.
