DIY Vegetable Container Gardens

GARDEN SUPPLY LIST

CONTAINER(S)

Soil depth of at least 8 inches (20 cm) will hold sufficient soil, nutrients, and moisture to support a good yield from almost every vegetable and herb grown in a container. Expect to water two or three times per week. Smaller containers holding less soil may require more frequent watering and fertilizing.

Recommendation: Containers 17 inches in diameter or larger for large plants (tomatoes, peppers, etc.).

Favorites from:

SOIL

You will need 1½ to 2 bags (1.5 - 2 cu.ft.) of potting soil per large container.

Recommendation: Organic is best.

(anything comparable will do)

SEEDS/SEEDLINGS

Seeds/seedlings should be available at local nurseries including **Pike's, Rountree, Banner,** and big box stores like **Home Depot, Lowe's** and **Walmart**. All will likely have organically grown seedling options. I would recommend seedlings when available to get a head start on the season. Root vegetables like carrots, beets and radishes as well as herbs, like basil and cilantro, are best from seed as they are quick growing and easy/inexpensive from seeds.

Suggested Planting Combinations: (Seeds=🟡 Seedlings=🟢)

Pizza Garden - Tomato 🟢, Sweet Bell Pepper 🟢, Basil 🟡/🟢

Salad Garden - Leaf lettuce 🟡, Cucumber 🟡/🟢, Radish/Carrot 🟡

Salsa Garden - Tomato 🟢, Spicy Pepper 🟢, Cilantro 🟡

Edible Flower Garden - Chives 🟢, Nasturtium 🟡/🟢, Marigold 🟡/🟢, Viola/"Johnny Jump Up" 🟢

Herbs de Provence - Rosemary 🟢, Thyme 🟢, English Lavender 🟢, Oregano 🟢, Summer Savory 🟢

FERTILIZER

Recommendation: Plant Tone organic all purpose fertilizer.
