

POLISH - PROTECT - PRESERVE

ABOUT US

Founded in 2017, Marine Polishing was created on the back of the ever-increasing scale and utilisation of stainless steel on modern day superyachts. By offering professional services of restoration and maintenance, we have encountered a receptive market and a growing change in attitude towards an area which has been generally neglected.

Both partners have over 20 years of experience in the sector, working on hundreds of vessels during that period. With its base in Barcelona, Marine Polishing is ideally situated to travel throughout the Mediterranean and the shipyards of Northern Europe.

Whether a straightforward mechanical polish or a full-blown restoration, including welding, should it be necessary, for deep gouges or scratches, we offer solutions to any specific task or problematic area, including nano technological coatings for glass, metal, textiles and wood which facilitate daily maintenance for the crew.

Each potential job is judged on its own merits and a reasonably accurate estimate can be submitted within 24 hours of receipt of a brief description and accompanying photos of the task and its requirements.

Our standard fare of exterior work on stainless steel bollards, capping rails, anchor pockets, capstans and fairleads has evolved into interiors and engine rooms on projects with other metals such as titanium and brass.

Through strategic alliances we also offer from our Barcelona base, electroplating, anodising and electropolishing services which cover every need, in every department, ranging from interior fittings to engine room checker plates.

SERVICES:

- Metal Restoration (#8 Mirror/ Brushed Satin Finishes)
- New Fabrication Weld Removal
- Bead Blasting
- Application & Supply Of Nano Coatings
- Electropolishing
- Electroplating
- Anodising

TESTIMONIALS

“ Marine Polishing did a great job on our anchor pockets. They were thorough and super easy to communicate with. If there were any issues, such as delays due to external factors, the vessel was always informed immediately. I can highly recommend Marine Polishing for any vessel. - **CHIEF OFFICER, 124M MY KATARA**

“ Marine Polishing's team did a great job with polishing the anchor pockets on board and also completed some polishing of stainless steel handrails. All the work was completed on time and to an excellent standard. - **CHIEF OFFICER - 55M MY EJI (NOW MY HALO)**

“ These guys polished out some quite bad scratches on several of our stainless rails and we were very happy with the finish and overall service. Highly recommended. - **CHIEF OFFICER - 89M MY BARBARA**

“ The guys at Marine Polishing came on-board to polish some deep scratches on our handrails to the swim platform, a very high traffic area for our guests. They did a great job removing some of the scratches. They worked cleanly, fully protecting the area and even washed down afterwards. I would recommend their services! - **CHIEF OFFICER, 58M MY VOLPINI 2**

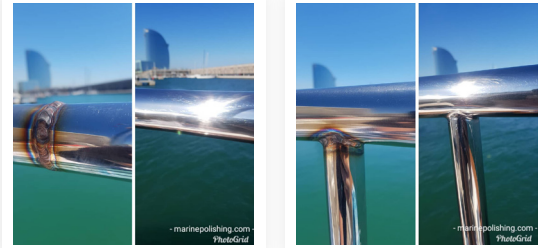

“ Marine Polishing did a great job on the compass surround that we gave them. Very friendly guys, and very professional. Polished items were picked up on the Friday and returned on the Monday. Would highly recommend them and will be using them again in the near future. - **BOSUN - 91M SY NAHLIN**
