

LANTANA

LANTANA, a Project Frog company, offers the latest in lighting innovation. Easy to install and maintain, LANTANA Luminaires provide superior illumination with ultra-efficiency.

LANTANA offers distinctive, sharp, and exquisite designs for healthcare, education, retail, data centers, office environments, and more.

Remote Drive Unit

The LANTANA remote driver unit supplies power for up to 20 LED fixtures using various Class 2 drivers. The RDU centralizes AC to DC power conversion in an easy-to-access electrical panel. The panel is pre-wired in the factory in zones specific to each application, and plug-and-play installation offers rapid field deployment.
