WVCA Preschool Desired Results Developmental Profile (DRDP) Assessment Time

The WVCA Preschool Teaching staff have been offering your children a comprehensive curriculum filled with developmentally appropriate activities and experiences to further their growth and development. As children participate, teaching staff build portfolios on each student that includes evidence of learning through photo, work sample, and written observation. Now that we are reaching our first 60 days of school, trained teaching staff will analyze each child's portfolio, and complete the *Desired Results Developmental Profile-2015*.

The DRDP is a researched based tool, aligned with our curriculum framework, and is used state wide to determine each child's strengths in learning and growing. WVCA will be sharing your child's DRDP, and portfolio documentation at this months Parent Conferences scheduled for **Monday, DEC 1st** Conferences last about 15 minutes, include a summary of outcomes, and goal planning. *These are strength based meetings. If you need to schedule a meeting regarding a concern please email sbuchanan@wvcapreschool.com. Conference Sign-ups will be up, on a first-come, first-serve basis.*

The DRDP results will guide the rest of this year's learning for individual student outcomes, small group, classroom, and even guide decisions on professional growth and development of staff. We are all very excited to share how your child has grown since they've started with us.

You can learn more about the DRDP online at:
