WVCA Preschool uses the [Teaching Pyramid](#) as a curriculum framework that ensures that children are taught critical executive functioning skills that equip them for a successful school year, and build pathways to deeper learning and understanding of concepts, and the world around them. 30 years of research has concluded that children need meaningful relationships with peers and adults, reliable routines, high quality safe learning environments, and highly competent early educators for lasting child outcomes.

We don't memorize facts in preschool, we LEARN!

Each week teachers will lesson plan with summer themes while embedding the critical social emotional skills that will prevent behavioral issues that typically impact preschool learning environments, ALL while enjoying authentic early childhood experiences in PLAY.

teachingpyramid

Water Play Every Friday through August
