GS: Kelly Sinclair	720-429-1932
Super: Mark Reeves	505-508-3246

**Safety Manager(s)**

Name	Phone
George Bunker	970-6324917

# EMERGENCY ACTION PLAN

## Scope

This Plan covers the designated actions the Company and employees must take to ensure employee safety from fire and other emergencies.

## Evacuation

### Muster Points

In case of an emergency on this site, all workers must exit away from the emergency and toward the Primary or Secondary muster point.

**Primary Muster Point:** On street outside of site entry point.

**Secondary Muster Point:** Same as Primary

### Evacuation and Exit Pathway Drawing(s)

For sites that require visual instruction regarding exit routes and emergency muster points, a site emergency evacuation plan drawing shall be developed and attached here:

### Drawing Board

## Emergency Procedures

Employees and workers who remain in the emergency area to operate critical site functions and/or manage the emergency shall follow the following procedures. If the procedures lose their effectiveness, new procedures shall be developed by using the form [edit] function:

### 1. Identify the tasks associated with response personnel actions

Note Task and [save] to add additional task

#### Note Task and [save] to add additional task

Monday through Friday 8AM-5PM, proceed to South Routt Medical Center in Oak Creek. After hours, proceed to UCHHealth Emergency Care Yampa Valley Medical Center in Steamboat Springs. Always call in advance to confirm hours and availability. Always report occupational injuries and illnesses to your foreman and the superintendent. Notify your supervisor of an event and then complete an Incident Report at [www.iws.support](http://www.iws.support) as soon as possible after the incident. Superintendent – Communicate all incidents and injuries to your PM with follow ups to the GC as necessary to meet the GC's reporting requirements. Contact safety director, George bunker with questions or for assistance.

Keep unauthorized personnel from entering an active emergency.

## 2. Identify the hazards associated with the above response personnel tasks

#### Note Hazard and [save] to add additional hazards

Always notify emergency personnel of hazardous conditions, chemical issues, or any other hazard they may come upon when responding to a situation.

## 3. Identify the Personal Protective Equipment (PPE) required for response personnel

#### Note Hazard and [save] to add additional PPE

All permit required activities must meet the requirements of the permit before responding. It is important to provide emergency responders with the necessary information to keep them from becoming a victim.

## 4. Identify means of communication that shall be used by emergency workers

#### Note Communication method(s) and [save] to add additional methods

Air Horn, Cell Phone, Hand Signals, Radios

## 5. What are the emergency rescue plans in case emergency workers need to be rescued?

#### Note element of the Rescue Plan and [save] to add additional elements

For life and limb threatening emergencies, call 911, send another employee to meet the responders at the entrance, render aid until help arrives.

# STOP WORK

1. It is the obligation of every employee, contractor, and visitor to **STOP** observed or assumed unsafe acts, conditions, or behaviors when they are observed or discovered. If you see a risky situation, you own that situation until you stop the cycle of risk.
2. In addition, it is the obligation of every employee, contractor, and visitor to **STOP** and exit the immediate emergency when something does not go as planned, and reassess and replan before reentering the emergency.

# Alarm System

The designated employee Alarm for this site is:

Vocal

Site management shall implement an employee alarm system or tool that provides adequate warning for necessary emergency action for reaction time for safe escape of employees from the workplace or the immediate work area, or both.

The employee alarm shall be capable of being perceived above ambient noise or light levels by all employees in the affected portions of the workplace. Tactile devices may be used to alert those employees who would not otherwise be able to recognize the audible or visual alarm.

The employee alarm shall be distinctive and recognizable as a signal to evacuate the work area.
