

Subcontractor Safety Management

Only accept what you expect!

Training is Knowledge

We must communicate the minimum subcontractor safety training and awareness expectations to our subcontractors!

Action Item:

Please share the following message with every Subcontractor involved with your project:

Dear [Subcontractor],

We hope this communication finds you well. As a valued member of our project team, your safety and the safety of your workers are of utmost importance to us.

To ensure a safe working environment for everyone involved, we kindly request that you notify all of your workers who are associated with our project about the mandatory completion of our Subcontractor Safety Orientation. This training module is designed to raise awareness and provide essential knowledge on safety protocols specific to our project.

By meeting the requirements as presented in this orientation, every subcontract worker will be equipped with the necessary skills and information to promote a secure work environment, reduce accidents, and mitigate potential risks. We believe that together we can work as a team to make a significant impact on the overall safety performance of our project.

Please make sure that all of your workers are aware of this requirement and encourage them to complete the training promptly. The deadline for completion is 9/29/2023.

If you have any questions or concerns regarding the Subcontractor Safety Orientation or need assistance accessing the training module, please don't hesitate to reach out to our dedicated safety team at gbunker@integratedwaterservices.com. We are here to support you every step of the way.

Thank you for your cooperation in ensuring a safe working environment for everyone involved in this project. We greatly appreciate your commitment to prioritizing safety.
