FOR IMMEDIATE RELEASE

TO: Media Partners
DATE: March 1, 2021
REGARDING: February 22- 28, 2021 Weekly COVID Update
CONTACT: Mike Snyder, Health Officer

Public Health Delta & Menominee Counties (PHDM) is providing the weekly COVID-19 vaccine updates to the community.

On Tuesday, February 23, 2021 PHDM received 1000 first doses of the Moderna vaccine. All 1000 doses were shipped to the Delta County office and none were shipped to the Menominee County office. PHDM also received 400 second doses this week. The shipment of vaccine was delayed this week due to winter weather in Memphis, Tennessee. Unfortunately, the delayed shipment resulted in the cancellation of one clinic on Tuesday, February 23rd. This clinic has been rescheduled for Tuesday, March 2nd.

During the week of February 22 to February 28, 2021, PHDM held four clinics and administered 1037 doses (769 first doses and 268 second doses) to those 65 years of age and older, health care workers, first responders, jail staff and pre-K through 12th grade teachers. One of the clinics was a second dose clinic held at Bay College and one second dose clinic was held at the Menominee County PHDM office. Two first dose clinics were held at Bay College.

PHDM has attempted to contact everyone on the wait list, and will begin taking appointments for those who are in eligible populations with an on-line registration option. Information about making appointments will be released soon and available on-line at www.phdm.org. We appreciate everyone's patience on allowing PHDM to get through the wait list so we can begin a more efficient registration process.
