Field Adjustable - Pressure Reducing Valve (P.R.V.)

**ELKHART
BRASS**

URFA

Affordable Drill Towers is now offering the Elkhart Brass Field Adjustable Pressure Reducing Valve (PRV) - URFA as an optional upgrade to the standard standpipe valve on the 1st Floor.

Elkhart's URFA valve is a true pressure reducing valve, operated automatically by inner hydraulic controls. While the valves are preset at the factory, they are field adjustable - allowing you to tailor the pressure to your needs. They feature a manual valve open and close, as well as pressure adjustment - all of which require extremely low torque to change due to the patent pending design.
