RATINGS

Quality rating

The quality rating shows how a home health agency compares to others on measurements of their performance, like how often the agency began their patient's care in a timely manner, or how often a patient got better at walking around. A rating of 3 to 3½ stars means the agency performed about the same as most agencies.

[View Details](#)

Patient survey rating

The patient survey asks patients (or their family or friends) about their home health care, and if they would recommend that agency to someone else. The survey ratings can be used to compare agencies using a 5-star scale, with more stars indicating better quality care.
