Proximity Keys

Key FOBs

FOB programming

Virginizing Toyota ECM's

TAKE NOTE:

- Keys with remotes can sometimes be replaced with non-remote keys.
- Non-transponder keys can be cut as an emergency spare to unlock doors but not start the vehicle.
- We program keys even if you do not get them from us.
- We stock the most common transponder and non-transponder keys.
- Don't replace a Toyota/Lexus ECM for "all keys lost." Call us first.

CHIPPED KEY REPLACEMENTS

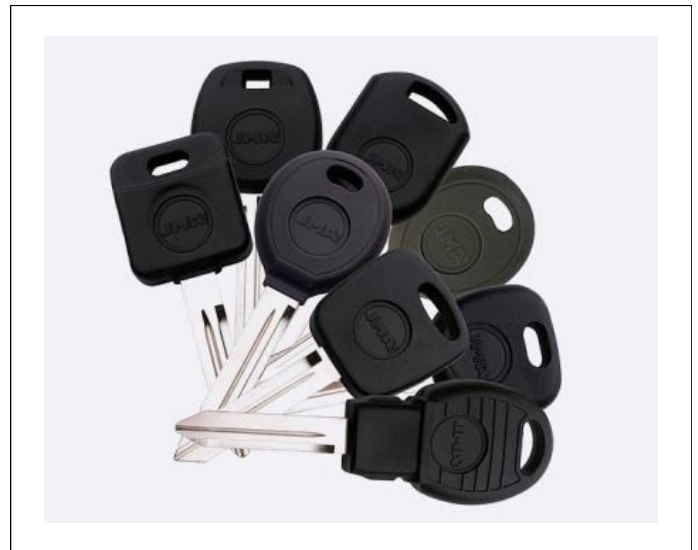

Lost a key, need to replace a damaged key, or just want to add an extra? We carry the most common key blanks as well as key cutting and programming equipment so new keys can be cut and programmed on site... same day.

Pricing varies depending on the cost of the key blank and programming functions required, but it is a safe bet we will be cheaper than going to the dealer.

We support cutting of side-cut and laser cut keys.

We stock keys for GM, Ford, Chrysler, Toyota, Honda/Acura, Mitsubishi, Nissan/Infinity, Hyundai and Kia. We can order keys for other makes as our stock continues to grow.

On some occasions a key with a remote built into the head can be replaced with a non-remote transponder key to save the customer money or

Typical side cut transponder keys.

simply provide an inexpensive spare.

The only requirement for our cutting services is one mechanically cut key blade for the vehicle. If all of the keys have been lost, a key will have to be cut to a key code by the dealer using the vehicle's VIN number.

Call ahead to check availability for the vehicle application. Some keys may need to be ordered and will require a couple of days for delivery.

**Call or Text:
630-917-0953**

IGNITION KEYS WITH REMOTES BUILT INTO THE KEY HEAD

We can also cut and program keys that have integral remotes. These keys are vehicle specific and will need to be ordered.

Call with your application for price, availability and time frame.

One good key blade is required for duplication. The old chip in the key or remote control do not need to be functional.

Cutting and programming of side-cut and laser cut keys supported.

IMPORTANT

Some immobilizer functions require the use of our Locksmith Identification (LSID.) In these cases, the law requires some information from the customer, the customer's signature, a copy of the owner's driver's license and a copy of proof of ownership (such as a registration or vehicle title) before work can be performed.

Typical laser cut keys now supported.

Flip key blades for some applications can be ordered.

PROXIMITY KEYS AND PROGRAMMING

New proximity keys can be ordered and programmed for a variety of push button start vehicles. Proximity keys are application specific. Call with your vehicles information to check on availability and get a price quote. We will do our best to beat dealer pricing.

REMOTE KEYLESS ENTRY FOBS

Lost remotes? Bought a used car and the old owner did not provide the original FOBs? Broken FOB? Or just want to add an extra. What ever the case, a wide variety of key FOBs, or RKE transmitters, are available.

added relatively easily. However, adding RKE to a vehicle that was not originally equipped with the option may be possible. Adding RKE to an application (when possible) may also require replacement, or addition, of other

Call with your application to check pricing and availability.

NOTE: Vehicles that were originally equipped with keyless entry can have remotes

We can test existing FOBs to see if they are functioning or provide replacement units. We stock FOBs, new and used, for some applications. FOBs that we do not stock can be ordered.

components and will require an additional programming fee.

Pricing varies by application. Call for a quote.
