CONIGLIARO BLOCK

TEMPORARY CONCRETE JERSEY BARRIER
(MASH TL-2 TYPE)

SPECIFICATION SHEET

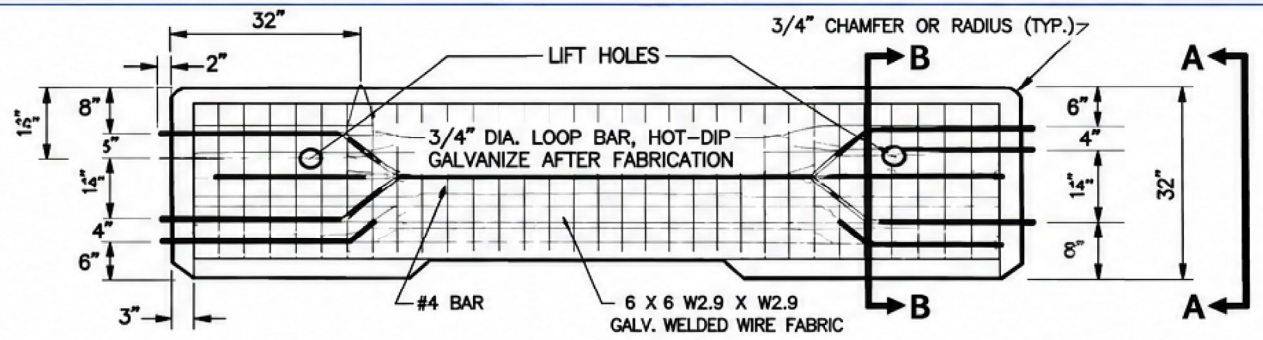

BARRIER SPECIFICATIONS

Length:	10'-0" (120")
Height:	32"
Base Width:	24"
Top Width:	9 1/4"
Weight:	Approximately 4350 lbs

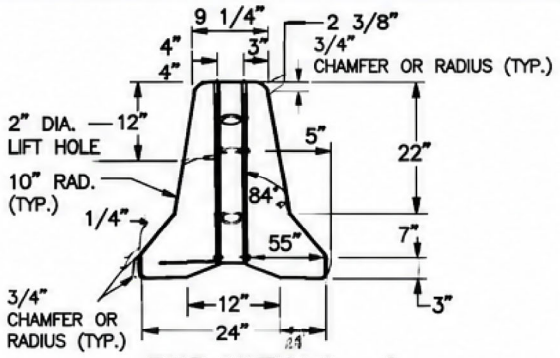

CONSTRUCTION & PERFORMANCE

- Manufactured similar to the 2017 Massachusetts DOT Specification for "Temporary Concrete Barrier, MASH TL-2".
- Available in standard concrete (3,000 psi, 4,000 psi or 5,000 psi) or recycled-content Agg-Crete (approximately 2,000 – 3,000 psi).
- Lifting holes and three (3) rebar connection loops for handling and continuous barrier placement.

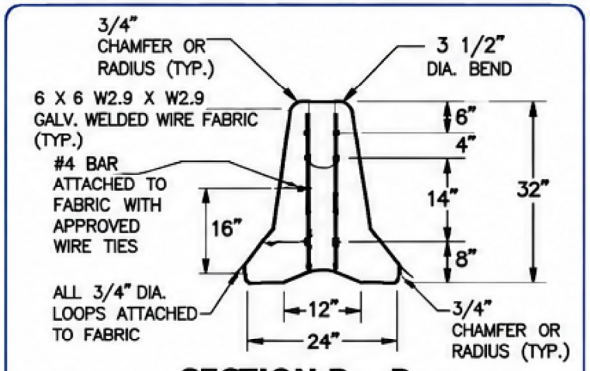

PLEASE NOTE: Our barriers do not meet all aspects of this specification, for example we do not hot-dip galvanize our reinforcement and we manufacture our barriers out of several different mixes.
