

Concrete Parking Stops

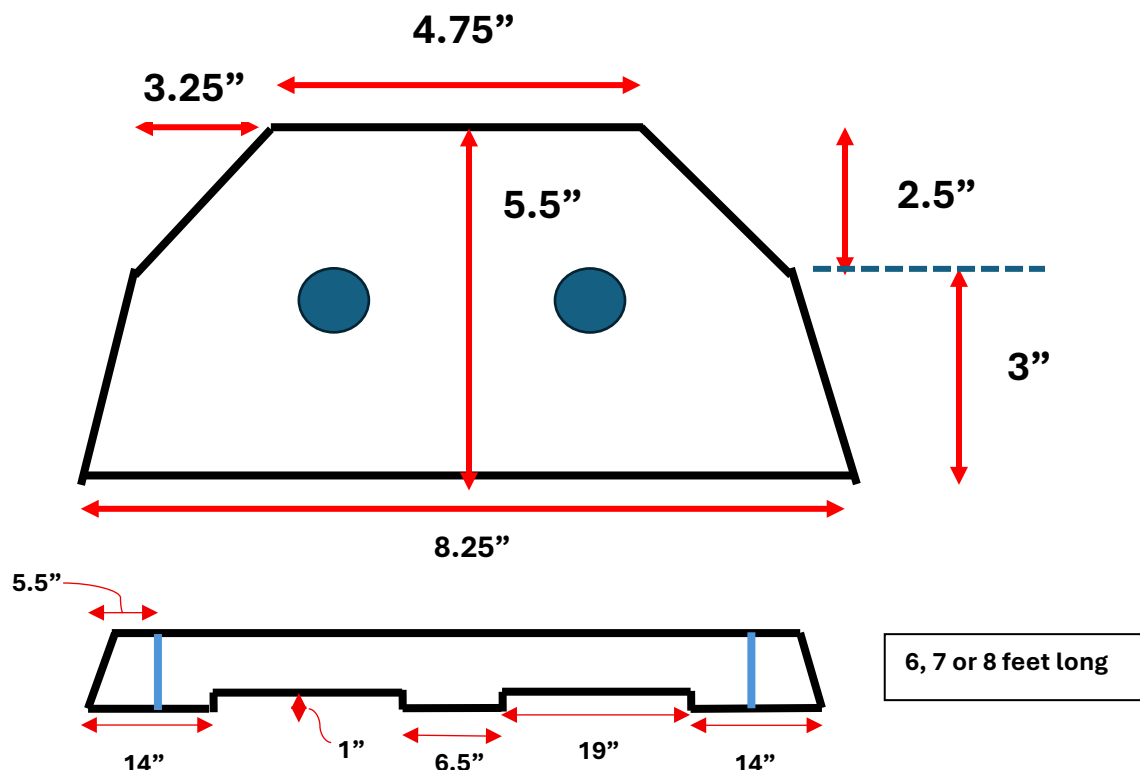

With Drain Slots

Made with 3000 psi standard concrete

Available in Three Sizes: 6', 7' or 8' long

All parking stops are 5.5" tall, 8" wide at the bottom and 4" wide at the top and have two 0.75" diameter holes 5.5" in from each end for pinning the parking stop to the ground. There are two pieces of #4 rebar placed inside the stops during production to add tensile strength. Each stop has two drain slots that are 19" wide and are 14" in from each end. The distance between the two drain slots is 6.5". Our 6', 7' and 8' long stops weigh approximately 225 lbs, 275 lbs and 325 lbs respectively.
