

DON'T USE ROCKS, GO WITH OUR BLOCKS!

Are you tired of repairing your rock seawall every few years? Our Seawalls and Retaining walls have been approved on Cape Cod and in other seaside and lakeside communities across New England.

Our blocks interlock like legos and can be clad with real natural stone. Our walls stand strong over time!

The photos below show two actual walls, side by side, on Cape Cod, that were connected to each other in 2019. The Conigliaro Block wall continues to perform as designed. The "Armour Stone Rock Wall" is failing again! Once a few "chink rocks" were washed out by wave action, rock wall failure began, then large rocks started to fall leading to ongoing and eventual catastrophic failure.
