Corners available in all shapes and are sold per linear foot

Color and shape

Pictures in this catalog try to reflect the color and texture of the stones, however they will not always have the same look because the stones vary in color, veining, texture and shape from piece to piece. More or less trimming may be required to achieve the desired look. It is recommended ordering 10% to 15% additional material for field trimming.

Fieldstone Veneer is not responsible for the variation of such colors and textures used on this catalog. We recommend you request a free sample of the material to be used.

STERLING GRAY

STERLING GRAY - LedgeStone

Length: 4" - 12" height: 1" - 4"

STERLING GRAY - Ashlar
