

From Beta Reader and Reviewer Hallowed on Fiverr:

One in Vermillion May Live is a fresh take on a survival-thriller genre that goes well beyond the norm. This story follows two sisters, both embroiled in their own turmoil with one being the shining example of perfection and the other the shadow ever trying to make her way into the light. When the golden child, Mallory, is thrust into a game of survival known as Vermillion, their lives are abruptly changed forever. Forced to play the game lest the nanobots that were injected into her kill her, she is taken on a wild journey of survival and deception. But, when only one player in Vermillion can live, can she rely on the others that are playing the game? This story is an absolute must-read and a thrilling adventure of personal growth, unintended consequences, and a reminder that not everything is what it seems.

At this point in the review, I take a moment to rate your story on a scale of 1-10. I want to congratulate you. Thus far on Fiverr, with hundreds of clients, you are only the fifth to earn a 10/10 rating. Seeing you take this book to the heights that you did was wonderful. That being said, I want to assure you of something that struck me as I finished this second read through. This was a book I would have picked up all of my own accord. I found the concept of it to be a breath of fresh air, and I think you have something special here. This is an amazing review. he did an in-depth analysis of both versions. Very excited.
