

## Review for *One in Vermilion May Live*

By Jennifer Jaxxon-Louis

Review by: Sandra E. Foster-Edwards,  
author of nine published books, including  
*“Follow the Wild Horses”*, *“You Can Never  
go Home”*, and *“Country-Fried 101”*.

01/09/2025

I found it almost comical that before I even noticed what was printed on the front of this book, the first thought that entered my mind at the very beginning of the story was “The Hunger Games.” I had just finished watching the newest episode on Net Flix. And also, how the O’Grady bunch made me remember my youth with The Brady Bunch series. What a small world. This author does a wonderful job at placing the reader right into the mix and right from the get-go.

Wonderfully well-written story. As I read, I’m thinking that this work would give even the popular ‘Hunger Games’ competition.

Ms. Jaxxon-Louis’ futuristic endeavor deftly takes you down a worrisome path from ‘every teen’ arguing with their parents about which university to attend, to biker-gangs, kidnapers, and real-time *death monitors*. *Vermilion* is a game but is it a game you

would want to play? Are you brave enough to join us? This *Game* of sorts rapidly becomes a life and death saga for the twin sisters, Mallory and Davina.

Davina must infuse herself into the murky depths of the *Game* and put her own life at risk to save that of her twin sister, Mallory. What sacrifices must she make to get herself invited into the games and what dangers must she face should she manage to get an invite and then escape with her sister in tow? Well, sorry, but to know, you will just have to join me as we read along and see where it takes us. Happy reading, everyone.
