CORE CAPABILITIES AND PRODUCTS

Predictive Threat Intelligence: Anticipates threats before they become attacks.

Mission Assurance: Maintains resilience and continuity of critical operations.

Innovating the Cyber Domain: Delivering AI-driven cybersecurity solutions to protect and strengthen mission operations.

Cyber Dome™: AI-driven NIST compliance with continuous monitoring and automated control management.

CyberShield™: Continuous AI-powered monitoring to detect threats in real time.

CyberCenturion™: Adaptive, automated incident response to rapidly contain threats.

Cyber Planner™: Automated management of cybersecurity plans and compliance.

CyberVault™: Intelligent audit log analysis to identify suspicious activity.

ABOUT CYBER SPARC AI™

Cyber Sparc AI™ is a cutting-edge cybersecurity solution that integrates artificial intelligence with proven federal and commercial cybersecurity frameworks to deliver proactive, intelligent defense solutions. Built on innovation and guided by NIST standards, we provide scalable solutions that enhance resilience, ensure readiness, and enable mission assurance across the cyber domain.

OUR MISSION

To deliver AI-enabled cybersecurity solutions that advance system security profiles by automating compliance, strengthening situational awareness, and ensuring continuous protection across critical systems and networks.

We are dedicated to the US policy of buying American and maximizing the use of domestically produced AI. As a 100% US-owned company, our US-developed AI software ensures that your organization remains consistent with the national goal of prioritizing technology developed and produced right here in the United States. Innovating in Alignment with Executive Order #14179.
