

The Martin Wilson School

Supporting Pupils with Medical Needs Policy

Written September 2014

Reviewed: May 2016

November 2018

This policy should be read in conjunction with the Health and Safety Policy and the Management of Medications Procedures.

RATIONALE

Most pupils have at some time a medical condition that may affect their participation in school activities. For many this will be short-term; perhaps finishing a course of medication.

Other pupils have medical conditions that, if not properly managed, could limit their access to education.

Such pupils are regarded as having **medical needs**. Most children with medical needs are able to attend school regularly and with some support from school, can take part in most normal school activities. However, staff may need to take extra care in supervising some activities to make sure that these pupils, and others, are not put at risk.

There will be some pupils whose access to the curriculum is impaired not so much by the need to take medication but that their condition brings with it a level of dependency on adult support to meet their personal needs. This policy seeks to include these pupils and their needs.

Parents or guardians have prime responsibility for their child's health and should provide school with the information about their child's medical condition.

The Children and Families Act 2014, from September 2014, places a duty of schools to make arrangements for children with medical conditions. Teachers and other school staff in charge of pupils have a common law duty to act in loco parentis and may need to take swift action in an emergency. This duty also extends to teachers leading activities taking place off the school site. This could extend to a need to administer medicine.

***There is no legal duty which requires school staff to administer medication; this is a voluntary role however school should take all reasonable steps to ensure a pupil can attend school without interruption to their education.** Staff who provide support for pupils with medical needs, or who volunteer to administer medication, should receive support from the head and parent, access to information and training, and reassurance about their legal liability. Staff should whenever they feel it necessary consult with their respective professional associations.

Good Practice

Children and young people with medical conditions are entitled to a full education and have the same rights of admission to school as other children. Students with a medical condition will not be denied admission or be prevented from taking up a place in school because arrangements for their medical condition have not been made.

POLICY

Students at The Martin Wilson School with medical conditions should be properly supported so that they can play an active part in school, remaining healthy and able to achieve their academic potential, with full access to education, including school trips and physical education.

Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting at their school with medical conditions.

Definition of the term Medical Condition used in this context:

A medical condition that is long term with acute episodes, requires ongoing support, and involves the need for medication and/or care whilst at school. The condition will need monitoring and could require immediate intervention in emergency circumstances. Some children with medical conditions may be disabled. Where this is the case the governing body must comply with their duties under the Equality Act 2010. Some may also have Special Educational Needs (SEN) and may have a Education, Health and Care Plan (EHCP), which brings together health and social care needs, as well as their special educational provision. For children with SEND, this guidance should be read in conjunction with the SEND code of practice and the Local Offer and the school's SEND information which is available on the school website.

Statement of Intent

All pupils attending the school with a medical condition (meeting the above definition) must have an Individual Healthcare Plan.

RESPONSIBILITIES

It is important that responsibilities for pupils' safety is clearly defined and that each person involved with pupils' medical needs is aware of what is expected of them. Close co-operation between school, parents, health professionals and other agencies will help provide a suitably supportive environment for pupils with medical needs.

Local Authority

The Local Authority is responsible under the Health and Safety at Work Act 1974, for making sure that a school has a Health and Safety Policy. This should include procedures for supporting pupils with medical needs, and managing medication. In the event of legal action over an allegation of negligence, the employer rather than the employee is likely to be held responsible. It is the employer's responsibility to ensure that correct procedures are followed.

Where pupils would not receive a suitable education in a mainstream school because of their health needs, the Local Authority has a duty to make other arrangements. Please refer to the Local Offer for more details. Statutory guidance for local authorities sets out that they should be ready to make arrangements under this duty when it is clear that a child will be away from school for 15 days or more because of health needs.

Governors

The governing body must ensure that arrangements are in place in school to support students with medical conditions. In doing so, they should ensure that such children can access and enjoy the same opportunities at school as any other child. The school, Local Authority, health professionals, and other support services should work together to ensure that children with medical conditions receive a full education.

The governing body should ensure that the school's leaders liaise with health and social care professionals, students and parents to ensure that the needs of children with medical conditions are effectively supported. The needs of each individual child must be considered and how their medical condition impacts on their school life.

The governing body should ensure that the arrangements that they have put in place are sufficient to meet their statutory responsibilities and should ensure that policies, plans, procedures or systems are properly and effectively implemented. This aligns with their wider safeguarding duties. Policies should be reviewed regularly and be readily accessible to parents and school staff.

The governing body should ensure that:

- The Headteacher implements this policy effectively.
- The Individual Healthcare Plans are devised, implemented and monitored by the Headteacher, working in partnership with the parents, pupil SENCo and other relevant healthcare professionals.
- Written records are kept of all medicines administered to children.
- All healthcare plans (IHPs) actively support children with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.
- That staff are properly trained to provide the support that students need.
- That the school's policy sets out what should happen in an emergency situation.
- That the appropriate level of insurance is in place and appropriately reflects the level of risk, with risk assessments being carried out, when appropriate.
- That the school provides parents with information about the Local Offer and the School Offer including information displayed on the school website.
- That parents provide the school with sufficient and up-to-date information about their child's medical needs. This will be prompted with an annual data check.

The Headteacher

The Headteacher, **Mr David Purslow**:

- Is responsible for implementing the governing body's policy in practice and for developing detailed procedures.
- Should ensure that good lines of communications exist between parents and all relevant education and healthcare professionals.
- Should ensure that teachers who volunteer should receive proper training and support.
- Is responsible for the day to day decisions on administering medication.
- Must share information with relevant staff to ensure that the best care for the child after seeking parental agreement to do so.
- Should ensure that wherever possible the parent is not inconvenienced from work in order to support the pupil or administer medication at school.

Parents and Guardians

Parents, as defined in the Education Act 1944, are a child's main carers. They are responsible for making sure that their child is well enough to attend school.

Parents should:

- Provide the Headteacher with sufficient information about their child's medical condition and treatment to allow the appropriate arrangements to be put in place in school.
- Reach agreement jointly with the school on the school's role in helping with their child's medical needs.
- Share information to ensure the best care for the child.

School

The school will:

- Ensure that students with medical conditions are identified as they transfer to school and through the ongoing annual data check process.
- Arrange for written permission from parents/carers and the Headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours.
- Will only administer clearly labelled prescribed medication
- Have separate arrangements in place for school trips or other school activities outside of the normal school timetable that will ensure the student can participate e.g. risk assessments etc
- Designate individuals to be entrusted with information about a student's condition; where confidentiality issues are raised by the parent/child.
- Have an identified key worker trained to specifically meet the needs of students with an EHCP linked to a medical condition. **This worker is Miss Vickie Wilson.**
- Always have a minimum of two members of staff trained in first aid response with knowledge of the students with medical conditions and access to their IHCPs.
- Be clear about what to do in an emergency, including who to contact, and contingency arrangements. (Some children may have an emergency care plan prepared by their lead clinician that could be used to inform development of their Individual Healthcare Plan.)
- Make sure all staff working directly with students are aware of the students in school with medical conditions, through regular meetings and displays in the staffroom. All registers to hold information about students with medical conditions in each class.
- Provide sufficient training for staff to meet the needs of students at the school with medical conditions.
- Ensure that health care procedures will only be given by staff following appropriate training from medical professionals.

School Staff

- Staff should use their discretion and judge each case on its merits with reference to the student's Individual Healthcare Plan. Staff should make inhalers and medication easily accessible to students and administer their medication when and where necessary.
- Staff should give individual, personalised care to students even those with the same condition.
- Staff should take the views of the student and their parents into account; act on medical evidence and opinion but challenge it when appropriate.
- Staff should supervise students with medical conditions if they become ill.

- Staff should encourage pupils to drink, eat and take toilet or other breaks whenever they need to in order to manage their medical condition effectively.
- Staff should follow the procedures agreed in the Individual Healthcare Plan and contact parents when alternative options may need to be considered when a pupil doesn't want to take medication or have necessary procedures.
- Staff should log in school records any concerns they have on a child's health and wellbeing and report these to parents on the same day where possible.

Emergency Procedures

In the event that an ambulance needs to be called, any member of staff should;

- Ring the emergency service stating the medical condition
- Endeavour to make contact with the parent/carer.
- Accompany the child in the ambulance if required.
- Take a copy of all medical details including medication.
- Remain with the child until the parent arrives.

Generally, staff should not take pupils in their own car. If it is required then the member of staff should be accompanied by another adult.

Individual Healthcare Plans

The school, healthcare professionals and parents/carers should agree, based on evidence, when an Individual Healthcare Plan would be appropriate or disproportionate. Where there is a discrepancy an appropriate healthcare professional should be asked to arbitrate.

Individual Healthcare Plans must:

- Be clear and concise.
- Be written in partnership with parents, child, healthcare professionals and key staff.
- Be reviewed annually or when there is a change in the condition of the child.
- Be easily accessible whilst preserving confidentiality.
- Be securely stored.
- Outline educational provision if the student is unable to attend school.
- Contain details of the medical condition, its triggers, signs, symptoms and treatment.
- Include relevant SEN information.
- Provide details of the student's resulting needs, including medication (dose, side-effects and storage) and other treatments, time, facilities, equipment, access to food and drink where this is used to manage their condition, dietary requirements, modification to buildings, furniture or equipment, and environmental issues e.g. crowded corridors, travel time between lessons etc.
- Outline specific support for the student's educational, social and emotional needs – for example, how absences will be managed, changes to the school day etc.
- Outline the level of support needed, (some children will be able to take control of their own health needs), including in emergencies. If a child is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring.
- State who will provide the support, their training needs, expectations of the role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional where appropriate.
- State emergency plan and plan of action in the event of an emergency.

Complaints

Parents/carers' concerns about the support provided for their child with a medical condition should be directed, in the first instance, to the designated lead for supporting pupils with medical conditions, Mr David Purslow. Where parents/carers feel their concerns have not been addressed, they should contact Mr Steve Wright, Chair of Governors to make a formal complaint via the school's complaint procedure.
