

## M&W International LLC.

351 Texas State Hwy 62

Buna TX. 77612-6473

### Capabilities Statement: Strategic Conduit for Rapid Energy Infrastructure

**Company Overview** M&W International LLC is a high-agility **Strategic Conduit** specializing in the rapid sourcing and technical alignment of modular energy assets. We bridge the gap between U.S. Federal requirements and high-spec domestic "Module Builders" to restore throughput the distressed energy market in South America. Our firm is built on the technical leadership of industry veterans, providing the Department of Energy (DOE) with a streamlined pathway to execute **Operation Absolute Resolve** with zero administrative lag.

---

### Core Competencies: Conduit & Facilitation Services

#### I. Strategic Sourcing & Hub Facilitation

- **Inventory Sourcing:** Real-time identification of "Near-Complete" or repurposed modular assets within domestic hubs to bypass 24-month lead times.
- **Technical Liaison:** Expert translation of DOE Americas Desk requirements into manufacturer-ready engineering specifications for heavy/sour crude processing.
- **Vendor Management:** Structuring "Teaming Arrangements" with pre-vetted fabrication shops for immediate mobilization for domestic construction and transport to local waterways for Trans Gulf export.

#### II. Engineering & Project Oversight

- **Brownfield Integration Strategy:** Advising on "bolt-on" modular upgrades for legacy PDVSA assets to minimize civil work and environmental impact.
  - **Compliance Oversight:** Ensuring all sourced technology and operational designs adhere strictly to the DOE, ASME, OSHA, OFAC, and international safety protocols.
  - **Logistics Coordination:** Mapping Out-of-Gauge (OOG) transport routes through secured **Southern Spear** maritime corridors.
- 

### Differentiators

- **Realistic Accelerated Timelines:** Our target is **18-24 month** "First Barrel" once the starter pistol is fired. Developing milestones by utilizing parallel fabrication and brownfield optimization, potentially halving the traditional 4-year construction cycles.
- **Agile Sourcing Model:** As a specialized conduit, we provide unbiased vetting of multiple builders, ensuring the DOE gets the best technical fit rather than being locked into a single vendor's catalog.
- **Technical Dual-Track:** We offer both the **Strategic Pathway** (procurement & sourcing) and the **Engineering Oversight** (integration & compliance) in one streamlined package.

## **M&W International LLC.**

**351 Texas State Hwy 62**

### **Technical Leadership & Field Expertise**

- **The "Global Dream Team":** Our firm, with one call, can mobilize a cohesive "Graybeard" network advisory group. A veteran team of career engineers and craft specialist with a shared history of mission success in the world's most unforgiving energy theaters. This is not a loose network; we are a disciplined unit that worked together in **Saudi Arabia (Aramco-spec)** and has the field-shorthand required for rapid stabilization.
- **Decades of "Old Dog, Gray Beard" Wisdom:** Each consultant brings **25 to 40 years** of individual experience. We offer the DOE a "No Learning Curve" advantage. Our team has survived the technical and logistical obstacles of **Saudi Arabia, Bahrain, the UAE, Azerbaijan, and Egypt**, ensuring that every modular solution we find is grounded in field reality, not just CAD drawings, and is compliant to the customers specifications and requirements.
- **International High-Stake Deployments:** We specialize in the "Cold Start" of distressed assets. Our team's experience in the Middle East and Eurasia has prepared us for the specific challenges of **Operation Absolute Resolve**: integrating high-spec U.S. modular hardware into legacy, neglected infrastructure under accelerated timelines.
- **Strategic Conduit Oversight:** We will bridge the gap between the **Southeast Texas fabrication hub** and the Venezuelan theater. We will not just find the builders; we provide veteran engineering oversight to ensure the hardware is built to **ASME/API** absolute standards.
