

About this Fiverr Gig:

“I will tune your vocals carefully with melodyne and more.”

Music & Audio > Vocal Tuning

User:

BossBabeRecords

Packages:

- Basic: \$100 for up to 5 vocal tracks tuned, edited, and aligned in Melodyne.
- Standard: \$200 for 10 vocal tracks tuned, edited, and aligned in Melodyne.
- Premium: \$300 for 15 vocal tracks tuned, edited, and aligned in Melodyne.
- Each package can take up to four days for delivery.

Add Ons:

- Additional vocal tracks are only \$20 each to add on. They shouldn't actually add on additional days to delivery. If you have less than 5 tracks, message me if you want a discount from the Basic Tuning Package.
- Harmony creation is \$375. This is based on the 15 vocal track package. In my last audio reference I have 13 harmony tracks. If you want less than 15 harmony tracks, feel free to ask for a discount. Price breaks down to \$25 per harmony track. Please give me a reference of the types of harmonies you are seeking or I will just do whatever I think sounds best with the four plug-ins I use. Can add up to four days onto delivery.
- Additional revisions are \$150. This also is based on 15 tracks and only applies to either the main package or add-ons. If you want to pay less for this as you aren't asking for this much, feel free to message me for a discount. I am charging \$10 per track per package or add-on to make a revision. If you are confused by my math & description, you are welcome to ask for clarification depending on your project.
- Basic Vox Mix is an additional \$50 per track, not per song. So if you got the BASIC package with 5 tracks it would cost \$250 to have me do a basic mix on those 5 tracks. If you have 10 tracks, it would be \$500 and if you have 15 tracks it would be \$750, etc. Could add on 5 days to delivery.
- Pro Vox Mix is an additional \$150 per track, not per song. You CANNOT add this without also adding the Basic Vox Mix. For mathematical reference if you have 5 vocal tracks this would cost an additional \$750, \$1,500 for 10 vocal tracks & \$2,250 for 15 vocal tracks. More info on what I do in this add-on is in the FAQ section PDF. This could add on an additional week to delivery. Feel free to message me with questions about anything you don't understand.
- Getting a Final mix would be another \$200 (where I listen on all possible speakers.)
- Getting it Mastered would be an additional \$100.
- It's possible to get discounts for larger orders, so don't be afraid to ask. Also, these are based on the amount of time it takes to do things. If it takes me less time than I can give you credit for a future project. All clients can have the ABLETON PROJECT FILE.
