Proe fee allocated by all state “Reparations task force” and “HR 40” pursuant to 28 USC 2412 Equal Access to Justice Act and surety bond compensation for Court case intentional delays and errors.

History

The 1974 Budget and Impoundment Control Act gave Congress a mechanism for making large, all-encompassing, budget decisions. In the years that followed, the budget process gradually became the vehicle for creating comprehensive policy changes. One large step in this transformation occurred in 1981 when President Ronald Reagan’s administration suggested using the budget to push through his economic reforms.

The benefit of attaching the reforms to the budget resolution was that Congress could force an up or down (yea or nay) vote on the whole package. Such a packaged bill is called an omnibus bill.³⁸ Creating and voting for an omnibus bill allows Congress to quickly accomplish policy changes that would have taken many votes and the expending of great political capital over a long period of time. This and successive similar uses of the budget process convinced many in Congress of the utility of this strategy. During the contentious and ideologically divided 1990s, the budget process became the common problem-solving mechanism in the legislature, thus laying the groundwork for the way legislation works today.

An important characteristic feature of modern legislating is the greatly expanded power and influence of the party leadership over the control of bills. One reason for this change was the heightened partisanship that stretches back to the 1980s and is still with us today. With such high political stakes, the party leadership is reluctant to simply allow the committees to work things out on their own. In the House, the leadership uses special rules to guide bills through the legislative process and toward a particular outcome. Uncommon just a few decades ago, these now widely used rules restrict debate and options, and are designed to focus the attention of members.

The practice of multiple referrals, with which entire bills or portions of those bills are referred to more than one committee, greatly weakened the different specialization monopolies committees held primarily in the House but also to an extent in the Senate. With less control over the bills, committees naturally reached out to the leadership for assistance. Indeed, as a testament to its increasing control, the leadership may sometimes avoid committees altogether, preferring to work things out on the floor. And even when bills move through the committees, the leadership often seeks to adjust the legislation before it reaches the floor.

Another feature of the modern legislative process, exclusively in the Senate, is the application of the modern filibuster. Unlike the traditional filibuster, in which a senator took the floor and held it for as long as possible, the modern filibuster is actually a perversion of the cloture rules adopted to control the filibuster. When partisanship is high, as it has been frequently, the senators can request cloture before any bill can get a vote. This has the effect of increasing the number of votes needed for a bill to advance from a simple majority of fifty-one to a super majority of sixty. The effect is to give the Senate minority great power to obstruct if it is inclined to do so.

Regards,

Rev. Dr. Christina Clement, in her capacity and as Presidential Candidate of the US 2024
