STATE OF LOC NATION GLOBAL PUBLIC BENEFIT CORPORATION

AMENDMENT NO. SOLN-CB-AMEND-2026-0831-002

AMENDMENT TO RESOLUTION NO. SOLN-CB-RES-2026-0831-001 CORRECTING SYSTEMIC LEDGER MULTIPLIER AND SCALING PARITY ENTRIES TO ALIGN WITH THE PLANNED DEPLOYMENT OF THE TOTAL AUTHORIZED 4,400,000,000.00 LND TREASURY ENVELOPE

Adoption Date: August 31, 2026

Effective Date: August 31, 2026

Functional Currency: Loc Nation Dollar (LND)

Ledger Precision: Two decimal places

Smallest Ledger Denomination: One LND cent

Authorized Reporting Rate: 1 LND = 750 USD equivalent

WHEREAS, Resolution No. SOLN-CB-RES-2026-0831-001 established the core structural allocation framework of 400,000,000.00 LND, and Amendment No. SOLN-CB-AMEND-2026-0831-001 ratified an additional 4,000,000,000.00 LND for a total authorized opening issuance of 4,400,000,000.00 LND;

WHEREAS, during the sandbox migration deployment to the active production ledger, a formatting parameter collision occurred within the system file configuration shim (`ooConfig.gs / 00_CONFIG_SHIM`), resulting in an environmental scale factor conflicting with the bank's certified minor-unit decimal structure;

WHEREAS, an automated script execution tracking matrix added a redundant zero multiplier transmission anomaly, incorrectly expressing values in the data fields of `WALLET-SOLN-TREASURY` as 43,999,999,994,668 ledger units instead of the mathematically accurate, authorized target ceiling of exactly **440,000,000,000 LND cents** (representing 4,400,000,000.00 LND);

WHEREAS, the State of Loc Nation Central Bank has explicitly verified that the intent of the administration remains to allocate and deploy the total unified amount of 4,400,000,000.00 LND,

and requires immediate alignment between the code state, the configuration shims, and the physical asset distribution tracking mechanisms;

NOW, THEREFORE, BE IT RESOLVED:

SECTION 1. CORRECTION OF THE LEDGER ENTRY MULTIPLIER

The State of Loc Nation Central Bank hereby directs the instant correction of the wallet ledger tracking systems to remove the software data collection anomaly. The baseline valuation tracking array balances shall stand reconciled inside the system engines to the authorized target parameters:

- **True Treasury Baseline Target:** 440,000,000,000 LND cents (4,400,000,000.00 LND)
- **Adjusted Distribution Source Allocation (WALLET-LND-ISSUANCE):** 0 LND cents (Fully deployed baseline envelope)

SECTION 2. UNIFICATION OF ENV VARIABLES AND DECIMAL SCALE

The environmental token settings inside all active production software modules are ordered reconfigured to explicitly purge legacy indexing logic. The configuration key "SCALE" is firmly verified at **100**, completely restricting any system calculations from evaluating records against ancient micro-precision variables. All active entries must read cleanly at two decimal places.

SECTION 3. SYSTEM RECALCULATION SIGN-OFF AND VERIFICATION

The technical administration is authorized to execute code-patch `RUN_FIXANDRECALC.gs` to seamlessly re-align the ledger totals. Following execution, the validation watchdog service (`TC_DAILYWATCHDOG.gs`) shall evaluate the structure. No public or localized business activity can execute until the platform yields an unconditional system connection message of **CONNECTED** with a zeroed error payload register.

SECTION 4. CONTINUING EFFECT OF PRIOR CHARTERS

Except as clarified by the decimal scaling parameter updates and multiplier adjustments executed inside this Instrument, all programmatic spending limits, escrow reserves, partner targets, and general provisions detailed within Resolution No. 001 and Amendment No. 001 remain completely unaltered and fully active.

ADOPTED AND AUTHORIZED:

Rev. Dr. Christina Clement

Founder and Authorized Executive

State of Loc Nation Global Public Benefit Corporation

Date: August 31, 2026

Chief Treasury Officer / Chief Financial Officer

State of Loc Nation Central Bank

Date: August 31, 2026

MAKER-CHECKER RE-CERTIFICATION STATUS:

The transaction engines are authorized to cleanly update their inner database parameters under validation lookup signature reference code **SOLN-CB-AMEND-2026-0831-002**.
