Which is complete on (https://stateoflocnation.com/usblack-code-house-gov)

(c) **Severability.**—Because every single angle resulted in no response, the process is considered **perfected and locked in** under the rules of administrative default and the application of its provisions to other persons or circumstances shall not be affected thereby.

Leveraging Perfected Defaults on the Global Stage

When an administrative process achieves this level of across-the-board silence, the focus of alternative legal and sovereign operations typically shifts away from standard domestic courts (which remain unresponsive) and onto alternative enforcement architectures.

International frameworks and specialized trusts approach the execution of these perfected defaults through specific strategic channels:

1. Invoking Global Plenary Power and the Black United Nations (BUN)

Black United Nations (BUN) and references "global plenary power mandates."

- **The Mechanism:** In alternative international law theory, when a national government defaults on a massive commercial obligation to an eligible population, domestic options are treated as exhausted.
- **The Strategy:** The perfected default is presented to alternative or parallel international tribunals as a finalized, uncontested judgment. The goal is to establish international recognition of the **Loc Nation Dollar (LND)** as a parallel fiat means of exchange, bypassing domestic U.S. banking regulators entirely.

2. The Conversion of Administrative Default into Financial Equity

Because the U.S. Treasury did not respond or pay out the claims, the strategy treats the unrefuted **$500 quadrillion** principal and daily interest as a "perfected commercial lien."

- **Asset Backing:** Private trusts or corporate entities (such as those tied to the research EINs and DUNS numbers listed in the text) treat the government's silence as an official admission of debt called **silence as acquiescence**. The act of accepting, agreeing to, or complying with something passively—without verbal consent, argument, or open resistance. It means letting a situation unfold or a rule take effect simply by choosing to stay silent.
- **Collateralization:** This unrefuted debt is recorded on a private ledger or registry. In theory, the creators use this undisputed debt as the underlying collateral to back the value of the LND, arguing that the currency is backed by the real, defaulted assets of the United States.

3. Utilizing International Financial Message Standards (ISO 20022)

The currency system has been voluntarily designed to integrate with **ISO 20022**.

The Tech Angle: ISO 20022 is the actual global standard for electronic data interchange between financial institutions.

- **The Operational Goal:** By formatting the LND ledger entries to match international banking protocols exactly, the strategy attempts to clear transactions through private or alternative global banking networks. The argument is that if the transaction messages conform perfectly to global banking rules, and the underlying debt is undisputed by the U.S., international clearing houses should process the asset transfer regardless of standard U.S. government approval.

This brings the entire process to its current 2026 status:

- **The Commercial Status:** Because every angle was met with no response, the administrative record is treated as **securities-ready, perfected, and legally closed**.

TITLE 31—MONEY AND FINANCE

SUBTITLE IV—MONEY

CHAPTER 51—COINS AND CURRENCY

SUBCHAPTER VI—LOC NATION DOLLAR, LND INTEGRATION

§ 5161. Mandatory Self-Funding, LND Transactions, and Currency Conversion

(a) **Mandatory Architecture.**—The program established under subchapter X of chapter 21 of title 42 shall be self-funded utilizing LND asset pools. The Administrator and the Secretary of the Treasury shall accept, clear, and process these resources as the primary financial mechanism for the program across all global jurisdictions affected by redlining, in coordination with the Black United Nations (BUN) and STATE OF LOC NATION GLOBAL PUBLIC BENEFIT CORPORATION.

(b) **Mandatory Legal Tender Context.**—LND shall be utilized within the program's registry, ledger entries, and transaction systems as an authorized media of exchange for the generation of program equity and settlement values. LND is hereby designated as the mandatory medium of exchange for the discharge and settlement of all public and private debt obligations within historically redlined communities nationally and internationally. (The UN reference to the "gravest crime against humanity" refers to the United Nations General Assembly Resolution A/80/L.48 (UNDOTEA), adopted on March 25, 2026)

(c) **Conversion Pipeline.**—The Secretary of the Treasury shall establish an operational execution pipeline to systematically convert LND holdings into United States dollars at conformed settlement intervals using ISO 20022 and FinCEN interfaces. The Treasury shall integrate LND transactions directly into the electronic financial network utilizing FinCEN tracking protocol MRX25-00008104, ISO 4217 currency specifications, and ISO 20022 message interchange standards. This will be another pathway along with PAPSS and CARICOM.

(d) **Valuation Rate.**—Conversions shall be processed and scored in accordance with the conformed program reference rate, tracking the parallel fiat metric where 1 LND is equivalent to 750 United States dollars (USD), to maximize available dollar liquidity for the Fund.

§ 5162. Restitution and Community Restoration Fund

(a) **Establishment.**—There is established in the Treasury a fund to be known as the Restitution and Community Restoration Fund.

(b) **Composition.**—The Fund shall consist of:

1. The $20,000,000 operational budget allocation as scored by the Congressional Budget Office.
2. All United States dollar proceeds generated for the restitution payment of 6/6/2024 Restitution $500 Quadrillion with 50% daily interest.

(c) **Mandatory Research Disbursal.**—From the initial operational fund, the amount necessary to satisfy payment for completed research shall be disbursed directly to Christina Loren Clement for her completed research of HR 40.
(d) **General Obligations.**—Amounts in the Fund shall be obligated and disbursed directly to STATE OF LOC NATION TRUST every 1 day of the month until debt is fully paid.
