#### "Racism is so universal in this country, so widespread, and deep-seated, that it is invisible because it is so normal." Shirley Chisholm

#### Equal Justice: A Dream Deferred?

This report is a compilation of interviews and research on the issue of systemic racism<sup>1</sup> in the New York State Court system, how it is knowingly and unknowingly perpetuated, and how we can eradicate it. There will be uncomfortable, but necessary, truths. It is not meant as a condemnation of every employee or administrator or supervisor. Rather, it will reveal the extent to which systemic racism is invasive and like any other cancer, it must be removed in order to ensure a fair and just system for the community.

The Judicial Friends Association, Inc. (JF) was established in 1976 by a group of Black judges within the State of New York seeking the fair and just treatment of minority judges, judicial staff, and attorneys. We are the oldest organization committed to racial equality in the field of law for racial and language minorities in the State of New York. Currently, there are over 180 Black judges serving in New York State courts (*see* Appendix A, "New York State Unified Court System – Diversity on the Bench, 2015-2020").<sup>2</sup> We serve to educate and advocate on behalf of the judiciary, court staff, and attorneys on issues affecting the court system.

JF recognizes the efforts of the Office of Court Administration (OCA) to improve the administration of justice through the Equal Justice in the Courts Commission, led by Secretary Jeh Johnson, the Franklin Williams Commission and other court improvement initiatives. In response to the formation of Secretary Johnson's Commission and the tragic continued killings of unarmed Blacks and Latinos by police officers across the nation, JF formed a committee to prepare a comprehensive report delineating issues with proposed solutions on the matter of institutional racism in our courts. Former Police Officer Derek Chauvin had no problem kneeling on George Floyd's neck on May 25, 2020, as Mr. Floyd laid helpless and defenseless on the ground, gasping for air and begging for mercy as

<sup>&</sup>lt;sup>1</sup> There are different forms of racism. "Institutional racism" exists where assumptions about race are structured into the social and economic institutions in our society. It occurs when organizations, businesses, and institutions such as police departments, discriminate, either deliberately or indirectly, against certain types of people to limit their rights. This type of racism reflects the cultural assumptions of the dominant group. "Structural racism" refers to the accumulation over centuries of the effects of a racialized society (*Race Power and Policy: Dismantling Structural Racism at 15, Grassroots Police Project*).

<sup>&</sup>lt;sup>2</sup> Information contained in the Charts attached as Appendices D-G, I-K and M to this report were derived from diversity statistics provided by the Office of Court Administration ("OCA").

his life seeped out of his body. The killing of Mr. Floyd and the police shooting of Jacob Blake seven times in the back on August 23, 2020, both occurring during the midst of the COVID-19 pandemic that forced us to be still and confront the aggregate of practices and injustices that lead to the institutional racism pervasive in our court system.

# I. APPOINTMENT PROCESSES FOR JUDGES AND NON-JUDICIAL STAFF

JF supports the principle of an independent judiciary. We also support the New York State Court system where Justices are elected by the People of the state of New York from judicial districts statewide to preside over trials commenced within that district. We also support the Williams Commission's initiative aimed at developing a fair and equitable process for the appointment of justices and judges to the bench. However, we are compelled to address OCA's institutional bias, particularly in the selection of justices and judges that has a profound discriminatory effect on the racial and language minority residents and voters of the State of New York.

JF is greatly concerned that although OCA continues to proffer that it is dedicated to racial diversity, even the most cursory review of the court's selection plan for the appointment of justices and judges shows a deeply flawed system that disenfranchises Black people in our state. Historically, racial minorities have been underrepresented in judicial appointments, including the following categories, as shown below: Court of Claims, Acting Supreme Court Justices and New York City Family, Criminal and Housing Courts. This must end. Judicial racial diversity is essential to increase public confidence in the judiciary and the courts, provide decision-making power to formerly disenfranchised populations, and ensure equal justice for all. A racially diverse judiciary promotes an exchange of different ideas and points of view and reduces the effect of unintended racial, gender and institutional bias. Additionally, racial diversity in the judiciary promotes a more informed deliberative process amongst the decision-makers on the bench.

#### A. Judges

To assess the extent to which racism affects the New York State Unified Court System ("UCS"), one must start at the top and ask, "are Black judges participating in the most powerful, policy making positions within OCA?" The answer is a resounding NO.

The governing body of UCS is the Administrative Board of the Courts, which consists of the Chief Judge and the Presiding Justices of the four Appellate Divisions. There are **0** Blacks. Within OCA, the Executive Officers are the Chief Judge; the Chief Administrative Judge (who "oversees the day-to-day operation of the Statewide court system"); the Deputy Chief Administrative Judge for New York City Courts and the Deputy Chief Administrative Judge for the Courts Outside New York City (who are responsible for "overseeing the day-to-day operations of the trial-level courts" within and outside New York City, respectively). There are **0** Blacks. The sole Black Executive Officer is the Deputy Chief Administrative Judge for Justice Initiatives (who "leads the newly expanded Office for Justice Initiatives (OJI) which is tasked with ensuring meaningful access to justice for all New Yorkers..."). As to the three other statewide Judicial Officers, namely, Chief of Policy and Planning, Coordinating Judge for Matrimonial Cases and Statewide Coordinating Judge for Summary Jury Trials, there are **0** Blacks. The sole remaining statewide position is that of the Dean of the Judicial Institute, and it is held by a Black judge (see nycourts.gov [Court Administration]). Of the 2 Presiding Judges of the Appellate Term, 1, who was just appointed in August 2020, is Black.

The next level involving supervision is that of Administrative Judges ("AJs") who "are responsible for the on-site management of the trial court." Currently, of the **12** AJs within New York City, **3** are Black, the last of whom was just appointed in July 2020.<sup>3</sup> The Bronx and Brooklyn, two of the most populous counties of Black residents, have **0** Black AJs.<sup>4</sup> Out of the **10** AJs outside New York City, **2** are Black (*see* Appendix B, "New York State Unified Court System-Diversity on the Bench: Administrative Judges, 2015-2020"). "Supervising Judges are responsible for assisting Administrative Judges in the on-site management of the trial courts, including court caseloads and personnel and budget management... [and] manage a particular type of court within a county or judicial district." As of 2019, out of **60** Supervising Judges, **10** are Black<sup>5</sup> (*see* Appendix C, "New York State Unified Court System-Diversity on the Bench: Court System-Diversity on the Bench: Supervising Judges, 2015-2019"). Notably there are **0** Black Supervising Judges in either the Bronx or Brooklyn Criminal Court or Family Court.

<sup>&</sup>lt;sup>3</sup> The opening for this AJ's appointment had been pending for almost a year by the time of this new appointment, with the Deputy Chief Administrative Judge serving as the Interim Administrative Judge in that county.

<sup>&</sup>lt;sup>4</sup> The most recent 2019 census population estimates for Blacks are 43.6% in the Bronx and 33.8% in Brooklyn (Census.gov).

<sup>&</sup>lt;sup>5</sup> The Administrative Judge for NYC Criminal Court currently serves as Interim Supervising Judge in Richmond County.

On the trial level, it appears that Black judges fare much better when elected, at least in the City of New York. Currently, out of **134** New York State Justices elected in the city of New York, **38** or **28.4**% are Black (*see* Appendix D, "New York State Supreme Court Judges Elected in New York City"). Similarly, the number of Black elected Civil Court Judges in New York City is currently **31** out of **119** judges (**26.7**%), numbers that have been fairly consistent since 2015 (*see* Appendix E, "New York City Civil Court Judges-Elected from County-Wide and Districts"). Unfortunately, there is no good news with respect to elected Supreme Court Justices outside New York City. Thus, in 2020 there are **9** Black Justices out of **143** Supreme Court Justices (**6.3**%), representing an upward trend from a low of **6** out of **141** in 2015 (**4.3**%) (*see* Appendix F, "New York State Supreme Court Judges Elected Outside New York City").

The State Supreme Court Justices are augmented by Court of Claims Judges and Acting Supreme Court Justices. Currently, there are **6** Black Court of Claims Judges out of **81** (7.4%) appointed by the Governor. This too represents a pitiful high from a low of **4** Black judges out of **82** (4.9%) in 2015 (*see* Appendix G, "New York Court of Claims").

When the appointing authority is OCA, however, the story remains the same with respect to the lack of any real diversity. As to Acting Supreme Court Justices, currently only 24 out of 256 (9.4%) are Black; this number represents an increase from 19 out of 256 (7.5%) in 2019 and 27 out of 307 (8.8%) in 2015. (*see* Appendix H, "New York State Unified Court System – Diversity on the Bench: Acting Supreme Court Justices, 2015-2020"). The New York City Civil Court, Housing Part, commonly known as "Housing Court," handles over 250,000 cases a year. The Chief Administrative Judge of the State of New York makes the ultimate appointment of judges to the court from the recommendations of the Housing Court Council. Currently, only 10 out of 50 (20%) Housing Court Judges are Black, compared to 4 out of 50 in 2015 (8%) (*see* Appendix I, "New York City Housing Court Judges").

And equally unimpressive are the appointment numbers by the Mayor of the City of New York. Currently, a mere 12 out of 107 (11.4%) judges appointed to Criminal Court and 13 out of 55 (23.6%) New York City Family Court Judges are Black. In 2015, 13 out of 103 (12.6%) Criminal Court judges and 8 out of 54 (12.6%) Family Court judges were Black. Thus, the trend downward for Black Judges in Criminal Court in terms of both raw numbers and percentage persists even when the number of judicial slots are increasing. These overall numbers are disproportionately low in terms of either our share of the population, or as the people being served by the Criminal and Family Courts (*see* Appendices J and K, "New York City Criminal Court Judges-Appointed by the Mayor of the City of New York" and "New York City Family Court Judges-Appointed by the Mayor of the City of New York," respectively).

It should be noted further that most of the positions held by Blacks are in the southern-most tip of New York State, i.e., the five counties of New York City, Nassau, Westchester and the 9th District.

#### **B.** Non-Judicial Staff

OCA's Workforce Diversity figures fall within eight categories: Officials and Administrators, Professionals, Technicians, Protective Service, Administrative Support, Paraprofessionals, Service Maintenance and Skilled Craft. The category of **Officials and Administrators** covers a myriad of jobs including Agency Managers, Attorneys General, Chief Clerks and Deputies, Computer Support Professionals, Computer Systems Analysts, Court Attendants, Court Clerk Specialists, Court Reporters/Supervising Court Reporters, Lieutenants, Management Analysts, OCA and Executive Assistants and Senior/Principal Court Reporters (*see* Appendix L, "New York State Unified Court System – Workforce Diversity, 2015-2020"). A chart of the number of Blacks employed in non-judicial positions from 2015 to 2020 is attached as Appendix M (*see* Appendix M, "New York State Unified Court System – Workforce Diversity, Non-Judicial Black Employees-2015-2020").

As with the judiciary, the lack of diversity with respect to both management and concomitantly, salaries, tracks the same downward trajectory. On the other hand, positions which are on the lowest rung or pay the least, are upward bound. The Chief Judge and her administrators must ask, "when we have a meeting with our management staff and look around the table, how many of those seated around that table are Black?"

For instance, some of the most powerful positions with the highest Pay Grade of **560** fall within the job category of **OCA and Executive Assistants** (*see* Appendix N "New York State Unified Court System – Title Categories"). Currently, out of **61** such positions, a mere **6** are held by Blacks. In the Protective Services category, in the last six years, there have been **0** Black employees in these leadership roles. And of course, the day-to-day management of trial courts and appellate courts are handled by the Chief Clerk (in New York City); District Executives (outside New York City); and the Clerk of the Court, respectively. Currently, there are **0** Blacks employed as Clerk of the Court in the Court of Appeals, any of the Appellate Divisions or the Court of Claims. Indeed, Black employees hold very few positions as Chief Clerks, or Deputy Chief Clerks (**45** out of **485**).

Such positions are often linked to high-paying salaries. For instance, the Pay Grade level above **528** is typically associated with positions within the Appellate Division, the Appellate Term, the Court of Appeals and the Court of Claims, where **38** out of **217** were Black. The positions which held the highest Pay Grade of **560** only had **6** out of **34** Black Clerks. As for other Chief Clerks and Deputy Chief Clerks receiving a Pay Grade level between **518 to 526**, only **7** of **268** were Black (*see* Appendix O, "New York State Unified Court System – Workforce Diversity, Chief Clks & Dep-July 2020").

Over the last five years, the number of Blacks working as Officials and Administrators has proportionately decreased even as the number of jobs have increased, from a high of **64** out of **692** in 2015 to its current **67** out of **766**.

On the other hand, the highest percentage of Blacks are employed as Data Entry Clerks, currently **63** out of **108**, representing **60%** of all employees in that category. The Pay Grade is **510**. Also, **66%** of Printing Machine Operators are Black. Court Analysts, which fall within **Paraprofessionals**, represent another high proportion of Black employees within the New York State UCS (**12** out of **37**), at a lower Pay Grade of **512**. Currently, the rate of Black Court Analysts experienced an increase from **28.6%** in 2015 (**14** of **50**) to **35.3%**, in 2020 (*see* Appendix L).

Service Maintenance positions range from Custodial Workers and Building Superintendents with a Pay Grade ranging from **509** to **531**; Management Analysts at **531**, Nursery Attendants at **510** and Uncategorized Titles at **514**. From 2017 through 2020, **0** Blacks held any Service Maintenance positions. In 2015 to 2016, only **1** Black person out of **20** (**5.0%**) and **19** (**5.3%**), respectively, held a Service Maintenance position. Both positions held by Blacks were as Nursery Attendants (*see* Appendix L).

## Recommendations:

- 1. It is imperative that the court system identifies the underlying reasons for the low rate of diversity with respect to judicial and non-judicial supervisory positions, as well as for non-judicial positions with higher Pay Grades;
- 2. OCA must take affirmative steps to train Black employees to hold such positions with a transparent grooming process;
- 3. post openings and encourage candidates of color to apply for such positions;
- 4. have a transparent hiring and selection process; and
- 5. provide institutional support once these employees obtain such positions.

# II. JUDICIAL ASSIGNMENT OF CASES AND PARTS

This portion of the report addresses the manner in which cases and parts are assigned to judges within the New York State court system, the importance and impact of such assignments on a judge's career and on the public's perception of the court system, and how to accomplish uniformity in these assignments.

<u>Issue</u>: There is a lack of diversity amongst Administrative and Supervisory Judges who make decisions regarding case assignment and part assignment, which detrimentally impacts the careers of judges of color and the public's confidence in the court system.

JF surveyed the sixty (60) current<sup>6</sup> Supervising and Administrative Judges as to the policies, procedures, and practices governing case assignment and part assignment in their respective courts. We received twenty-three (23) survey responses. Some Administrative Judges responded for their entire Judicial District, while some Supervising Judges responded specifically as to practices in their individual courts.

The overwhelming response was that decisions as to case and part assignment rest with the Administrative Judge. Most, if not all, survey respondents indicated that the policies were not in writing. As to case assignment, respondents indicated that a random assignment system was utilized and overseen completely, or to a large degree, by the Chief Clerk's Office. Finally, with respect to specialty part assignments, survey respondents indicated that such assignments rest in the discretion of the Administrative Judge.

<sup>&</sup>lt;sup>6</sup> As of June 30, 2020.

Some Administrative Judges expressed that they solicit interest from judges in their court and further, articulated that decisions are made after some process, taking into account an interested judge's experience, interest, and expertise. However, not all Administrative Judges reported utilizing a systematic approach either as to utilizing one process for all openings, or as to utilizing a systematic or uniform approach from a neutral source, such as a stated guideline from OCA. Nearly all respondents indicated that all judges know that they are welcome to request specific assignments, state interest and that they have an open-door policy.

The information received from some of the current Administrative Judges seems to indicate that there are various processes in place that are working well with no problems, so there should be no complaints. There were others, both past and present, who believe to the contrary.

JF also interviewed eleven experienced Administrative or Supervisory Judges by telephone to ascertain whether the stated random case assignment and part assignment policies were considered effective and free from bias, implicit or explicit. The interviews were semi-structured. Each participant was asked the same set of questions although other subjects were discussed during the interview. To encourage participants to speak candidly, interviewers guaranteed each person's anonymity. Consequently, this summary makes no reference to the source of the comments. It serves as an overall look into the perception of the court system by these judges.

#### A. Authority of Administrative and Supervising Judges

After review and investigation of the processes and protocols concerning part and case assignment, it is apparent that the power and control over which parts, and ultimately, which cases each judge is assigned rests with the Administrative Judge. The position of Administrative Judge within the court system is powerful and, in many instances, lacks transparency and internal controls. The duties of an Administrative Judge are akin to that of a Chief Executive Officer for a particular county. They handle banking, construction and renovation of courthouses, case management, hiring and promotion. Most importantly, an Administrative Judge has wide discretion as the final decisionmaker. Thus, the lack of Black Administrative Judges negatively impacts the careers of Black judges and the court system as a whole.

Supervising Judges are given great discretion in assigning judges to the parts in lower courts and Administrative Judges likewise in Supreme Court.

Thus, there is a potential issue regarding the use of "wheels" and assignments and the lack of transparency in this process. An issue such as if the Administrative Judge favors others, is biased, or if s/he or they dislike a judge, will improperly affect case and part assignment.

Additional issues of concern arise where Supervising Judges and Administrative Judges have close relations and connections to bar associations. Certain bar associations are very powerful to the extent that they have been vocal when they are displeased with a judge. In some instances, Administrative Judges have acted at the behest of bar associations on an improper basis, unfairly impacting a judge's assignment and resulting in that judge's reassignment.

#### **B.** Specialty Parts

There are some parts that are deemed "specialty" parts. These include the Commercial Division, Matrimonial, Mortgage Foreclosure, City of New York cases, Drug Treatment and Youth Parts. Some of these assignments, like the Commercial Division, are coveted by judges who wish to advance in their judicial careers. These assignments are supposedly given to judges who have seniority and the most experience in a particular area, however, many assignments appear to be made due to the influence of politicians, big law firms or Bar Association sections, or because a particular judge is favored by their Administrative Judge.

In comparison to their white colleagues, Black judges frequently are assigned for extended periods to parts that do not allow for upward mobility. For example, assignments to Article 81 (Guardianship), Mental Hygiene, Community Court and Drug Treatment Courts are not ones that judges desire for an extended period of time if they have ambitions to advance in the judicial system. These parts normally do not afford the opportunity to preside over jury trials, or to write decisions on complex, varied legal issues. As such, these assignments do not normally lead to the more coveted assignments.

The Commercial Division is considered the crown jewel of the court, yet it is rare that Black judges are assigned there or even given an opportunity to apply for the part. This problem is particularly acute in New York County where only one Black judge has been assigned to the part for many years. Notably, several judges serving in the Appellate Division, First Department were previously assigned to the Commercial Division in New York County Supreme Court. There appears to be no written guidelines as to the eligibility requirements for a position in the part nor the posting of any notice of vacancies therein. The lack of transparency is still pervasive in this area.

#### **C.** Assignment of Cases

Similarly, there is a lack of transparency about the assignment of major cases which significantly impacts substantial legal issues. They are rarely assigned to Black judges. This is not just devastating to career goals but to the community, as judges of color have less of an ability to help shape the law, have important decisions published and receive publicity for presiding over important cases. Such publicity for judges of color encourages public confidence and pride in the judiciary, as a diverse bench reflects a diverse community. For example, one interviewee who served in many different areas in the court system, including positions in court administration, served as a trial judge in a court with an Administrative Judge of color. The interviewee observed that the judge made sure assignments were made with fairness and judges of color were given an equal opportunity to advance. As such, in this area, diversity truly matters.

The clerk exercises considerable discretion to determine which trialready cases are referred to individual trial judges. Certain judges appear to be able to select their own cases from the inventory of trial-ready cases. Historically, major prosecutions and notable press matters were never assigned to Black judges. Though a rotation or wheel assignment was purportedly utilized, these matters were "held" until a white judge became available for assignment. After concerns were raised, "expediters" were created. The expediter physically traversed the courthouse to ascertain who was available for trial so that a fairer and more equitable assignment took place. As the criteria for assigning high profile, complex or sensitive cases was unclear, the policy was changed to assign specialized assignments based on experience. However, some administrative judges bypass the random assignment system and assign "highly politicized" or "novel cases" to their own dockets.

In lower court, the ability to influence case assignment is lessened as most often a circuit system is utilized where judges rotate through various set parts, including trial assignment. Some, however, are based on seniority, experience in a specialized area and other factors. Though assignments may not be exactly identical, on an annual basis, most judges have the opportunity to sit in all parts equitably, unless they are assigned to specialty parts. Furthermore, nearly all judges there seek a trajectory which would propel them to a superior court. Thus, everyone is seeking greater jury trial experience. Trial ready cases are assigned to a cadre of judges selected based on their seniority and experience. In Criminal Court, cases are assigned to specific Parts at arraignment.

Previously, there generally were no written rules regarding the assignment of civil cases. Cases, excluding specialty cases, are typically assigned by a computer system to available judges for pre-trial matters.

#### **D.** Lack of Diversity in Positions of Authority

As set forth in Part I, *supra*, there is little diversity in any of the major supervisory administrative judicial positions within the court system, including at OCA, the Court of Appeals, the Appellate Divisions, the Appellate Terms or the Court of Claims (*see* 2 - 3, *infra*). Recently, a Black Justice who sat on the Appellate Term for a significant period of time (27 years) was overlooked and a white male was appointed as Presiding Judge. The appointed individual had served on that bench for a significantly shorter time period than the Black Justice.

Since the retirement of the former Deputy Chief Administrative Judge, there are no Black judges holding positions with substantive decision-making power, such as Chief Judge, Chief Administrative Judge, or Deputy Chief Administrative Judge, within OCA handling functions of Court Operations. This is of particular concern because judges holding these positions determine which judges are assigned to particular counties; specialized parts; appointments of management staff and other key personnel positions; as well as fiduciary appointments. Of note, the last time there was a Black Chief Clerk appointed/promoted was during the tenure of a Black Administrative Judge. Equally noteworthy, there have been no substantive promotions of Black employees in the county where there was a Black Administrative Judge since that person's tenure ended.

Additionally, many non-judicial supervisory and high paying positions also lack diversity (*see* 5-6 *infra*). Upon the retirement of management personnel who are not people of color, there exists significant resistance to having people of color hired or promoted to foster any kind of diversity in upper court management.

There also have been complaints that in some instances of promotion of non-judicial staff, credentials of successful applicants were less stellar than those of unsuccessful applicants of color. This was true particularly where the person promoted had some connection to those conducting the interview.

#### E. Assignment of Judges

The Administrative Judge assigns judges to the various parts. Typically, this judge announces when there are vacancies and makes selections from among the judges who volunteered. Also, some Administrative Judges conduct individual interviews annually with judges to see if they are satisfied with their current assignments. If a judge wishes to change assignment, s/he or they may be reassigned based on their expertise, experience and the needs of the court.

In the past, Supervising Judges were selected without notice to the bench that such positions were open. Due to complaints and concerns voiced by local bar associations and individual attorneys that a jurist was selected for an opening without notice to the bench or the bar, the selected jurist was removed from the position. Thereafter, notice of the vacancy was provided to the bench and interviews were held. Ultimately, a different Supervising Judge was selected.

It was noted that certain counties in New York City appear to operate as dumping grounds for undesirable judges. If a Supervising or Administrative Judge has a conflict with a judge in their court, whether justified or not, that judge would be transferred to one of these counties. Often it is a county with a larger number of minority judges.

We believe, as we have previously publicly stated, that the Chief Judge's proposed court consolidation plan will result in OCA being able to dictate the county and part to which a judge is assigned without the judge's consent and without regard to the electoral choice of the community from where the judge was elected. For these reasons and many others, as JF noted in a previous report and testimony, this plan will not improve the flaws within the court system and it will have a detrimental impact on judicial diversity.

#### F. Lack of Transparency

There are no written rules regarding assignment of cases. The Administrative Judge, sometimes with the input from higher-level administrative judges, assigns complex cases to a pool of specially designated judges. The claimed considerations for such designations include: 1) whether the judge has special expertise in the assigned cases by type, such as homicides; 2) whether the judge had a reputation for giving both sides a full and fair hearing; and 3) whether the judge could efficiently and effectively manage the case process and the courtroom. In addition, on some sensitive cases, the assignments were made with a goal of mitigating or downplaying any perceived political biases. In some instances, the District Attorney's Office appeared to have undue influence over which judges are assigned to complex cases.

Chambers assignments are another issue where inequity abounds. While seniority is the purported basis for such assignments, same is not borne out upon scrutiny. This bias within the court system toward Black judges is not only unacceptable, it feeds the public perception of race-based bias for persons "outside" the court system, including Black attorneys and Black litigants.

#### **G.** Conclusion

Issues of race exist, nonetheless, where there is a lack of support for some Supervising Judges from the Administrative Judge, particularly as it pertains to challenges to leadership by non-judicial staff. There have been complaints that Deputy Administrative Judges and Supervising Judges are often undermined or not considered by their supervisors when vacancies occur in top-level roles within their courts. There is an unwillingness to show outward support of Supervising Judges when policy or personnel changes are made and then challenged by unionrepresented employees. Thus, a Supervising Judge is limited in his, her or their impact to make change, foster equity and fairness, and/or advance diversity.

However, as shown by the information provided by our interviews, the specter of racism and bias continues in our court system and belies the impression given by the survey results that an arms-length case or part assignment process is in place, free from racial bias, cronyism, or favoritism. However, racist outcomes do not require racist actors.<sup>7</sup> Black judges report a variety of experiences, which differ from their non-Black judicial colleagues. In addition, specific instances of biased treatment resulting from the unfettered discretion of Administrative Judges, maintains a system where such racist acts continue to thrive. Moreover, the dearth

<sup>&</sup>lt;sup>7</sup> Further, focusing on individual instances of racism can have the effect of diverting our attention from the structural changes that are required to achieve racial justice (*Race Power and Policy: Dismantling Structural Racism, citing Racial Profiling in Canada: Challenging the Myth of "A Few Bad Apples," eds. Carol Tator and Frances Henry 2006*).

of Black Administrative Judges and Black Supervising Judges in the hierarchy of the court system perpetuates the continuation of institutional policies and procedures, which inure to the detriment of Black judges, Black non-judicial personnel, Black attorneys, and Black litigants. Additionally, it results in mistrust of the judicial system and renders all the hard work of those who seek fairness and justice, potentially meaningless.

#### Recommendations:

## A. Recommendations By Interviewees

1. Utilize job postings;

2. Institute a hiring system more akin to what is used for judicial selection where interviews are conducted by a series of stages conducted by diverse interviewers. The first stage may involve a screening committee which reviews the candidates' application, resume, decisions and references. The second stage may include a smaller committee to conduct the first round of interviews to narrow the pool of applicants. The final round of interviews would ultimately determine the person hired for the promotion. This system would ensure transparency in the interview process and provide equally talented individuals the equal opportunity to advance. After the candidate is selected, the unsuccessful applicants should be provided with feedback regarding the basis for their non-selection to ensure that individuals can make necessary adjustments for future consideration of other leadership positions or assignments;

3. When people of color are promoted to positions of authority, they must be provided the power and authority to excel in the position, and not merely be given the title with reduced authority as a pretext in order to improve diversity statistics; and

4. OCA should conduct an anonymous survey of Black judges to elicit true impressions and reports of the experiences of Black jurists. Such a survey would shed light on racial issues affecting judges of color and solicit ways to diminish and eradicate institutional racism within the court system.

#### B. Overall Recommendations

1. Each court should have a written plan or system for assigning cases, including those designated by subject matter. Courts should use some variation of a random drawing to assure the equitable distribution of caseloads and ensure the highest degree of impartiality;

2. Judges having special expertise should be assigned to cases, such as complex criminal and civil cases, that require exceptional judicial management. Specialized assignments should be made with special care taken to widen the candidate pool and ensure that the decision-making process is free from bias;

3. Administrative Judges should be prohibited from routinely assigning high profile cases to their own dockets. Not only does this misapprehend the role of the Administrative Judge, but also undermines fairness and promotes judge shopping;

4. The Administrative or Supervising Judge should be responsible for enforcing case assignment protocols in his or her court, even when such protocols are primarily executed by the Chief Clerk's office;

5. To ensure that everyone has equal access to career-enhancing work, training opportunities should be created for less experienced judges with the specific goal of preparing them to preside over complex cases; and 6. A periodic diversity audit should be conducted at all levels of the UCS to determine whether the Court's hiring, retention and promotion practices are aligned with the Court's stated diversity goals.

#### **III. COURT OFFICERS AND TREATMENT OF COURT USERS**

#### A. Selection and Training of Court Officers

Issue: There is insufficient bias training for court officers.

Interviews with present and former Black court officers, including those intimately familiar with the New York State Court Officers Academy (Academy), reveal that while there is an extensive training program upon entering the Academy, there is but one block or class devoted to implicit and explicit bias. This class is taught by a staff instructor instead of an expert in the field. Academy trainees receive courses on suicide awareness, "verbal judo," which seeks to generate voluntary compliance, Emotionally Disturbed Persons, human trafficking, domestic violence and scenario-based training which present opportunities to discuss empathy for those who are different, however, none of them specifically addresses racial issues. All agree that there is no real post-academy training on racial bias. However, officers have an opportunity to voluntarily view videos on various subjects at their various commands as "things slow down and time permits."

#### Recommendations:

- 1. Retain an expert on implicit and explicit bias to develop curriculum and methodology for effective academy and live post-academy training to facilitate robust discussions;
- 2. Create a procedure to utilize metrics to measure bias incidents; and
- 3. As in any paramilitary organization, it is important that those in supervisory positions from the very top down, consistently and publicly confirm to officers the importance of racial diversity and the promise of swift disciplinary action should an officer engage in racist behavior.

# B. The New York State Court Officers Association

<u>Issue</u>: The leadership of the New York State Court Officers Association (NYSCOA) has created and facilitated a racially-charged environment and adversarial relationship with court personnel of color.

Over the years, the leadership of NYSCOA has been accused of making racist and inflammatory remarks, thus belittling and isolating people of color. The leadership has been particularly disrespectful to Black female judges by allegedly repeatedly using derogatory and profane language when referring to them, such as calling them "monkeys." The leadership has also used the internet and social media platforms to make disrespectful and racist comments, including referring to potential defendants as "animals," while several officers "liked" or commented in agreement with that person's posts. As recently demonstrated by a Sergeant who posted a meme of the lynching of President Obama, the internet serves as the perfect podium for spewing racist comments. To be sure, if the leadership favors an officer, then it will fully support that officer and it has gained favor with many officers, including some Black officers. However, as recently demonstrated by the complaint filed against the leadership by three Black officers from Brooklyn Criminal Court on behalf of 42 others, which describes "a safe haven for racist speech and actions," that support certainly is not universal. There is a myriad of anecdotes which illustrate the adversarial nature of the relationship between the NYSCOA and court personnel of color. For instance, in 2016, a Black male judge, with less than two years of experience on the bench arraigned a defendant accused of murdering a New York City Police Officer. The leadership pressured the courtroom staff to allow the family of the deceased and police officers, who were not assigned to the courthouse command, to congregate inside the well during the arraignment, thereby crowding the defendant and creating, not only a security issue for all concerned, but an inappropriate, intimidating environment in the courtroom.

#### Recommendations:

- 1. Although OCA does not have authority to remove an elected union official from power, it is still responsible for monitoring and disciplining the actions of its employees, including any union leadership. Any employee of the court system who makes racist, demeaning comments about people of color, including judges, defendants and others, should be reprimanded and disciplined. NYSCOA represents hundreds of Black court officers and OCA should do its part to ensure that it is a supportive, welcoming organization for all of its members; and
- 2. Court officers should be reminded that, in addition to filing complaints with the NYSCOA, they can file complaints with their command and then with the Inspector General's office.

#### C. Little Diversity Amongst Court Officers

<u>Issue</u>: There is a lack of diversity within the supervisory positions in the Department of Public Safety.

The Department of Public Safety includes court officers and their supervisors. A review of statistics provided by OCA for the years 2015 through 2020, reveals that in 2020 there are **0** Blacks in the ranks of OCA and Executive Assistants<sup>8</sup>; only **9** out of **102** Captains/Majors<sup>9</sup>; **21** out of **144** Lieutenants<sup>10</sup>; and

<sup>&</sup>lt;sup>8</sup> These positions are NYS Chief of Court Security Training, NYS Court Security Liaison and NYS Security Coordinator, respectively, and there have been no Blacks from 2015 to 2020.

<sup>&</sup>lt;sup>9</sup> There has been a steady decline in these numbers even as the overall number of Captain/Major positions has increased to its highest number over the period from 2015 to 2020. Thus, there were only 8/94, 9/96, 10/100, 11/98 and 10 /99 such positions held by Blacks for the years 2015 to 2019, respectively.

<sup>&</sup>lt;sup>10</sup> There were 16/156, 18/155, 19/146, 18/150 and 18/152 Black Lieutenants, from 2015 to 2019, respectively.

**46** out of **427** Sergeants<sup>11</sup>. In addition, there are **594** out of **3341** Court Officers/Supreme Court Officers<sup>12</sup> (*see* Appendix L).

After a candidate takes the Sergeant test, even with a high score, if the command within which he or she is currently placed does not invite the candidate to interview for a position in that building, that candidate is forced to transfer to another command in another county to get promoted to Sergeant. For example, there are complaints that Black female candidates in Brooklyn were not invited to interview for a Sergeant's position in their command, so they were forced to go to another command to be promoted to Sergeant. However, shortly after their departure, the lines were opened in their previous Brooklyn command and white candidates were appointed to those positions.

For promotions above the level of Sergeant, interviews are usually conducted by the Commanding Officer, the Chief or Deputy Chief Clerk and possibly the Administrative or Supervising Judge. Therefore, it is imperative that these positions be held by diverse individuals to increase diversity in all supervisory positions within the courts.

#### Recommendations:

- 1. Create a Chief of Diversity and Inclusion position within the Department of Public Safety;<sup>13</sup>
- 2. Develop targeted recruitment of Black applicants at CUNY, SUNY and Historically Black Colleges and Universities (HBCUs) nationwide, including at job fairs;
- 3. Utilize current minority officers as part of the recruitment process;
- 4. Develop mentoring and leadership programs, including maintaining contact with potential candidates during the recruitment and hiring processes;
- 5. Provide opportunities for rotation into specialized units or on short-term specialized detail assignments;

<sup>&</sup>lt;sup>11</sup> There were 35/406; 36/407; 41/421; 42/420; and 42/410 Black Sergeants from 2015 to 2019, respectively.

<sup>&</sup>lt;sup>12</sup> There were 598/3139, 615/3192; 587/3103; 551/3035; and 579/3284 Black Court Officers/Supreme Court Officers from 2015 to 2019.

<sup>&</sup>lt;sup>13</sup> Some of the recommendations track that utilized by the New York City Fire Department following the resolution of the lawsuit filed by Black firefighters against the Department *see* "FDNY Strategic Plan, 2015-2017" at 24-28.

- 6. Develop objective metrics and program criteria to evaluate the outcome of recruitment and promotion to leadership positions;
- 7. Officers who are privy to racist private posts by another officer should be encouraged to reveal them anonymously, such that they are not subject to retaliation by their fellow officers or union leadership;
- 8. When racist and other misogynous posts are revealed, there should be swift, punitive and public action from the top; and
- 9. Judges should be told when they are the subject of racist attacks, particularly where OCA settles a legal action or imposes punishment.

#### **D.** Court Officers' Treatment of Court Users

1. <u>Issue 1</u>: Court Officers' treatment of litigants needs improvement.

There are cultural problems pervasive in criminal term, both at the Criminal Court and Supreme Court levels, which facilitate disrespectful, dehumanizing attitudes, such as when officers, including supervisors, refer to defendants as "Bodies." Additionally, some officers appear to be more responsive to inquiries from white defendants who approach the well. But, these same officers often yell at Black defendants for approaching the well or ignore them for a greater period of time, even though the officers may not be busy. In addition, when dealing with young people, or friends and family members of a decedent who appear in court at the same time as supporters of the accused, tensions and security risks may result. The officers must be more sensitive to the needs of both sides and work harder to deescalate such tensions.

There have been complaints that in Family Court, the officers seem to presume that all litigants are unemployed and on public assistance, so they do not value their time. As such, the officers often yell at Black parents who have waited for hours for their cases to be called and the officers fail to provide them with sufficient information.

Additionally, there was a complaint that officers treat minority summer high school, college and law school interns differently than white interns. In one instance, interns were seated in the courtroom observing a trial and the officers told the interns of color to put away their phones and to either stop whispering or leave the courtroom, however, they said nothing to the white interns who were engaged in the same behavior.

#### Recommendations:

- 1. During the Applicant Verification Unit process to become a Court Officer, OCA should utilize the assistance of bias experts to develop pointed questions to ascertain the nature of an applicant's empathy and bias as a prerequisite for acceptance to the Academy class. Then, such training must be emphasized at the Academy and throughout the year;
- 2. Commencing with the Academy, officers must be continuously taught and reminded not to refer to defendants as "Bodies" or "Skels," since such terms degrade and dehumanize individuals. Supervisors at the highest levels must not use such terms and they must publicly advise others that such characterization will not be tolerated. Those who persist in using such derogatory terms, despite being directed not to do so, must be punished. Additionally, care should be taken not to pair new officers with experienced officers who are known to use such terms;
- 3. While there are portions of the Academy curriculum devoted to empathy, there must be more emphasis on de-escalating situations involving young people, perhaps with expert advice from psychologists;
- 4. Judges must establish a professional and courteous atmosphere in the courtroom and inform officers of the judge's expectations with respect to the treatment of litigants; and
- 5. There should be a box where litigants can confidentially place any complaints about their treatment which should result in a follow-up investigation.

2. <u>Issue 2</u>: Court Officers' treatment of Black attorneys needs improvement.

The first row in a courtroom is reserved for attorneys, police officers and the press. Unfortunately, it has served as a conduit for both express and implicit bias by court officers, judges, clerks, prosecutors and opposing counsel. There were many instances reported where court officers, prosecutors, judges and others wrongfully assumed that Black attorneys sitting in the first row, or who approached the well, were not attorneys. They assumed they were defendants or

family members of the accused, even when such attorneys were dressed in business attire.

For example, there were several complaints about officers telling Black attorneys who were sitting in the front row to move to other rows to await their attorneys' arrival or they told the ones who approached the well not to do so. When one attorney complained to his supervisor, who then intervened, the officer retaliated by calling that attorney's cases last. In another instance, an officer blocked a Black woman attorney from entering the well and told her that if she wished to pay the bail for her boyfriend she should go to the bail window in the hallway. In Family Court, an officer told a Black woman attorney to wait outside the courtroom so he could take her name, presumably to verify her status. This attorney had never been stopped when she was accompanied by her white supervisor or colleagues. A prosecutor told a Black woman attorney "I can't speak to you. Wait until your attorney comes." Another attorney told his Black female co-counsel, "don't talk to me. Talk to your lawyer." Finally, as a Black male attorney attempted to visit his client in the pens, an officer repeatedly asked him if he could read and blocked him from walking until he answered. Apparently, the attorney had missed the sign prescribing the manner in which to enter the pens. White attorneys rarely, if ever, are forced to suffer such indignities.

#### Recommendations:

- 1. Just as they do with a well-dressed white person, court officers, judges, other court personnel, prosecutors and co-counsel should assume that a Black person dressed in business attire sitting in the front row or approaching the well is most likely an attorney and all attorneys of color deserve the same respect as white attorneys;
- 2. In Family Court, officers must not assume that Black attorneys are parents or case workers. This training should start in the Academy and continue in additional bias training; and
- 3. Judges should be reminded of these issues during regular bias training and they should address an officer who engages in inappropriate questioning of Black attorneys.

#### IV. HOW IMPLICIT BIAS IMPACTS THE CRIMINAL JUSTICE SYSTEM

It is often said that there is no such thing as equality in the criminal justice system, it's too complex for that. The search for racial influences in legal and

criminal justice outcomes has been a major undertaking in law and criminology.<sup>14</sup> Whether the Criminal justice system discriminates based on race is a pressing policy and theoretical issue intersecting larger political concerns of American society, because the symbolism of equality before the law is at the heart of our legal system. Implicit bias, however, can be found in all sectors of the enforcement and administration of law and it threatens the value we place on equity in the system.<sup>15</sup>

This portion of this report examines how implicit bias impacts racial disparities in arrests and sentencings between black and white defendants, and some of the reasons behind the disproportionate representation of Blacks in the criminal justice system relative to their representation in the general population. It also addresses the awareness that the court system does not have control over the entire system. However, it has significant control and an obligation to ensure that justice is done.

#### A. Analysis

While most studies have focused almost exclusively on sentencing disparities between Black and white defendants, there has been very little consideration for how other racial/ethnic minority groups impact this analysis. One must consider the growing number of Latinos who are now changing the ethnic landscape of American society.<sup>16</sup> The lack of attention historically given to the treatment of Latino defendants in American courts has been a huge omission, however, this report will concentrate on the criminal justice issues related to Black and white defendants.

Disproportionate racial representation within the criminal justice system has been debated for years. Researchers debating this issue have considered the relative weight of two primary explanations: one, which is referred to as the "disparate impact", and the other which is referred to as "differential treatment." The disparate impact explanation suggests that relative to the racial/ethnic composition of the population, larger portions of Blacks are selected into the criminal justice system because they either offend at higher rates and/or because they are disproportionately susceptible to the sanctions of facially neutral laws and

<sup>&</sup>lt;sup>14</sup> Hagen 1987; Sampson and Lauritsen 1997.

<sup>&</sup>lt;sup>15</sup> American Sociological Review, 2000, Vol.65 (October: 705-729).

<sup>&</sup>lt;sup>16</sup> Portes and Rumbaut, 1996.

practices.<sup>17</sup> The differential treatment explanation suggests that racial disparities arise from overt or implicit discriminatory treatment of Blacks by law enforcers such as police, prosecutors and judges.<sup>18</sup>

Differences in sentencing outcomes, however, may be the result of variables that are put in place before a defendant is sentenced, since there are multiple points along the criminal justice continuum where discretion in decision-making may be influenced by a myriad of factors and where implicit bias may reside. Critical decision points include investigation, arrest, charging, pre-trial, trial and sentencing.

At each of these decision points, some official or group of officials exercise some measure of discretion that may decide the fate of an individual. Investigators may investigate or decline to investigate an individual, arresting officers may arrest or decline to arrest, prosecutors may opt for either a harsh or lenient charge, judges may or may not show favor to an accused person at trial, or impose a harsh or lenient sentence on that person once convicted.

Recent research employing detailed data sets has found continued evidence that Blacks are treated more punitively than whites, notwithstanding, differences in criminal offending, or facially neutral legal or policy factors that might disproportionately affect minorities.<sup>19</sup> Blacks are more likely to be stopped by the police for legally invalid reasons.<sup>20</sup> Beckett and Pfingst<sup>21</sup> (2006), found that police target racially diverse drug markets (rather than white drug markets) because of implicit biases about the racial makeup of drug traffickers. After arrest and before trial, other research found that Blacks are more likely to be denied bail and detained in urban state courts and county jails across the United States.<sup>22</sup> Several other studies have found evidence of differential treatment of prosecutors' decisions to reject arrest charges.<sup>23</sup>

<sup>&</sup>lt;sup>17</sup> Tonry, Michael, and Matthew Melewski. 2008. The malign effects of drug and crime control policies on Black Americans. *Crime and Justice* 37:1-44.

<sup>&</sup>lt;sup>18</sup> Beckett, Katherine, Kris Nyrop, and Lori Pfingst. 2006. Race, drugs and policing: Understanding disparities in drug delivery arrests. Criminology 44:105 – 37.

<sup>&</sup>lt;sup>19</sup> Spohn, Cassias C., 2013. Racial Disparities in prosecution, sentencing and punishment. In the Oxford Handbook of Ethnicity, Crime and Immigration, eds. Sandra M. Bucerius and Michael Tonry. New York: Oxford Press.

<sup>&</sup>lt;sup>20</sup> Tonry and Melewski (2008:6).

<sup>&</sup>lt;sup>21</sup> Beckett, Nyrop and Pfingst (2006).

 <sup>&</sup>lt;sup>22</sup> Schlesinger, Traci. 2005 Racial and Ethnic in pretrial criminal processing. Justice Quarterly 22:170-92.
 <sup>23</sup> Spohn, Cassia C., John Gruhl, and Susan Welch. The Impact of the ethnicity and gender of defendants on the decision to reject or dismiss felony charges. *Criminology*.

Consequently, there are key points along the continuum where law enforcement may exercise their discretion in a biased manner. Punishment, which is considered the hallmark barometer of fairness, may not be the only point in which inequalities may occur. Generally, anywhere official discretion is available, there is a threat to equal treatment.

We see that policing nationwide has devised many strategies to deal with inner-city crime. Habitual offender and three strikes laws, hot-spot policing, zero tolerance and broken window laws affect communities of color that are disproportionately impacted by extreme poverty.<sup>24</sup>

Population over age 16		36%
Summonses 14%		
Misdemeanor arrests 13%

#### NEW YORK STATE 2018 ARRESTS AND SENTENCES BY RACE/ETHNICITY

Arrests

Felonv Arrests

**Prison Sentences** 

One must also consider the other, and possibly the most significant discretionary point along the continuum -- the prosecutor. It has been said that "the prosecutor has more control over life, liberty and reputation than any other person in America,"<sup>25</sup> "because the prosecutor has the responsibility for deciding whether to bring charges and if so, what charges to bring against the accused, as well as deciding whether to prosecute or dismiss charges or to take other appropriate actions in the interests of justice...the character, quality, and efficiency of the whole system is shaped in great measure by the manner in which the prosecutor exercises his or her broad discretionary powers."<sup>26</sup>

A District Attorney cannot treat the office as his selfish affair. It is a public trust. The office is not private property, but it is to be held and administered wholly in the interests of the people at large and with an eye single to their welfare.<sup>27</sup>

But, as the United States Supreme Court noted in the case of *McCleskey v Kemp*, "the power to be lenient, [also] is the power to discriminate."<sup>28</sup>

Population

<sup>&</sup>lt;sup>25</sup> An inscription on the walls of the Department of Justice; *see Brady v. Maryland*, 373 U.S. 83, 87 (1963).

<sup>&</sup>lt;sup>27</sup> Atty Gen. v. Tufts, 132 N.E. 322, 326 (Mass. 1921).

<sup>&</sup>lt;sup>28</sup> McCleskey v. Kemp, U.S. 279, 312 (1987).

#### **B.** Recommendations

The discussion of implicit racial discrimination in the criminal justice system is far from over. The difficulty in resolution lies mostly within the power of those who have the power to make discretionary decisions throughout the prosecutorial continuum. The belief is that acts of discrimination do occur on a wide basis and may be the result of longstanding social, political, cultural and personal feelings one has towards another race, or maybe even their own race. However, in-depth research on this topic -- wide-ranging and experimental as it may be -- does little to help the Black defendant who gets caught in the criminal justice web. Change will only occur when those who have the discretionary decision-making power do all they can to remain steadfast, fair and equal in their administration of justice and strive to remove any suggestion of racial discrimination from their decisions. The following are a few recommendations:

#### 1. Police

Implicit bias training aims to increase fair officer decision-making and to enhance the outcomes of police citizen encounters. Critics have cited that there is no empirical evidence that exists on the impact of implicit bias training on officer decision-making in the field or whether officers who are trained in implicit bias are perceived to be fair by citizens. Moreover, which training modality (classroom or simulation) is most effective in producing persistent changes in police behavior, or even how long the training effects will last? The critical question is, can implicit bias training reduce police officer bias, improve officer fairness in behavior and ultimately promote public trust in the police?<sup>29</sup> Here are some potential solutions.<sup>30</sup>

(a) Raise Awareness of Implicit Bias Amongst Police Officer Leaders

Awareness training introduces the concept of implicit bias through conversational training, allowing for discussions of how the brain creates and stores stereotypical references. This awareness training should begin at all levels within the police organization but most importantly it should begin with police leadership;

(b) Transform the Conversation Between the Police and the Community

<sup>&</sup>lt;sup>29</sup> Renee J. Mitchell, JD, PhD, Hebrew University of Jerusalem, and Lois James, PhD, College of Nursing, Washington State University. *Addressing the Elephant in the Room*. The Need to Evaluate Implicit Bias Training Effectiveness for Improving Fairness in Police Officer Decision-Making. <sup>30</sup> Tracia L. Kassae (July 2, 2015). Three Ways to Peduce Implicit Pies in Policing.

<sup>&</sup>lt;sup>30</sup> Tracie L. Keesee (July 2, 2015), Three Ways to Reduce Implicit Bias in Policing.

Enhance and expand community policing. When a Police Department cultivates a diverse workforce, preferably hiring from the community it serves, it also creates the conditions within the Department for contact between groups that can reduce negative implicit bias among officers; and

# (c) Establish Policies to Limit the Impact of Bias

Policies must extend to discipline and must distinguish explicit from implicit bias. If an officer shows a tendency towards explicit discriminatory behavior, the issue must be quickly and effectively addressed.

# 2. Prosecutors

Promote and Hire a Diverse Pool of Assistant District Attorneys

There is strong belief that racially diverse prosecutors' offices might curb the operation of implicit racial bias. Studies have shown that diverse prosecutors' offices might not only facilitate an atmosphere with less implicit bias but could perhaps also lead to even more thoughtful and efficient decisions;

# 3. Training for Judges

Judicial training should not end with new judges. Training for sitting judges is also important. What may be missing from judicial education, even today, is that it is seldom accompanied by any testing of the individual judge's susceptibility to implicit bias or any analysis of the judge's own decisions, so judges are less likely to appreciate and internalize the risks of implicit bias;<sup>31</sup> and

# 4. Auditing System

A system of auditing should be developed to evaluate the decisions of individual judges in order to determine whether they appear to be influenced by implicit bias in areas such as bail setting, sentencing or even child custody allocation. Periodic audits in these areas and others could determine whether they exhibit patterns that are indicative of implicit bias. Auditing could increase the

<sup>&</sup>lt;sup>31</sup> Siri Carpenter, *Buried Prejudice: The Bigot in Your Brain*, Sci. Am. Mind, May 2008, at 32.

available data regarding the extent to which bias affects judicial decision-making. Secondly, it could enhance accountability in judicial decision-making.

#### **C.** Conclusion

There is no magic wand that will eradicate the impact of implicit bias and level the playing field. The many points along the criminal justice continuum where a wide range of discretionary decision-making can occur is vast, unstable and subject to the social and political lines that have been drawn across our courts and indeed this nation. Much needs to be done to prevent implicit bias from ultimately influencing individual cases. These are but a few suggestions that the criminal justice system could implement, touching on the areas involving the police, prosecutors and judges.

## V. USE OF DATA TO ANALYZE STATISTICS TO HIGHLIGHT AND ELIMINATE RACIAL AND ETHNIC DISPARITIES IN SENTENCES

<u>Issue</u>: There are serious discrepancies in sentences based on the race and ethnicities of defendants.

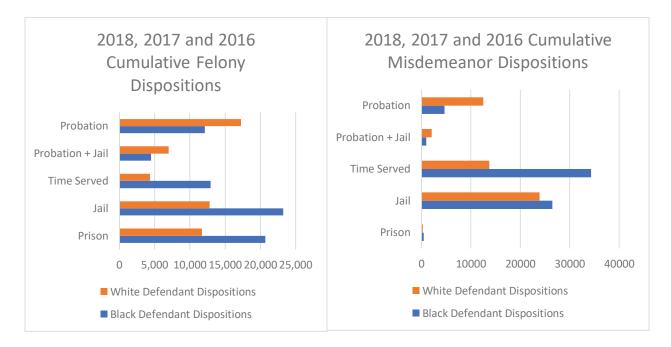

The New York State Division of Criminal Justice Services ("DCJS") and the Unified Court System are responsible for collecting data regarding the disposition of cases. The collection of this data may be utilized not only to highlight disparities in dispositions, but also to timely and proactively address patterns of disparity, whether due to implicit bias or otherwise.

DCJS yearly data shows that Blacks accounted for more felony and misdemeanor dispositions for the years 2018 (*see* Appendix P, "New York State Adult Arrests Disposed by Race/Ethnicity: 2018"), 2017 (*see* Appendix Q, "New York State Adult Arrests Disposed by Race/Ethnicity: 2017"), and 2016 (*see* Appendix R, "New York State Adult Arrests Disposed by Race/Ethnicity: 2017"), and 2016 (*see* Appendix R, "New York State Adult Arrests Disposed by Race/Ethnicity: 2017"), and 2016 (*see* Appendix R, "New York State Adult Arrests Disposed by Race/Ethnicity: 2016")<sup>32</sup>, even though Blacks, as previously mentioned, account for a smaller percentage of the population than whites.

Further, DCJS data over this three-year period, as demonstrated by the graphs herein, show that Black defendants, when compared to white defendants, are generally more likely to receive an incarceratory sentence, including prison, jail

<sup>&</sup>lt;sup>32</sup> See, NYS Division of Criminal Justice Services, Adult Arrests Disposed by Race/Ethnicity: 2016, 2017 and 2018, <u>https://www.criminaljustice.ny.gov/crimnet/ojsa/dispositions-adult-arrest-demographics.html</u>. <u>See also</u> Appendices A, B and C.

or time served, and less likely to receive a probationary sentence for misdemeanors and total felonies.<sup>33</sup>

We are aware that sentencing involves a myriad of factors including prior criminal convictions, the nature of the crime and injuries to the complainant. In addition, Chapter 102 of the Laws of 2020, which was signed on June 15, 2020, now requires the chief administrator of the courts to compile data related to dispositions in all courts, among other things, by race, ethnicity and sex and to post this data disaggregated by county, on the Office of Court Administration website.

<sup>&</sup>lt;sup>33</sup> See, NYS Division of Criminal Justice Services, Adult Arrests Disposed by Race/Ethnicity: 2016, 2017 and 2018, <u>https://www.criminaljustice.ny.gov/crimnet/ojsa/dispositions-adult-arrest-demographics.html</u>. *See also*, Appendices A, B and C. This analysis is based upon a review of total felony and misdemeanor dispositions. Subset felony categories, such as violent and drug felonies, were not analyzed for purposes of this analysis. However, it is noted that regardless of the felony subset category, Black defendants were less likely to receive probationary sentences; and for drug felonies, were more likely to receive sentences involving incarceration than white defendants. As to violent felonies, even though more Black defendants received sentences involving incarceration, in some years, a higher percentage of white defendants received dispositions involving incarceration. As to misdemeanors, in 2018, an outlier exists in that more white defendants than Black defendants received a sentence involving jail, though more Black defendants and a higher percentage of Black defendants received sentences involving jail over the three-year period and in 2017 and 2016.

#### Recommendations:

- 1. Each individual judge handling criminal matters shall be provided at least on a quarterly basis data regarding the dispositions in his or her court, disaggregated by penal law, race, ethnicity, age and sex of defendants; and
- 2. If it is determined that a pattern or trend of bias has emerged regarding a judge, then s/he/they should be immediately mandated for additional implicit bias training and other appropriate action.

# VI. THE INTERSECTION BETWEEN THE COURTS AND THE POLICE AND PROSECUTORS

<u>Issue</u>: Prosecutors do not sufficiently carefully control the charging process and the court system does not sufficiently track police officer misconduct.

In the day-to-day proceedings of New York courts, there is an intersection between police officers and people accused of crimes who appear within our courts. But even before the accused's appearance, there is a great degree of power and influence exercised by the police. It includes the decision of the degree to which enforcement of certain "crimes" or "violations" will be made in various neighborhoods, and the discretion to stop vehicles for alleged violations of the New York State Vehicle and Traffic Law, which may then lead to the recovery of weapons and contraband.

Additionally, when an arrest is made, it is the officer who initially has the discretion to label it as one for a misdemeanor or a felony. This influences the ultimate charges that may be elected by the prosecutor assigned to the Early Case Assessment Bureau ("ECAB"), who then drafts the complaint in the case. Notably, one District Attorney's Office also uses experienced paralegals to draft their complaints, under the supervision of an experienced supervisor. Officers upstate and in Nassau County are known to have significant influence in the drafting process. To the extent that the majority of prosecutors within a charging or ECAB Unit are junior, there is the potential for an experienced officer to overwhelm the prosecutor and significantly influence the charges. Furthermore, any lack of diversity within that prosecuting agency will, as with other

discretionary decisions in the criminal justice system, necessarily impact charging decisions.<sup>34</sup>

Indeed, the New York State court system has itself become involved, to a limited extent, in monitoring police behavior. Thus, an offshoot of the settlement agreement which addressed the issue of stop and frisk by the NYPD, has led to reporting requirements after the suppression hearing phase. Hence, effective February 1, 2019, the New York State Chief Administrative Judge established a Suppression Decision Pilot Program pursuant to Administrative Order 61/19, which requires the court to provide information on cases in which either evidence was suppressed or there was a finding of a lack of credibility of a police officer during a suppression hearing. Such information is then supposed to be sent to the New York City Police Department and other stakeholders. The sole existing "Report as of October 1, 2019" on the Unified Court System website reflects that out of the 13 reported cases, 3 involved those rejecting the credibility of the officer and suppressing the evidence. In all thirteen cases, the stop and search were held to be unlawful and the evidence suppressed. To the extent that there has been tracking by the court to ensure that such information was provided to an executive in power at the NYPD; and that there was follow-up, then this is a good start.

#### Recommendations:

We are aware that the court does not control the prosecutor's office, NYPD, nor other law enforcement agencies. Yet they all play major roles in the provision of services within the judicial system, without which this system would fail. In that capacity, there is continuous conversation amongst the organizations and the court about their various roles and issues related to criminal matters. As such, any refinement in one sector necessarily improves the provision of justice to the community. Accordingly, we make the following recommendations:

- 1. Have a more balanced ratio of experienced to less experienced prosecutors in ECAB or the charging unit;
- 2. The court itself should have its own tracking system with respect to not only suppression hearings, but any finding of a lack of credibility of an NYPD or other police official, including those related to CPL §440 motions to vacate

<sup>&</sup>lt;sup>34</sup> Bronx County and Kings County had the highest percentage of prosecutors of color (approximately 34%), followed by Queens County (30%); New York County (23%); Nassau County (15%); Suffolk County (10%); and Westchester County (22%) (Queens Daily Eagle, "Queens Diversity is Underrepresented in the DA's Office, Staff Data Shows" (March 5, 2019).

judgment and CPL §330 motions to set aside the verdict. Such information should be made public;

- 3. The court should track the results of the information conveyed to NYPD or other police department; and
- 4. NYPD or other police departments should be required to show what steps have been taken with respect to retraining insofar as testifying in court, police paperwork and the need for consistency based on the truth for officers who are the subject of a "lack of credibility" finding.

# VII. GENERAL COURT REFORM FOR WIDESPREAD, LASTING IMPACT

# A. Current System for Reporting Racial Discrimination

<u>Issue</u>: Many employees, attorneys and litigants are either unaware of the current procedure for reporting racial discrimination within the court system or are distrustful of the current system.

There have been complaints about employees who have filed racial discrimination complaints receiving backlash from co-workers and supervisors. Such ramifications have had a chilling effect on the number and nature of complaints and people are deterred from coming forward. The current investigation process lacks transparency and follow-up, so the complainants and others affected do not receive updates on the investigation, nor information on the outcome and punishment, if any.

# Recommendations:

- 1. To be sure, the OCA website has practice, procedures and forms related to racial bias claims. However, there must be a sustained campaign to educate employees about the system to report racial discrimination during their initial orientation, through on-going training sessions and with the use of court emails;
- 2. Attorneys and members of the public can be better informed through easier access to the court's website and with signs posted in appropriate areas throughout the courthouse;
- 3. All should be advised that they can make such complaints anonymously and supervisors must be prepared to report those who retaliate against complainants;
- 4. Any retaliatory behavior must be dealt with swiftly and effectively;

- 5. There must be transparency in the investigation and outcome; and
- 6. When such complaints are determined to have merit, the complainants must be made aware of the punishment and in some egregious cases, it should be made public.

#### **B.** Expansion of Judicial Community Outreach

<u>Issue</u>: There is a breakdown in the public's confidence in the courts and the judiciary.

The New York State Courts Access to Justice Program ("Access to Justice") provides community outreach and education to New York State residents to help empower communities and ensure equal access to justice. In fulfilling this mandate, in New York City, Access to Justice periodically holds Community Leader Roundtables consisting of discussions with community leaders to provide information for participants to advise members of their community or religious congregations. Access to Justice also oversees a Speakers Bureau, where judges and non-judicial personnel visit schools, community agencies and other groups to discuss their respective courts and operations.

#### Recommendations:

- 1. Every judge should be encouraged to participate in the Access to Justice Program as part of a judge's judicial duties on at least an annual or semiannual basis;
- 2. Access to Justice must conduct at least two programs per year within communities of color in each respective judicial district; and
- 3. Specific programs in New York City, such as the Community Leaders Roundtable and Speakers Bureau should be expanded statewide to all judicial districts.

#### C. Eliminating Implicit Bias During Jury Selection and Trials

<u>Issue</u>: Despite the good intentions of most jurors, we all possess implicit biases that can impact our decisions regarding a person's guilt or innocence during criminal trials, or the credibility of witness testimony and how we perceive situations in all trials.

#### Recommendations:

We join in the efforts of attorneys Anthony Ricco, Kenneth Montgomery, Richard Jasper and Steven Legon in recommending the development of a video to address implicit bias during jury selection and urge Chief Judge Janet DiFiore to adopt and enact new court rules addressing implicit bias. However, we would like to go further and propose new model jury instructions addressing implicit bias at various stages of the trial and the preparation of a video to play for potential jurors in all courts. We wish to include judges, criminal and civil defense counsel, prosecutors and plaintiff counsel to address the harmful consequences of implicit bias in all trials.

#### 1. Preparation of Videos to be Played to Potential Jurors

We recommend using the video played to potential jurors in the United States District Court for the Western District of Washington as a guide. Attorneys who practice in that court approached their Chief Judge and asked her to play a video from the television show "What Would You Do?" (click this link to watch the video: <u>https://www.youtube.com/watch?v=8ABRIWybBqM</u>). The video exposed racial stereotypes and implicit biases in numerous people who unknowingly associated Black people as criminals, white people as law-abiding and an attractive white woman as being good.

Additionally, the District Court established a committee and used court funds to develop its own video addressing implicit bias. The video included a judge, defense attorney and prosecutor. The court also prepared model instructions and posted both on their court's website (click the link to the court's video and jury instructions regarding unconscious bias:

http://www.wawd.uscourts.gov/jury/unconscious-bias).

We are prepared to assist OCA in making a New York state video regarding implicit bias to play for jurors in New York.

#### 2. Enactment of Court Rules

On April 5, 2018, the Supreme Court of the State of Washington enacted court rules to eliminate the "unfair exclusion of potential jurors based on race and ethnicity" (*see* Appendix S, "Washington State's General Rule 37"). Chief Judge DiFiore has the authority to adopt a similar rule in New York State and we urge her to do so.

#### 3. Model Jury Instructions

The federal court in the Western District of Washington realized that when jurors are aware of their unconscious bias or associations, they make efforts to avoid them and become fairer decision-makers. Their instructions were meant "to alert the jury to the concept of unconscious bias and then to instruct the jury in a straightforward way not to use bias, including unconscious bias, in its evaluation of information and credibility and in its decision-making."<sup>35</sup> The court acknowledged that "implicit, institutional, and unconscious biases, in addition to purposeful discrimination, have resulted in the unfair exclusion of potential jurors"<sup>36</sup> in their state. The court developed jury instructions incorporating unconscious bias language during voir dire, preliminary instructions, credibility instructions and final instructions. We propose incorporating similar language in the New York Model Jury instructions for those same sections of our instructions. The proposed language is italicized:

#### (a) Voir Dire:

It is important that you discharge your duties without discrimination, meaning that bias regarding race, color, religious beliefs, national origin, sexual orientation, gender identity, gender of the [plaintiff,] defendant, any witnesses, and the lawyers should play no part in the exercise of your judgment throughout the trial. Accordingly, during this voir dire and jury selection process, I [the lawyers] may ask questions [and/or use demonstrative aids] related to the issues of bias and unconscious bias.

(b) Preliminary Instructions: Definition of a Fair Juror<sup>37</sup>:

In reaching a verdict, guilty or not guilty, the jury must be fair. It is important therefore for you to know what makes a person a fair juror, so you can decide whether or not you can be a fair juror. Later in the proceedings, I will ask you whether or not you can be a fair juror. What makes a person a fair juror?

A fair juror is a person who will accept and apply the law of New York, as I explain it.

A fair juror is a person who has no bias or prejudice in favor of or against a person who may appear in this trial on account of that person's race, color, national

<sup>&</sup>lt;sup>35</sup> The Model Jury Instructions, United States District Court, Western District of Washington.

<sup>&</sup>lt;sup>36</sup> Washington Supreme Court General R. 37(f)

<sup>&</sup>lt;sup>37</sup> CJI2d Voir Dire

origin, ancestry, gender, gender identity or expression, religion, religious practice, age, disability or sexual orientation.

A fair juror will guard against the application of any stereotypes or attitudes about people or groups a juror may harbor that would lead to a biased decision based upon those stereotypes or attitudes.

A fair juror is a person who has no bias or prejudice in favor of or against, a party, or any witness, be the witness a police officer or civilian.

A fair juror is a person who will base his or her decision solely on the testimony and other evidence presented at this trial, and will not make a final decision on the verdict until the end of the case, after the juror:

has heard all the testimony and other evidence,

has heard the lawyers' summations,

has heard the court's final instructions on the law, and

has had an opportunity after all of that to discuss the evidence with the other jurors and consider their views.

A fair juror must not be influenced by any personal likes or dislikes, opinions, prejudices, sympathy, or biases, including unconscious bias. Unconscious biases are stereotypes, attitudes, or preferences that people may consciously reject but may be expressed without conscious awareness, control, or intention. Like conscious bias, unconscious bias, too, can affect how we evaluate information and make decisions.

And finally, a fair juror is a person who, without fear, favor, bias, prejudice, or sympathy for either the People or the defendant or any witness, be the witness a police officer or civilian, renders a verdict, guilty or not guilty, the juror is convinced is consistent with that juror's honest evaluation of the testimony and other evidence and that juror's honest application of the law.

(c) Credibility of Witnesses<sup>38</sup>:

As judges of the facts, you alone determine the truthfulness and accuracy of the testimony of each witness. You must decide whether a witness told the truth and was accurate, or instead, testified falsely or was mistaken. You must also decide

<sup>&</sup>lt;sup>38</sup> CJI2d Credibility

what importance to give to the testimony you accept as truthful and accurate. It is the quality of the testimony that is controlling, not the number of witnesses who testify.

You must avoid bias, conscious or unconscious, based on the witness's race, color, religious beliefs, national origin, sexual orientation, gender identity, or gender in your determination of credibility.

(d) Final Instructions:

1) Reminder: Fairness

Remember, you have promised to be a fair juror. You must decide the case solely on the evidence and the law before you and must not be influenced by any personal likes or dislikes, opinions, prejudices, sympathy, or biases, including unconscious bias. Unconscious biases are stereotypes, attitudes, or preferences that people may consciously reject but may be expressed without conscious awareness, control, or intention. Like conscious bias, unconscious bias, too, can affect how we evaluate information and make decisions.

A fair juror is a person who will not permit his or her verdict to be influenced by a bias or prejudice in favor of or against a person who appeared in this trial on account of that person's race, color, national origin, ancestry, gender, gender identity or expression, religion, religious practice, age, disability or sexual orientation, and further, a fair juror will guard against the application of any stereotypes or attitudes a juror may harbor about people or groups that would lead to a biased decision based upon those stereotypes or attitudes.<sup>39</sup>

#### 2) Credibility

Credibility of Witnesses: As judges of the facts, you alone determine the truthfulness and accuracy of the testimony of each witness. You must decide whether a witness told the truth and was accurate, or instead, testified falsely or was mistaken. You must also decide what importance to give to the testimony you accept as truthful and accurate. It is the quality of the testimony that is controlling, not the number of witnesses who testify.

<sup>&</sup>lt;sup>39</sup> CJI2d Final Instructions

You must avoid bias, conscious or unconscious, based on the witness's race, color, religious beliefs, national origin, sexual orientation, gender identity, or gender in your determination of credibility.

#### 4. <u>Rehabilitation of Jurors Who Believe They Cannot Serve</u> Because of Negative Feelings Towards Police Officers

<u>Issue</u>: Often, it is difficult to select a racially and ethnically diverse jury panel in criminal cases, even in New York City, because many people of color, as well as young people are stricken for cause when they say they cannot be fair in cases involving the testimony of police witnesses.

People often state they have negative views about police officers because of negative interactions that they, or someone close to them, have had with police officers and/or they say they cannot follow the instruction requiring them to consider the credibility of a police officer the same way they would consider the credibility of a non-police officer witness. Additionally, many people state they do not trust police officers and would need additional evidence to corroborate a police officer's testimony even though they would not require such additional corroboration for a non-police officer witness.

Judges often permit potential jurors to be stricken for cause when the potential jurors state they have negative feelings or views about police officers based on what they have read or seen in news reports or based on negative interactions that they or people close to them have had with police officers. Jurors are also stricken because of their support for the Black Lives Matter movement or views against police brutality. The majority of people who hold these views are Black or Latino and many are young people.

#### Recommendations:

Develop a model jury instruction which acknowledges the existence of potential negative feelings, but provides factual information and continued questioning to attempt to rehabilitate prospective jurors by focusing on the specific case before them and naming and humanizing the potential witnesses who may testify to permit them to confirm that they can still be fair in the case and prevent them from being stricken for cause.

Proposed language could include, but is not necessarily limited to, the following:

In this case we anticipate that the People's witnesses will include one or more police officers, including (names of all potential police officer witnesses).

The testimony of a witness should not be believed solely and simply because the witness is a police officer. At the same time, a witness's testimony should not be disbelieved solely and simply because the witness is a police officer. You must evaluate a police officer's testimony in the same way you would evaluate the testimony of any other witness.<sup>40</sup>

Many of you may not want to serve as a juror in a case where you will be asked to judge the credibility of one or more police officers. It is understandable that some of you may have negative feelings about police officers based upon your own negative personal experiences or interactions with police officers. Some of you may have negative views about police officers based upon what you have read, watched or heard involving other cases where it is alleged that police officers killed unarmed Black or Latino men and women, or that they used unreasonable or excessive force.

However, some of you may feel differently and believe that you will always support police officers, you will hold them in a higher regard than non-police officer witnesses and you will give them the benefit of the doubt at all times.

Some of you may also think that you cannot serve as a juror simply because you support Black Lives Matter.

If you can be fair in this case, then it will not preclude you from serving on this jury if you have had prior contact with police officers; you do not trust police officers; you believe that police officers engage in racial profiling; you have a close relationship with people who have been stopped, arrested, or convicted of a crime; you do not approve of how Black and Latino men are treated in the criminal justice system,<sup>41</sup> or you live in a highcrime area.<sup>42</sup>

<sup>&</sup>lt;sup>40</sup> CJI 2d Jury Instructions regarding Credibility of Police Officers.

<sup>&</sup>lt;sup>41</sup> See, Commonwealth v Quinton Williams, 481 Mass 443, 457 (2019), citing Mason v United States, 170 A3d 182, 187 (DC 2017)

<sup>&</sup>lt;sup>42</sup> This paragraph, except for "*how black and Latino men are treated in the criminal justice system*," is taken from the section regarding the reasons for peremptory challenges which have been deemed to be presumptively invalid, pursuant to Washington Supreme Court General R. 37 (h).

The easy way out is to simply say that you cannot be fair in this case because of your views of police officers. However, upon further reflection, you may realize that you can have certain feelings, yet still be fair in this case.

As I am sure you can agree, there are good people and bad people in every profession. However, I hope you can agree that (Defendant's name) and all witnesses who testify before you deserve a fair trial in this case with jurors who are fair to both sides. If you or a loved one was charged with a crime, wouldn't you want to have a fair jury?

Is it fair to blame the officers in this case for what officers are alleged to have done in other unrelated incidents? Can you understand that this case does not involve any of those police officers that you have seen on the news or read about in the media? This case involves whether the People can prove beyond a reasonable doubt that (defendant's name) committed the crime(s) charged in this case. (If in New York City-For example, most people do not realize that over 8 million people live in New York City or that NYPD employs approximately 36,000 uniformed officers, with slightly more than half composing of minorities, including Latinos, Blacks and Asians.)<sup>43</sup> Therefore, despite what happened to you in the past or what you have seen or read about police officers, can you still promise to be fair to both sides in this case?

#### 5. <u>Expand the Jury Pool To Include More Racial and Ethnic</u> <u>Minorities and Young People</u>

(a) <u>Issue 1</u>: Although the County Clerks in many counties have made tremendous strides to include more racial and ethnic minorities and young people in their jury pools, these groups are still under-represented and more work needs to be done to reach out to them through additional means, like the increased use of email and social media platforms.

#### Recommendations:

Many people may not open mail, but they regularly communicate through email and use social media platforms like Instagram, YouTube, Facebook,

<sup>&</sup>lt;sup>43</sup> New York City Civilian Complaint Review Board Data Transparency Initiative. Data reflecting ethnic breakdown of active NYPD officers as of August 9, 2020, is 47% white (non-Hispanic), 29% Hispanic, 15% Black (non-Hispanic) and 9% Asian.

Snapchat, Twitter, WhatsApp, TikTok and other services. Use of these platforms can expand the jury pool and be more inclusive. For example, many people may not be on the rolls to be called for jury service based on the current selection procedures and they may not open mail from the courts. Email and social media platforms can be used to encourage people to complete juror questionnaires; serve when called; educate people about what to expect when they serve; advise them about the safety protocols in place and requirements post-COVID-19; remind them of their date to report to the courthouse; and advise them of schedule changes, like when they can report later or when they are no longer needed.

(b) <u>Issue 2</u>: Many racial and ethnic minorities are unable to serve as jurors because they cannot afford to serve. Many people do not get paid by their employers; are self-employed; earn commissions; or have child or elder care responsibilities for which substitution is not economically feasible.

#### Recommendations:

Increase the daily rate of pay for jury duty from \$40.00/day to \$50.00/day, plus reimbursement for reasonable transportation expenses of mileage, parking, tolls and public transportation. Jurors should also receive up to \$60.00/day for service on trials which last ten (10) days or more or for grand jurors who serve 45 days or more. This amount is on par with the amount paid for federal jury duty in New York State.

#### 6. <u>Develop Model Individual Part Rules for Judges to Encourage</u> <u>Participation of Racial and Ethnic Minority and Women Attorneys</u>

(a) <u>Issue 1</u>: Numerous studies have demonstrated that the legal profession remains the least diverse of comparable professions (*see*, American Bar Association's Commission on Racial and Ethnic Diversity in the Profession Initiative, ABA Resolution 113). Although Blacks and Latinos are just over one third of the population in the United States and people of color constitute approximately one quarter of law school graduates, they represent only approximately 10% of attorneys (*id*.). Similarly, women constitute slightly over half of the population and half of law school graduates, but are only 35% of attorneys (*id*.). Most notably, racial and ethnic minorities and women are terribly underrepresented in civil and high-profile criminal substantive court proceedings.

#### Recommendations:

Develop model part rules for individual judges to help promote diversity in the legal profession and urge all providers of legal services, including law firms and corporations, to expand and create opportunities for racial and ethnic minorities and women attorneys to participate substantively during in court proceedings. Judges can affirmatively acknowledge that the court system, legal profession and society are best served with diverse attorneys who reflect the community in which the legal services are provided. The model rules will encourage attorneys from these underrepresented groups to second seat hearings and trials and take a more active role in the proceedings, including direct or crossexamination, motion arguments, and opening or closing arguments. By developing model part rules and making them easily accessible to judges across the country, they can easily cut and paste these rules and incorporate them into their own part rules. These model rules could have a widespread impact towards lasting change.

We propose the following additions to individual part rules for judges:

The court acknowledges that implicit, institutional, and unconscious biases, in addition to purposeful discrimination, have resulted in the unfair exclusion of racial and ethnic minority attorneys from actively participating in substantive in court proceedings. The court also acknowledges that women attorneys have also been excluded. The court system, legal profession and society are best served with diverse attorneys who reflect the community in which the legal services are provided. As such, the court encourages and promotes participation by racial and ethnic minority and women attorneys to have full, equal and meaningful participation in substantive in court proceedings.

To the extent possible, the court permits more than one attorney for a party to examine different witnesses or to argue different points of law before the court, but only one attorney per party may examine the same witness. The court permits different attorneys to give the opening and summation, however the opening attorney must provide the full opening and the closing attorney must provide the full summation. Additionally, the attorney conducting direct or cross examination shall be the only litigant speaking at sidebar conferences.

(b) <u>Issue 2</u>: Because the ethical rules prohibit judges from taking a stand on issues involving open cases, political issues or matters which may be deemed controversial in nature, judges are generally prohibited from speaking out against racism and other forms of discrimination. Therefore,

they remain silent with the appearance of being complicit with such conduct.

#### Recommendations:

Develop Model Individual Part Rules which can be posted electronically to be accessible to judges across the country so they can have the opportunity to affirmatively declare their commitment to denounce racism and discrimination in their courtrooms and pledge to take action to prevent it. We recommend using language similar to the American Bar Association's Model Code of Judicial Conduct pertaining to bias, prejudice and harassment (American Bar Association, Model Code of Judicial Conduct R. 2.3). Our proposed language is as follows:

The court acknowledges that implicit, institutional, and unconscious biases, in addition to purposeful discrimination, have resulted in the unfair exclusion of racial and ethnic minorities. As such, the judge, court personnel and all attorneys appearing before this court shall not, in the performance of their duties, by words or conduct manifest bias or prejudice, or engage in harassment, including but not limited to, bias, prejudice, or harassment based upon race, sex, gender, religion, national origin, ethnicity, disability, age, sexual orientation, marital status, socioeconomic status, or political affiliation. Any violations of this provision should be reported to the judge or appropriate supervisor immediately.

#### 7. Make Efforts to Pronounce Unfamiliar Names

<u>Issue</u>: There are several complaints that many racial and ethnic minorities who appear in our courts have names that may be unfamiliar to judges, clerks and other court staff and difficult for them to pronounce. The court employees repeatedly mispronounce the names or do not even try to learn how to pronounce the names correctly. Additionally, some judges offer to shorten names or give nicknames to ethnic or racial minority attorneys on the record instead of learning the correct pronunciation of their full names. However, these same individuals often take the time to learn the correct pronunciation of white attorneys and litigants with names that are as unfamiliar and difficult to pronounce.

#### Recommendations:

Advise judges and court personnel of the importance of attempting to correctly pronounce each name and explain how it shows respect, professionalism and courtesy to all who appear in our courts. Encourage judges and court personnel to ask for a business card, to write down names phonetically and/or ask for the correct pronunciation as many times as is necessary to get it right. This would highlight the problem and develop a more welcoming environment for all.

#### **VIII. FAMILY COURT/HOUSING COURT ISSUES**

#### **A. Family Court**

The Public Perception of Discrimination<sup>44</sup>

"Can you imagine how a Black single parent feels the first time she goes into that intimidating place [Family Court] and sees white clerks, white guards, white psychologists, white correction officers, white lawyers, and white court judges? –she immediately senses that they have all the power and we have none. The court personnel's attitude is [that an] inner city person is a nobody, and we feel helpless rage as we see them snickering and whispering snide remarks and things to each other as they talk about us. They only give respect in conversation to each other and to the white parents in court."

Witness, Albany Public Hearing

Family Court still lacks diversity. This statement is as true in 2020 as it was in 1989, thirty years ago. In one New York City county, more than 65% of the Family Court bench is white. Not only are the judges overwhelmingly white, but the litigants are primarily Black and Latino. Indeed, in the Bronx, the attorneys representing children through agencies connected with the court, such as the Children's Law Center, have only two Black attorneys, no male attorneys, and only one attorney who speaks a language other than English.

In agencies who report to the court, Black and brown boys are sexualized or age advanced because of their size or height. Often reports describing Black male children will indicate that the child is a "6 ft, 200-pound man." Moreover, there is a large and ignored issue with the statutory rape of young minority children, who are parents to children born of sexual relationships of which one parent is underage and the other is well over the age of majority, which the system ignores on the basis of "consent." One cannot consent to statutory rape.

<sup>&</sup>lt;sup>44</sup> Interim Report, New York State Judicial Commission on Minorities, June 26, 1989 p 2.

Black men are not treated with respect when they come to Family Court and are often assumed to be deadbeats, violent, or felons. The assumption is not that they want to be present in their children's lives. Judges, court officers and other staff perpetuate these beliefs in how they treat Black men in the courthouse.

People want to walk into a court and see people that look like them and with whom they feel they can identify. This is not the case in Family Court.

#### Recommendations:

- 1. Court oversight and feedback to connected agencies about the perpetuation of stereotypes and bias in court-ordered reports;
- 2. Court oversight and feedback to connected agencies about the perpetuation of stereotypes through mandated service providers;
- 3. Increase 18b payment to attract more young attorneys and attorneys of color;
- 4. Better parenting resources in specialties OTHER than child protection; and
- 5. Seminars to educate the public on how court works. Many people of color are terrified to come to court because of the racism and perceived bias associated with the justice system, which includes the Family Court.

#### **B.** Housing Court

Housing Court does not reflect the diversity of the community, either ethnically or with respect to race. This diversity is lacking both in the judiciary and among court attorneys. For example, in Kings County, over 80% of the population which utilizes the court as litigants are people of color. Further, these litigants are typically unrepresented. Of the fifty (50) New York City Housing Court Judges, fifteen (15) judges are assigned to Kings County, yet there are only three (3) judges of color in the borough. The appointing authority for the position of Housing Court Judge is the Chief Administrative Judge of New York State, entirely within the purview of OCA, as opposed to the other appointed or elected judicial positions. In Kings County, there are twenty (20) court attorneys of which only eight (8) are Black.

#### Recommendations:

- 1. Transparency with the process of selection of Housing Court Judges;
- 2. Consciously select diverse candidates;

- 3. Selection of candidates from diverse legal backgrounds that would enhance the bench and allow for a broader selection; and
- 4. More diversity in the selection panel.

#### **IX. CONCLUSION**

For all of the foregoing reasons, we conclude that systemic racism and unconscious bias exist throughout the New York State Court system. We trust that our efforts to reveal the sources of these vital issues and our recommendations offering tangible solutions for lasting, maximum impact, will assist the Commission in fulfilling its mission to examine the existing policies, practices and initiatives and recommend revisions and improvements to combat racial bias and discrimination within the courts. In turn, we anticipate that the Chief Judge, in fulfillment of her *Excellence Initiative*, will implement these changes and make our courts a model for the nation and the world. Most importantly, however, we hope that these changes will have a direct and positive impact on the people we serve.

## **APPENDIX D**

#### New York State Supreme Court Judges Elected in New York City

#### New York State Supreme Court Judges Elected in New York City

The New York State Constitution establishes 277 Supreme Court Justices, divided into various counties within the State and a State population of approximately 19.8 million residents. The Justices are elected by the general public at the annual general election each year. They are nominated at political party caucus by judicial delegates at their respective county-wide (or judicial districts) (*see* New York State Election Law). The judicial delegates (voters) to the Convention are elected from districts at the party election earlier the same year. The Justices serve for a fourteen-year term at a compensation of \$210,000 annually. They may serve interchangeably in the Civil or Criminal Terms until age 70 and thereafter petition OCA every two years to be certificated until age 76.

The State Supreme Court Justices are augmented by the approximately 88 Court of Claims Justices and the Acting Supreme Court Justices.

Year	Number of (Elected) Judges in New York City	Number of (Elected) Judges in New York City by County & Percentages	Number of Black (Elected) Judges & Percentages	Number of Black (Elected) Judges by County & Percentages

2019	139	9 (6.5%)
2020	143	9 (6.3%)

## **APPENDIX G**

**New York Court of Claims** 

#### **New York Court of Claims**

The New York State Court of Claims Act establishes 86 Court of Claims Judges. There are 86 Judges appointed by the Governor of the State of New York with advice and consent by the New York State Senate. The Judges are appointed to nine-year terms, with an annual compensation of \$210,000, and with an option to be reappointed by the Governor until they reach the age of 70. Their general jurisdiction is the exclusive forum for civil litigation seeking damages against the State of New York or certain other State-related entities such as the New York State Thruway Authority, the City University of New York, the Olympic Regional Development Authority, the Roswell Park Cancer Institute Corporation and the New York State Power Authority.

However, many of the Judges are assigned to serve in New York City as Supreme Court Justices in Civil Terms, and Acting Supreme Court Justices in Criminal Terms. The Judges are divided into four categories Part A (27 Judges), B (17 Judges), D (32 Judges), and E (12 Judges). Only Part A Judges are authorized to serve in the Supreme Court, Civil Term (*see* Court of Claims Act §2).

As a general rule, in New York City on average 18 to 20% of all Judges in Supreme Court are Court of Claims Judges appointed by the Governor, not duly elected to the Supreme Court by the voters. Between 2010 to 2020, 85 to 80% of all Court of Claims appointments, respectively, were white.

Year	Number of (Appointed) Judges	Number of Black (Appointed) Judges & Percentages
2010	84	3 (3.6%)
2015	82	4 (4.9%)
2016	79	3 (3.8%)
2017	81	4 (4.9%)

2018	86	5 (5.8%)
2019	83	6 (7.2%)
2020	81	6 (7.4%)

## **APPENDIX I**

New York City Housing Court Judges

#### New York City Housing Court Judges

The New York City Civil Court, Housing Part was established pursuant to the New York City Civil Court Act, Section 110 and has dual reporting capacity to OCA and the Housing Court Advisory Council. The purpose of the Advisory Council is to advise and make recommendations to the Administrative Judge of the Civil Court, the Administrative Board of the Judicial Conference, the Governor of the State of New York, the Majority and Minority leaders of the New York State Assembly, Senate and the Mayor and Council of the City of New York concerning the manner of operations and functions of the Civil Court Housing Part that will best enable the Court to effectively carry out its dual mandate of dispensing justice and improving the housing stock. This includes issuing an annual report to the same persons. In addition, the Council is charged with the responsibility to review and approve applicants for appointments to the Housing Court Part and sitting Court Judges for reappointment.

The Court has a tremendous responsibility hearing both residential and commercial housing cases among New York City's 8.3 million residents, many of whom are apartment renters or Coop and condominium owners. The New York Civil Court, Housing Part has 50 appointed Housing Court Judges who serve five-year terms. They are augmented by elected Civil Court Judges and adjudicate well over 250,000 cases a year. In the recent New York State Housing Control Act of 2019 and modifications to the New York Rent Regulation Reform Act of 1997, extending and reorganizing the Emergency Housing Rent Control Law, the Emergency Tenant Protection Act of 1974, and the Emergency Housing Rent Control Act and the fact that many of the litigants to appear in court are *pro se* (without benefit of legal counsel) the Court has its hands full.

The Housing Court Council, which screens Judges for qualification, consists of fourteen (14) members. Twelve (12) members known as "Public Members" are appointed by the Administrative Judge of the City of New York with approval by the Presiding Justices of the New York State Supreme Court, Appellate Division, First and Second Departments. The Public Members include two representatives from the following areas: the real estate industry, tenants' organizations, civic groups, bar associations, and four members from the public at large. Each of the other two (2) members known as, "Appointed Members", are appointed by the Mayor of the City of New York (usually a commissioner serving at New York City Housing and Preservation and Development) and the Governor of the State of New York (usually a Commissioner at the New York State Department of Housing and Community Renewal). Public Members serve for three year non-renewal terms without any compensation or expense reimbursement. Ultimately, however, the Chief Administrative Judge of the State of New York makes the appointment to the Court from the Housing Court Council recommendations.

### **APPENDIX Q**

Disposed Adult Arrests Data Source Notes
The attached disposition data is derived from the Division of Criminal Justice Services (DCJS) Computerized Criminal History (CCH) system. CCH contains adult arrests and dispositions for offenses where fingerprints are required to be taken (Criminal Procedure Law 160.10). Arrest information is submitted by police agencies via a fingerprint transaction and disposition information is electronically transmitted to DCJS by the Office of Court Administration. Race/ethnicity information is recorded by police as part of the fingerprint transaction. Four categories of race/ethnicity are displayed: White, Black, Hispanic, and Other. All arrestees of Hispanic ethnicity, regardless of race, are included in the Hispanic category. The White, Black, and Other categories include only persons of non-Hispanic origin. For calendar years up to and including 2017, state law defined an adult as anyone age 16 or older.
Dispositions are categorized by the most serious charge reported at the time of arrest. For example, if an individual was charged with a felony and a misdemeanor in connection with the same crime, a single disposition outcome would be displayed and would be categorized as a felony. <b>Outcomes are shown only for arrests that have reached a final disposition. Arrests with no disposition, an interim disposition, or a conviction without a sentence are not considered fully disposed and are not displayed.</b> Disposed arrests are categorized by the following arrest types:
<ul> <li>Felony: Offenses for which a sentence of imprisonment of more than one year may be imposed (Penal Law Article 10.05).</li> <li>Violent Felony: A subset of the felony category that includes all charges listed under Penal Law Article 70.02 and the Class A felonies of murder, arson,</li> </ul>
<ul> <li>Manapping, and predatory sexual assault.</li> <li>Drug Felony: A subset of the felony category that includes all felony charges listed under Penal Law Article 220 (Controlled Substances) and Article 221 (Marijuana).</li> </ul>
• Misdemeanor: Offenses, other than traffic infractions, for which a sentence of imprisonment of more than 15 days but no more than one year can be imposed (Penal Law Article 10.04).
If an arrest resulted in a conviction, the table notes whether the conviction charge was a felony, misdemeanor, or non-criminal offense. Convictions may be the result of a plea bargain or a trial and may be for offenses other than what was charged at arrest (i.e., a felony arrest may result in conviction for a misdemeanor or violation. Conversely, charges can also be upgraded post-arrest). Convictions are further categorized as Adult Convictions and Youthful Offender Adjudications. Under state law, Youthful Offender status may be granted by a court to individuals who are 16, 17 or 18 years old. This results in the conviction being sealed, however, the individual may serve a period of incarceration as the result of the Youthful Offender Adjudication. Data is displayed according to the year in which the final disposition occurred, regardless of when the arrest occurred (i.e., an arrest from 2015 that was disposed in 2017 would be displayed in the 2017 column). For arrest events with multiple charges, the disposition shown is the most serious disposition. The following are final disposition types:
<ul> <li>Diverted and Dismissed' dispositions are reported to DCJS.</li> <li>Diverted and dismissed' dispositions are reported to DCJS.</li> </ul>
<ul> <li>Covered by Another Case: Cases resolved by a disposition (usually a guilty plea) in a separate case.</li> <li>Dismissed-Adjourned in Contemplation of Dismissal (ACD): Cases dismissed after a period of adjournment under CPL 170.55.</li> </ul>
Dismissed-Not ACD: Cases that were dismissed based on merit or procedure.
<ul> <li>Acquitted: Cases where the defendant was found not guilty after trial.</li> <li>DA Declined to Prosecute: Cases where the District Attorney declined to bring formal charges against the arrested individual. Note: This disposition primarily occurs in the five counties/boroughs of New York City.</li> <li>Other: Cases abated by the defendant's death, other unknown favorable dispositions and cases where it was determined that New York State did not have jurisdiction.</li> </ul>
Sentences to prison, jail, and probation represent court-imposed sanctions and not actual admissions or caseloads.
Note: All percentages, even in the sentence type section of the tables, represent the percentage/proportion of total disposed arrests for the year.

#### **APPENDIX R**

Disposed Adult Arrests Data Source Notes
The attached disposition data is derived from the Division of Criminal Justice Services (DCJS) Computerized Criminal History (CCH) system. CCH contains adult arrests and dispositions for offenses where fingerprints are required to be taken (Criminal Procedure Law 160.10). Arrest information is submitted by police agencies via a fingerprint transaction and disposition information is electronically transmitted to DCJS by the Office of Court Administration. Race/ethnicity information is recorded by police as part of the fingerprint transaction. Four categories of race/ethnicity are displayed: White, Black, Hispanic, and Other. All arrestees of Hispanic ethnicity, regardless of race, are included in the Hispanic category. The White, Black, and Other categories include only persons of non-Hispanic origin. For calendar years up to and including 2017, state law defined an adult as anyone age 16 or older.
Dispositions are categorized by the most serious charge reported at the time of arrest. For example, if an individual was charged with a felony and a misdemeanor in connection with the same crime, a single disposition outcome would be displayed and would be categorized as a felony. <b>Outcomes are shown only for arrests that have reached a final disposition. Arrests with no disposition, an interim disposition, or a conviction without a sentence are not considered fully disposed and are not displayed.</b> Disposed arrests are categorized by the following arrest types:
<ul> <li>Felony: Offenses for which a sentence of imprisonment of more than one year may be imposed (Penal Law Article 10.05).</li> <li>Violent Felony: A subset of the felony category that includes all charges listed under Penal Law Article 70.02 and the Class A felonies of murder, arson, bidmonia and product account account account</li> </ul>
<ul> <li>Drug Felony: A subset of the felony category that includes all felony charges listed under Penal Law Article 220 (Controlled Substances) and Article 221 (Marijuana).</li> </ul>
• Misdemeanor: Offenses, other than traffic infractions, for which a sentence of imprisonment of more than 15 days but no more than one year can be imposed (Penal Law Article 10.04).
<ul> <li>Covered by Another Case: Cases resolved by a disposition (usually a guilty plea) in a separate case.</li> <li>Dismissed-Adjourned in Contemplation of Dismissal (ACD): Cases dismissed after a period of adjournment under CPL 170.55.</li> </ul>
<ul> <li>Dismissed-Not ACD: Cases that were dismissed based on merit or procedure.</li> <li>Acquitted: Cases where the defendant was found not guilty after trial.</li> </ul>
<ul> <li>DA Declined to Prosecute: Cases where the District Attorney declined to bring formal charges against the arrested individual. Note: This disposition primarily occurs in the five counties/boroughs of New York City.</li> <li>Other: Cases abated by the defendant's death, other unknown favorable dispositions and cases where it was determined that New York State did not have jurisdiction.</li> </ul>
Sentences to prison, jail, and probation represent court-imposed sanctions and not actual admissions or caseloads.
Note: All percentages, even in the sentence type section of the tables, represent the percentage/proportion of total disposed arrests for the year.

#### THE SUPREME COURT OF WASHINGTON

IN THE MATTER OF THE PROPOSED NEW RULE GENERAL RULE 37 — JURY SELECTION

ORDER

NO. 25700-A- 122

The Proposed New GR 37 — Jury Selection Workgroup, convened by the Supreme Court having recommended the adoption of the proposed new General Rule 37 — Jury Selection, and the Court having considered the new rule, the workgroup's final report, and comments submitted to the rule originally proposed by the American Civil Liberties Union of Washington, and having determined that the proposed new rule will aid in the prompt and orderly administration of justice:

Now, therefore, it is hereby

ORDERED:

(a) That the new rule as attached hereto is adopted.

(b) The new rule will be published in the Washington Reports and will become effective upon publication. Page 2 ORDER IN THE MATTER OF THE PROPOSED NEW RULE GENERAL RULE 37 — JURY SELECTION

DATED at Olympia, Washington this day of April, 2018.

annust sonzela

\* I agree with sections (a) - (g). I disagree with (h) and (i) as both overinclusive and underinclusive.

#### NEW General Rule 37, JURY SELECTION

(a) Policy and Purpose. The purpose of this rule is to eliminate the unfair exclusion of potential jurors based on race or ethnicity.

(b) Scope. This rule applies in all jury trials.

(c) Objection. A party may object to the use of a peremptory challenge to raise the issue of improper bias. The court may also raise this objection on its own. The objection shall be made by simple citation to this rule, and any further discussion shall be conducted outside the presence of the panel. The objection must be made before the potential juror is excused, unless new information is discovered.

(d) Response. Upon objection to the exercise of a peremptory challenge pursuant to this rule, the party exercising the peremptory challenge shall articulate the reasons that the peremptory challenge has been exercised.

(e) Determination. The court shall then evaluate the reasons given to justify the peremptory challenge in light of the totality of circumstances. If the court determines that an objective observer could view race or ethnicity as a factor in the use of the peremptory challenge, then the peremptory challenge shall be denied. The court need not find purposeful discrimination to deny the peremptory challenge. The court should explain its ruling on the record.

(f) Nature of Observer. For purposes of this rule, an objective observer is aware that implicit, institutional, and unconscious biases. In addition to purposeful discrimination, have resulted in the unfair exclusion of potential jurors in Washington State.

(g) Circumstances Considered. In making its determination, the circumstances the court should consider include, but are not limited to, the following:

(i) the number and types of questions posed to the prospective juror, which may include consideration of whether the party exercising the peremptory challenge failed to question the prospective juror about the alleged concern or the types of questions asked about it; (ii) whether the party exercising the peremptory challenge asked significantly more questions or different questions of the potential juror against whom the peremptory challenge was used in contrast to other jurors; (iii) whether other prospective jurors provided similar answers but were not the subject of a peremptory challenge by that party; (iv) whether a reason might be disproportionately associated with a race or ethnicity; and (v) if the party has used peremptory challenges disproportionately against a given race or ethnicity, in the present case or in past cases.

(h) Reasons Presumptively Invalid Because historically the following reasons for peremptory challenges have been associated with improper discrimination in jury selection in Washington State, the following are presumptively invalid reasons for a peremptory challenge: (i) having prior contact with law enforcement officers; (ii) expressing a distrust of law enforcement or a belief that law enforcement officers engage in racial profiling; (iii) having a close relationship with people who have been stopped, arrested, or convicted of a crime; (iv) living In a high-crime neighborhood; (v) having a child outside of marriage; (vi) receiving state benefits; and (vii) not being a native English speaker.

(i) Reliance on Conduct. The following reasons for peremptory challenges also have historically been associated with Improper discrimination in jury selection in Washington State: allegations that the prospective juror was sleeping, inattentive, staring or failing to make eye contact, exhibited a problematic attitude, body language, or demeanor, or provided unintelligent or confused answers. If any party intends to offer one of these reasons or a similar reason as the justification for a peremptory challenge, that party must provide reasonable notice to the court and the other parties so the behavior can be verified and addressed in a timely manner. A lack of corroboration by the judge or opposing counsel verifying the behavior shall invalidate the given reason for the peremptory challenge.
