

WHERE MOST TEAMS START

PM 101

Project rhythm, communication, field productivity, and cost awareness. Built for early-career PMs, project engineers, and field-to-office leaders learning to become reliable sooner.

Estimating 101

How specialty trade estimates get built: reading the job, understanding scope, thinking through labor and productivity, and recognizing the risk behind the number.

Leadership

Leading people, communicating expectations, and creating stability in fast-moving construction environments. Clearer decisions, stronger teams, fewer surprises.

THE PATH FORWARD

PM 101, Estimating 101, and Leadership are the starting points.

CUSTOM TRAINING

Every company has different people, projects, and pain points. Sessions can be tailored around your audience, whether that means helping young PMs understand the trades, building estimating fundamentals, strengthening field-to-office communication, or developing emerging leaders.

WHO THIS IS FOR

- Specialty trade contractors building bench strength at every level
- Industry associations looking for practical, operator-led content
- Vendors, suppliers, and GC/CM teams working alongside trade partners
- Anyone looking for training grounded in real construction work, not theory

CREDENTIALS

- MCAA IPM, AIPM, Instructor
- MCAA Advanced Leadership Institute Graduate
- MCAA PMEC Committee Member
- 30+ years field-to-boardroom experience in mechanical contracting
