

THE TRACTOR OTHER TRACTORS WANT TO BE.

Because when you set the industry standard for efficiency, that's just what happens. Like with the Fendt iD low engine speed concept, which allows key models to run at very low engine RPMs and very high torque levels. Or the industry-changing VarioDrive transmission, with no clutch packs, tighter turning radii, and the highest horsepower CVT on the market. All backed by three-year Gold Star Customer Care, including all scheduled maintenance and a loaner guarantee.

With all that, it's hard not to get a little jealous.
