A bite-sized
difference makes
A BIG IMPACT

Leading change The Ecopakz way

Reduce your ecological footprint with sustainable tableware to take a collective step towards environmental cognizance.

Due to rise in demand, we have been able to expand:

400%

Our capacities
by almost 400%

300+ Tons

Producing more
than 100 million
cutleries per
month

6500 Kgs

On an average
we are reducing
6500 Kgs of plastic
usage per day

Our Mission

We aim to contribute toward solving the plastic problem by offering a range of earth-friendly and 100% biodegradable tableware. With the purpose of helping the world become single-use plastic-free, we aim to take a collaborate step towards conscious consumption.

Our Vision

Ecopakz promotes an eco-conscious lifestyle that begins with a small change in the hope that a chain of small steps has the potential to create a circular economy- one that endorses the reduction of waste and recycling materials during production.

Eco-Conscious

picks to heal the
earth we call home.

Plastic has reached the Arctic

Nearly 700 species of marine organisms including the endangered ones, have been affected by plastic. This has a wide-spread impact on the ecological balance of the only place that supports life yet. It is time to go beyond the lip service and cause a change by acting on our thoughts.

Yearly plastic waste generated can encircle the earth 4 times

The world has witnessed a drastic increase in the quantity of plastic produced in the world from 2 million tons in 1950 to 368 billion tons in 2019, half of which is single-use plastic. Switching to earth-friendly products will help us protect the place we call home.

Why eat a credit card?

Research suggests that we consume a credit card worth of plastic every week. Changing our consumption patterns will force production units to switch to cleaner options.

Paper Straw

Isn't it Truly Straw-some!

Paper Straw

- ↪ The paper straw market value registering a CAGR of 20.33 % during the forecast period of 2022 to 2029.
- ↪ These high quality and sturdy products are a simple substitute for plastic alternatives.
- ↪ They are capable of withstanding their form across a variety of food types for a long time and do not transfer any aftertaste to your food.
- ↪ They are 100% natural, compostable, and earth friendly.

We likewise offer individual bundling for each of your straws for added assurance. This bundling can likewise be redone in various colors.

Certifications

We have to change NOW!

Some of the most important facts, why we are doing this

10 Million tons

of plastic are dumped in our oceans annually. That's equal to more than a garbage truck load every minute!

Less than **9%** of ALL Plastic gets recycled

1 Million

marine animals are killed by plastic pollution every year

more than 60%

of ALL plastic produced is estimated to be for the single-use purposes

"There will be more plastic in our oceans than fish, by 2050"

The Ellen MacArthur Foundation
