

Range Rules for Uncontrolled Range Update

These rules are mainly focused on “cease fire” conditions. We could add some additional details describing general range use including range etiquette (don’t sweep anyone, clean up after yourself, etc), sharing the range with other members, target placement with screen shots from the online orientation and checking the calendar before leaving for the range. We also could add some logistic information around parking, where to park during non-peak times as well as parking during peak times. We could include diagrams illustrating the location of the trauma kits and emergency information.

Range Utilization for Uncontrolled Range Update

Range 1: Need to add the additional information on target placement such that all projectiles terminate into the berm reducing the potential for ground impact. Images from the online orientation could be added. Additionally, since the target holders are provided, we could add text to the target stands indicating minimum and maximum target height. We should add more information on ammunition used on the range i.e. shooting provided steel with armor piercing rounds.

Ranges 2-5: Need to add electronic cease fire signals. I recommend moving the “Prohibited Ammunition, Targets, Activities” to the top of the page and move “Self-Healing/Bouncy Ground targets are not allowed at our facility.” Into the top 3 lines of this section. “DELIBERATE DESTRUCTION OF TARGET FRAMES OR STANDS WILL BE CONSIDERED VANDALISM” should be moved to the very top of the document and highlighted. Again, I think we should add the images from the online orientation into the document to illustrate proper target placement. Additionally, I think we need to add the location of the trauma kits into this document. Range rules on the bay shelters should be updated to include these additions to be consistent with the online rules.
