with zero upfront cost

- Point of Sale
- Menu Optimization
- Location Cabling
- Internet
- VOIP Phones

- Wire Clean Up
- Gift Cards
- Online Ordering
- IT Support

The list goes on....

### **Payco PaaS comes with IT support and 24/7 POS helpdesk.**

The PaaS program requires zero upfront investment and offers **two pricing options**—both designed to save you money while delivering exceptional value to your business. With a simple flat fee, PaaS covers everything: credit card processing, hardware, software, ongoing support, and full IT services.

#### **Option 1**

##### **Surcharge model**

With this model, a 3% surcharge is added to credit card transactions, allowing you to shift the majority of processing fees to your customers. As a result, your credit card expenses are dramatically reduced—leaving only a minimal cost for you to cover. The outcome: lower overhead, upgraded technology throughout the business, increased profitability, happier staff, and smoother operations.

#### **Option 2**

##### **Dual pricing Model**

We apply a small markup to your menu prices, giving you the flexibility to offer a discount to cash-paying customers—though the cash discount is completely optional. Either way, this model eliminates your credit card processing fees and unlocks our full suite of services—a true win for your business. You'll also benefit from a complete technology upgrade, dedicated IT support, and significant cost savings. Ready to take the next step? Contact us today to get started!

Most operators experience a **6% revenue increase** after implementing Payco PaaS. This boost comes from menu optimization, improved staff efficiency through technology integration, increased system uptime, reduced time spent on mundane tasks, and higher business throughput—all contributing to a smoother, more profitable operation.
