

Doggy Life Jackets Checklist:

The Fit:

- Measure the length of your pup from the neck to the base of the tail
- Measure the girth of your pup – the widest part of the neck & the widest part of the chest
- Weigh your pup

Choose a life jacket that stays comfortably within the manufacturer's recommendation. A life jacket should fit your tail wagger snugly with some area to move around.

Additional Considerations:

- A brightly colored jacket will keep your pup visible in the water
- A top sturdy handle will help you to grab and lift your fur baby out of the water quickly & easily
- Front floatation pads will keep your pup's head above the water
- Dog's who are not strong swimmers should wear a jacket with extra floatation around the middle & sides for increased buoyancy.
- D Rings on the jacket will allow you to connect a leash to the jacket for use when your tail wagger is out of the water.

There are many websites that sell life jackets, including [amazon.com](https://www.amazon.com) (Outward Hound jacket shown available on [amazon.com](https://www.amazon.com)). We encourage you to checkout several websites to get as much information as possible so that you make the right choice for your boating paw-mate.
