---

1 Mikes Tab sets are marked 1 & 2 - Begin with set 2 placing index tab V-Z 3/16" up from the bottom of the page
   set the black line of the tabs to the edge of each ascending page, touching each line together
   The first tab begins on page 873. The 3/16" spacing will protect it from prematurely tearing

2 NOTE the 16 tab layout per row fits nicely as described in this document

Start tabbing your NEC Code book - back to front - set first tab V-Z at bottom of page - 873, 3/16" off bottom of page

1 You will probably use the INDEX Pages more than any other pages in your code book

   The INDEX is your guide to finding topical words in the NEC CODE BOOK

* Index KEY WORDS give you section number as a reference - They are found at the top of each page

2 "NEW" -- A TAB FOR THE TABLE OF CONTENTS-- starts on page #3 - It too is VERY USEFUL

   The Table of CONTENTS references give you *page # numbers*, they are found at the bottom of each page

3 Why should I buy the Soft bound code book - When Tabbed as outlined above, the soft copy when grasped by

   your left hand - folding it in half will neatly expose all the tabs for easy reading and quick referencing.

4 NOTE: By starting to tab your Code Book from back to front - makes aligning each tab a SNAP!
