

Gun Rack Assembly Instructions

1. Start by laying all the pieces out on a flat surface as shown in the diagram. **All pieces are labeled on the back as shown.**
2. Place the top rail onto one of the side pieces. Next, insert the provided screws thru the predrilled holes in the rail and into the corresponding holes on the side and tighten. *Be careful not to over tighten the screws.* Repeat this process for the remaining corners.
3. Hanging your gun rack: Four (4) mounting holes are provided on 16" centers. This will allow easy mounting to your wall studs. If you are not mounting to wall studs, I recommend using wall anchors that are rated to handle the weight of your firearms. (No hanging hardware is provided with this item)
4. Enjoy your handcrafted item.

Thank you for supporting a small American business.
