

Standing Gun Rack - Assembly Instructions

1. Start by laying all the pieces out on a flat surface. The joints are labeled to show which corresponding piece fits in the proper location. Each of the parts only fits in one spot. (Fig.1) All screw holes are pre-drilled.
2. Start by joining one side with the corresponding Horizontal Parts.
3. Attach the remaining side (Fig. 2)
4. Check that all the screws are tightened properly.
5. Enjoy your gun rack.

Thank you for supporting a small American Business. If you have any questions, please don't hesitate to contact us.

Each gun rack is individually hand fitted and drilled prior to shipping.
Make sure when inserting screws that they line up with the predrilled holes in the mating piece.
Do not mix pieces between rack assemblies.
