

SKIN-HEALTH PROGRAMS

FOR ALL SKIN TYPES AND NEEDS

Restore your skin's natural beauty. Full skin-health programs directly from our Dermatologists. No questioning what's right, it's already set up for your needs and skin type. Start your skin-health journey to

THE FOUNDATION Key and essential skincare regimen for everyone! Excellent for younger and mature skin. A great base to skin health, add and build your skincare routine as you go along.

BRIGHTEN AND PREVENT Formulated to luminize and brighten while treating discoloration. Remove unwanted pigmentation while preventing oxidative stresses that cause skin aging and discoloration.

GLŌ ANTI-AGING For both younger skin as prevention and maturing skin needing correction, improved texture and reduction of fine lines. This complete plan prevents oxidative stresses causing collagen and elastin degradation. Hydrate, volumize, prevent, correct and restore...it's all here. Dr. Straka uses the MENS regimen himself, his top picks.

GLŌ AGGRESSIVE ANTI-AGING The ultimate preventative, corrective and hydrating regimen to reverse the years and prevent those to come. This program encompasses the best proven ingredients in skincare to date. This is Dr. Kleven's personal skin care routine!

PRODUCT APPLICATION AND LAYERING GUIDELINES: Apply product to fingertips and massage into the skin until fully absorbed. Once absorbed, continue with additional steps in the protocol sequentially.

RETINOL/TRETINOL APPLICATION TIPS: Apply only a pea-sized amount of the medication for the entire face. Using more may cause irritation. Start by squeezing a small amount onto your fingertip and dab onto your forehead, cheeks, chin, and nose. Spread thinly over entire face. You may use a moisturizer immediately following. These medications may cause redness, peeling and irritation. Typically your face will adjust after several weeks with continued application. If redness and irritation become significant, reduce the application frequency to every other night or even every third night. Irritation can also be managed by applying moisturizer to your skin BEFORE applying the medication. For anti-aging and pigmentation, it may take 3-6 months to see improvement, but continues to improve the longer you use it.

WEEKLY TREATMENT INSTRUCTIONS: Intermittent treatment products can cause irritation if over-used. It is recommended you do not use if your skin is experiencing irritation. Almost all skin types can tolerate once weekly, but some individuals may need to do every other week.

Foundation skincare	ZO Daily Skincare Program (4 item)	Glō Best Base (Lumeno)
	Exfoliating Cleanser	Revitalizing Cleanser
	Exfoliating Polish	Brightening Polish
